Life Sciences Parks

Adlershof Zentren für Biotechnologie und Umwelt

Adlershof is a leading site for Biotechnology and Life Sciences in Berlin-Brandenburg. The Centre of Biotechnology and the Environment (Zentrum für Biotechnologie und Umwelt, ZBU I) extends over 200m with 13,000 square metres of rentable space, while 7,200 square metres are available in the ZBU II. Offering premium technological facilities, with extensive equipped lab areas, the spaces are tailored to young biotech businesses.

adlershof.de

berlinbiotechpark

berlinbiotechpark offers successfully growing companies the ideal location and the infrastructure to develop advanced technologies. berlinbiotechpark is located in the very heart of Berlin – one of the most important biotechnology regions in Germany. The integrated concept – office, laboratory and production space with technical infrastructure and services – is unique in Germany

berlinbiotechpark.de

Biotechnologiepark Luckenwalde

Located just 30 miles south of Berlin and 25 miles from Berlin-Brandenburg International Airport in the rural district of Teltow-Flaeming, the Biotechnology Park Luckenwalde is one of the most modern facilities of its kind in Germany. It is home to 35 companies with 500 employees from Germany, USA, UK, Korea, India, Italy and Russia.

biotechnologiepark-luckenwalde.de

Campus Berlin-Buch

Campus Berlin-Buch in the northern part of Berlin is an innovative science, health and biotechnology park where companies and institutions conduct basic and clinical research. Among the features unique to the campus are the clear focus on biomedicine and the closeness of the institutions to each other both spatially and with regard to scientific interaction and collaboration.

campusberlinbuch.de

Innovationsforum Hennigsdorf

The “Innovationsforum Hennigsdorf” offers affordable rental opportunities and a selected portfolio of services and advice to young start-ups as well as medium-sized companies. Therefore Hennigsdorf is a center of excellence for life sciences, especially in the field of red biotechnology and medical technology.

innovationsforum-hennigsdorf.de

Innovationspark Wuhlheide

So far 200 companies have decided to locate at the Wuhlheide Innovation Park, where the creative environment and service-oriented management provide important stimuli with respect to product development and innovation. Our companies have attractive office accommodation, workshops, laboratories and service areas at their disposal. Furthermore, they also have the opportunity to acquire fully developed investment sites for the evolution of their company! The location stands for successful new businesses, growth and long-term perspectives.

With over 21,000 professionals worldwide (approx. 650 in Germany), Parexel collaborates with various stakeholders in the biopharmaceutical industry to enhance clinical trial accessibility and efficiency. | parexel.com |
| Pensatech Pharma GmbH | |
| Pensatech Pharma GmbH is a contract R&D company in Berlin, Germany. We are specialized in classical and innovative pharmaceutical dosage forms based on a comprehensive portfolio of formulation and analytical techniques including oral modified release, long acting injectables (e.g., implants, micro-/nanoparticles, liposomes), bioavailability enhancement of poorly soluble drugs and local application (e.g., eye, skin). | pensatechpharma.com |
| PharmaLex GmbH | |
| PharmaLex is one of the leading service providers in the International pharmaceutical business. The company is dedicated to the development, registration and marketing authorization, market access and product maintenance of medicinal / biotechnological products and medical devices, worldwide. The corner stones of PharmaLex' successful co-operation with companies of all sizes and specializations are very high quality of work, reliability, efficacy, flexibility and anticipatory strategic planning. | pharmalex.com |
| preclinics Gesellschaft für präklinische Forschung mbH | |
| Based in Potsdam, preclinics is an experienced CRO offering preclinical studies on innovative biological drugs and vaccines. Since 2007, we provide in vitro and in vivo assays for the preclinical development of therapeutics. In four different locations in Germany and Italy we have laboratories for almost every demand, including animal facilities, biosafety laboratories, molecular and cell biology. Our exceptional laboratory infrastructure allows us to manage complex and challenging projects. | preclinics.com |
| QiP GmbH | |
| The QiP – Quality in Progress – GmbH is a consulting enterprise, providing excellence services in a wide range of quality related themes. Our expertise is dedicated to the success oriented support of our clients, among them medical devices manufacturer, pharma and biotechnology companies, in various fields of activities: Life science, health, food and more. Our team qualifications include medical physics, clinical trials management, biotechnology and bioinformatics. We develop quality management systems, conduct audits and represent our clients in front of audits and inspections, compile clinical evaluations, and support e. g. the validation, risk management, and market authorisation processes. | qip-qm.com |

Sacura GmbH

Sacura is a full-service contract research organization granting a high level of quality (FDA approved), flexible structures and qualified staff.

[sacura-cro.com](https://www.sacura-cro.com)

syneed medidata GmbH

syneed medidata GmbH is an independent, privately owned, contract research organization (CRO) that has been providing end-to-end services for phase II to phase IV clinical trials and for observational studies for more than 25 years. Since 1995, we have also excelled in trials involving medical imaging (oncology, neurology, radiology) and in trials with medical devices.

ABITEP GmbH

The ABITEP GmbH is working in development and production of biotechnological products for sustainable agriculture. The team of ABITEP works for development of non GMO customer specific technologies in laboratory scale and scale up with modern equipment and Know how. Capacities for fermentation up to 5.000 L, down stream equipment as well as freeze drier with capacity of 90 L are available for services. A molecular biology lab is available for basic science.

Absea Biotechnology GmbH

Established in 2020, Absea is a transformative force in protein engineering. Our high-throughput platform for developing soluble proteins and monoclonal antibodies (mAbs) enables 1000 new projects per month. Our 12,000-protein library and our mAbs, validated for diverse applications, stand ready for widespread supply. Beyond this, we offer cutting-edge solutions for proteomics and interactomics. From our Innovation Center in Berlin, we cater to protein scientists as well as industry partners.

absea.bio

ACARYON GmbH Berlin

ACARYON for microbiome specific services:

- HUMIPLATE, a unique in vitro human gut microbiome cultivation platform to assess the impact of products on the composition or function of the human microbiome.
- One of the broadest pre- and probiotic analytic platform to support product development or identify new properties.
- MicroSIS, a unique platform for the development of next generation probiotics.

Adrenomed AG

Adrenomed AG is a privately financed, clinical stage biopharmaceutical company focused on rescuing vascular integrity in critically ill patients. Impaired vascular integrity is currently an unmet pathophysiology of a variety of life-threatening conditions like septic shock and acute heart failure. Our unique treatment approach combines targeted therapy with specific in vitro diagnostics by utilizing the expression level of the bioactive target to identify patients in need. Lead product candidate is a first-in-class Adrenomedullin-specific antibody, currently under evaluation in clinical Phase-II studies.

| Alithea Bio UG | |
| Alithea revolutionizes cancer care with end-to-end solutions. Our B2B platform provides unique HLA-peptide data to accelerate target discovery, streamline validation, and ensure safety. Powered by proprietary tech, AI, and Big Data, we enable highly personalized, effective therapies for every patient. | alithea-bio.com |
| AMMEVA GmbH | |
| | ammeva.de |
| AmpliVak Immunotherapy GmbH | |
| AmpliVak develops a proprietary immunization technology based on in vivo loading of dendritic cells with tumor antigens. The induced cytotoxic T cells are then amplified in the body of the patients up to 500-fold (“amplification”), which leads to a highly efficient elimination of tumor tissue. This therapeutic vaccination, which will be clinically tested together with the oncology department of the Charité, is of universal nature and can thus be applied in a variety of tumors. | amplivak.eu |
| AnaKat Institut für Biotechnologie GmbH | |
| AnaKat Institut für Biotechnologie GmbH has specialized on analytical determination of pharmaceutical ingredients. | anakat.de |
| Analytica Alimentaria GmbH | |
| Analytica Alimentaria GmbH is an international food safety company. Our expertise includes the analysis of pesticides, contaminants, heavy metals and disinfectants in food, using e.g. multi GC/LC MS/MS. Our highly qualified team of more than 150 scientists, agronomists and technicians develops proactive solutions, like new analytical methods e.g. for toxins or other critical residues. Smart food safety goes beyond lab work: we identify potential crises at an early stage. | analyticaalimentaria.de |
| AnalytiCon Discovery GmbH | |
| AnalytiCon Discovery has a strong focus on natural product based drug discovery services. AnalytiCon’s libraries: Isolated natural products from plants and microbes, synthetic libraries based on natural product motifs, macrocyclic and virtual libraries are building up a complete chemical ecosystem. AnalytiCon’s services: Our libraries are well suited for biological and bio-structural profiling addressing challenging problems with a high need of new chemical space. In-vitro, fragment based, in-silico and fully integrated drug discovery services are available. AnalytiCon’s team: Highly motivated and talented team of natural product, separation, analytical, computational, synthetic and medicinal chemists and biologists. | ac-discovery.com |
| AnaTox GmbH & Co. KG | |
| AnaTox is a software and service company for maintenance and qualification of LC/GC/MS instruments in the so-called regulated environment. The main topic is the development and support of automated qualification tools and software for chromatographic equipment. The main product is the AIQ-Tool® software that automates and makes qualification independent from the instrument manufacturer and the customer CDS (chromatographic data system). AnaTox provide software solutions for manufacturer, service provider and customers. | anatox.de |
| ANIMOX GmbH | |
| Development of applications for the use of natural peptide / amino acid mixtures in chemistry and biotechnology, f.i. as a scavenger material in formaldehyde bounded formulations, foaming or hydrophobic Tensid compounds or as a N-source in biotechnological fermentation processes, distribution of a technology for the production of such basic materials from raw and residual materials. | animox.de |
| aokin AG | |
| Aokin AG is a Berlin biotechnology company that is specialized in the development and commercialization of innovative analytical systems on the base of the rapid kinetic assay technology. The aokin systems are unique in their precision and operating speed. Areas of application are food and antibody analytics as well as clinical diagnostics. We also offer laboratory services in the area of food analytics, Pharmacodynamics and chemical synthesis. | aokin.com |
| Applichrom GmbH | |
| AppliChrom produces chromatography media, columns and applications for HPLC, GPC, SEC, HILIC, Ion Exchange Chromatography, Ligand Exchange Chromatography, Ion Exclusion Chromatography. AppliChrom serves customers analysing biomolecules including biopolymers, technical polymers - from 100Da up to 40Mio Dalton. Short delivery times, high quality of chromatography columns (suitability/resolution/application, long-time-reproducibility, durability), pre- and after-sales service, liquid-chromatography seminars are available. | applichrom.de |

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|
| Aptarion biotech AG | |
| Aptarion Biotech develops biostable L-aptamers for the treatment of life-threatening diseases. Spearhead of our therapeutic strategy is AON-D21 that binds and inhibits complement factor C5a with a unique mechanism of action. Encouraging preclinical data in several disease models support the development of AON-D21 in acute inflammatory indications as well as in lung cancer. In a single-ascending dose study in healthy volunteers, AON-D21 was shown to be safe and well tolerated. | aptarion.com |
| ARGUS Umweltbiotechnologie GmbH | |
| ARGUS is a medium-sized company. Since 1987 ARGUS works on the field of remediation of contaminated groundwater, soil, waste water and waste air. ARGUS is able to elaborate a specific remediation program in each different pollution case considering economic aspects beside ecological aspects. All necessary treatment steps can be planned and carried out. The combination of microbiological steps with classic processes leads to a successful remediation of complex contamination. | argus-umwelt.de |
| Ariceum Therapeutics GmbH | |
| Launched in 2021, Ariceum Therapeutics GmbH develops first and best in class radiopharmaceuticals for the diagnosis and treatment of cancers. Its pipeline includes 2 clinical stage assets in Phase 1 development for hard-to-treat cancers such as, Small Cell Lung Cancer and Glioblastoma and several preclinical programs to tackle novel targets in the radiopharmaceutical field. | ariceum-therapeutics.com |
| Artemiflow GmbH | |
| Artemiflow is a spin-off from the Max Planck Institute of Colloids and Interfaces (MPIKG). By the industrial use of an international patent held by MPIKG, Artemiflow uses a new process to produce Artemisinin from dihydroartemisinic acid (DHAA). DHAA is available in abundance in the waste of the current production process for Artemisinin. | artemiflow.com |
| ASC Oncology GmbH | |
| ASC Oncology developed the Reverse Clinical Engineering®, a test procedure to determine for individual patients with malignant solid tumors which anticancer treatments are most likely to be effective. The in vitro diagnostic test is based on patient-derived 3D cell cultures (PD3D®), so-called tumor organoids, obtained from a patient's vital tumor sample. This enables a personalized therapy with presumably higher likelihood of survival and a better quality of life to be selected as early as possible. | asc-oncology.com |
| ASCA GmbH Angewandte Synthesechemie Adlershof | |
| ASCA is a partner for contract research in chemical synthesis. The development of new active structures on a laboratory scale is offered. In-house analytical facilities are available. ASCA also offers reference materials for analytical purposes. Our catalogue comprises more than 400 compounds and metabolites such as pesticides, API's, mycotoxines and plastic additives (native and labelled). | asca-berlin.de |
| ASKA Biotech | |
| ASKA is your reliable CMO for the development and production of recombinant proteins & monoclonal antibodies in mammalian cells and immunoassay kits. As an ISO 13485:2016 certified company, ASKA provides constant high-quality services for research, in-vitro diagnostic (IVD) and preclinical trials. With over 30 years of experience in protein production, ASKA provides customized and flexible solutions for each requirement. | aska-biotech.de |
| Astra Biotech GmbH | |
| Astra Biotech GmbH offers high quality reagents, allergens, antibodies, recombinant proteins, and assays for the determination of hormones, allergies, tumour markers and infectious diseases. Quality is one of the key cornerstones on which Astra Biotech maintains its reputation and with which we strive to increase customer satisfaction and gain growing customer loyalty. We take great pride in our highest quality assays, which are all IVD compliant and therefore suitable for direct, accurate and reproducible diagnostic purposes, as well as for research. | astrabiotech.de |
| ATAI Life Sciences AG | |
| | atai.life |
| Athenion GmbH | |
| Athenion AG focuses on the development and distribution of high-quality products for the pharmaceutical and healthcare markets. We seek and identify promising developments of active pharmaceutical ingredients, new care and health products as well as exciting technologies. | athenion.com |
| ATLAS Biolabs GmbH | |
| ATLAS Biolabs is a leading European service provider of complex analyses in molecular genetics including next-generation sequencing and microarray services complemented by high-level data analyses. We build close relationships with our clients to achieve the highest level of client satisfaction. Our quality management is certified according to DIN EN ISO 9001:2015. The laboratory is accredited by DAkkS according to DIN EN ISO/IEC 17025:2018, as listed in the annex of D-PL-21662-01-00. | atlas-biolabs.com |

|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------|
| Atlas Medical GmbH | |
| Development, supplier, manufacturing and international distribution of quality diagnostic and medical equipment like Diagnostic reagents and Kits for use in labs, clinics and hospitals. Specialised on Latex related kits, carbon-antigens, blood culture bootles, rapid tests and urine reagent strips, stains for microbiology and histopathology, ELISA kits, Drug-of-Abuse and Hometests (OTC) like Fertility Home Tests & General Health Screening Tests. | atlas-medical.com |
| Attomol GmbH Molekulare Diagnostika | |
| The company's aim is to develop, produce and distribute medical diagnostics for human medicine in the field of molecular genetics, infectious and autoimmune diseases. | attomol.de |
| AudioCure Pharma GmbH | |
| AudioCure is dedicated to the development of drug treatments for hearing disorders with a high unmet medical need. By protecting and restoring the cellular key players that are critical to the hearing process, our therapeutic approach goes beyond treating symptoms to tackle the root cause of the disorders. | audiocure.com |
| Aurora Europe GmbH | |
| Aurora Deutschland is a licensed pharmaceutical manufacturer, importer and wholesaler in the meaning the German Medicines Act and a licensed narcotics dealer in the meaning of the German Narcotics Act. | auroramedicine.com/de |
| Auto Tissue Berlin GmbH | |
| The company is engaged in the development, production and marketing of medical devices for cardiovascular surgeons. The products are specially made for the patients and have less side effects. The first certified product was a pulmonary heart valve (Matrix P) for the right ventricular outflow tract reconstruction (RVOT). The second product is also a heart valve which considerably shortens the operation time (Matrix P plus). Meanwhile a complete glutaraldehyde free valve is available called Matrix P plus N. | autotissue.de |
| AZ Biopharm GmbH | |
| Analytisches Zentrum (AZ)-Biopharm Berlin GmbH is an independent GLP and GMP certified contract research organization with a profound experience in the field of bioanalytics, pharmaceutical quality control for human and veterinary medications and the determination of physicochemical parameters of chemicals according to OECD guidelines. Providing customized analytical solutions from research & development to routine analytics, AZ Biopharm uses well established (USP, PhEur, JP,etc) to in house developed sophisticated analytical techniques. AZ Biopharm's bioanalytics offers for more than 20 years method development and validation according to FDA and EMA guidelines for tox, PK and BE studies with quick turnaround and unbiased quality. | az-biopharm.de |
| B4 PharmaTech GmbH | |
| The synthesis of recombinant proteins is of crucial importance for the continuous supply of active proteins in diagnostics and therapy. Cell-free systems from B4 PharmaTech GmbH help to carry out fast, automatable, scalable and multi-parallel protein synthesis. Fluorescence-labeled proteins, customized enzymes, complex membrane proteins, cytotoxic proteins and immunotoxins as well as proteins with chemical linkers are synthesized in cell-free systems. The customized custom synthesis, the commercialization of systems for cell-free protein synthesis as well as the synthesis and analysis of antibody-drug conjugates are the focus of B4 PharmaTech GmbH. | b4pt.de |
| BASF Metabolome Solutions GmbH | |
| BASF Metabolome Solutions GmbH is a 100% affiliate of BASF SE. Formerly known as metanomics GmbH, a team of 50 scientists and technicians provides Metabolite Profiling, mass spectrometry-based compound analytics, and plant testing services to internal and external clients. Work is performed under ISO 17025-like and Good Laboratory Practice (GLP) quality standards. | basf.com |
| bbi-biotech GmbH | |
| In the focus of the activities of bbi-biotech lie systems for the sterile sampling from bioreactors for all applications in the biotechnology, pharmaceutical, food, cosmetics and chemical industry. In addition, bbi-biotech develops components - in especially disposable ones - for the preparation of a new generation of fermentors and bioreactors and offers consulting and planning services for biotech projects, its implementation and services. | bbi-biotech.com |
| Beacon Medical Germany GmbH | |
| ABCann Germany GmbH is the German affiliate of Canadian VIVO Cannabis Inc, an integrated supplier of cannabis. ABCann Germany GmbH has a pharmaceutical wholesale licence and has pending applications for GMP-import licences and narcotics licence. ABCann Germany plans to commercialize medicinal cannabis products in Germany and the EU. | beaconmedical.de |
| BEB BioEnergy Berlin GmbH | |

| Becanex GmbH | |
| Becanex (Berlin Cannabis Extraction) GmbH is the leading extraction company for cannabinoids and terpenes from Medical Cannabis and Industrial Hemp in Germany. Our proprietary One-Step Extraction method brings the plant into the bottle. Our extracts are used as APIs for cannabis-based therapies. Additionally, our extracts are used as functional ingredients in a wide range of cosmetics, food supplements and drinks. For the coming years, our team will scale up the machinery and increase the portfolio of high value extracts from different plants. | becanex.com |
| Belyntic GmbH | |
| Belyntic GmbH is a chemistry-for-healthcare enterprise focusing on the purification of peptides. Based on its proprietary "Peptide Easy Clean" (PEC) technology, Belyntic offers the world's first broadly applicable peptide purification kits. PEC enables first-in-class parallel purification and modification of difficult peptides with low ecological impact using catch-and-release methodologies. | belyntic.com |
| Berlin Cures GmbH | |
| The company's goal is to bring aptamers as new drug candidates against autoantibody-induced dilated cardiomyopathy and other autoantibody-associated diseases into the clinical application. | berlincures.de |
| BiLaCon GmbH Gesellschaft für Biotechnologie, Laboranalytik und Consulting | |
| | bilacon.de |
| BioAnalyt GmbH | |
| Bioanalyt develops and distributes the worldwide first easy-to-use and portable test kits for the analysis of vitamins and micro nutrients. The iCheck-iEx test kits enable food producers, food authorities and NGOs to monitor their ongoing food programmes more efficiently and at low-cost. The company was founded in 2006 by Prof. Dr. F. J. Schweigert as a spin-off of the University of Potsdam. Read more on our website www.bioanalyt.com . | bioanalyt.com |
| biocyc Biotechnologie GmbH & Co. KG | |
| Production of bio-chemicals, peptides, in vitro-diagnostics, test-kits. Development of consumer service for peptides and biochemicals. | biocyc.de |
| BioGenes GmbH | |
| BioGenes GmbH, founded in 1992, is a worldwide acting full-service provider of customized antibody and immunoassay development with a strong commitment to quality and service. The company provides highly customized solutions for quality control of biological products (HCP), drug discovery, drug development, manufacturing of biologicals as well as for diagnostic purposes. BioGenes is a recognized partner of biotech and pharmaceutical companies all over the world. | biogenes.de |
| Bioline GmbH | |
| Our mission is to provide customers with a range of products which are fast and easy to use, guaranteed to work and developed by scientists who understand what our customers are trying to achieve so they can focus on their scientific goals. Bioline reagents are used by molecular biologists and other research scientists to perform test-assays and research in many fields from medical, biotechnology and marine biology. | bioline.com |
| BioMedion GmbH | |
| IT-Service for all GxP-Regulatory Tasks Data- and Document Management, Long-Term-Archiving and Digital Signature, SOP-Management, CAPA, Raw Data Management, Consulting for Validation of Computerized Systems according to GAMP4/5. | biomedion.com |
| Biomes NGS GmbH | |
| Biomes NGS GmbH is a biotechnology startup that analyzes the DNA of microbes living in and on the human body with the Next Generation Sequencing Method. The results are personal microbiota profiles, based on which customers receive individual recommendations for improving their quality of life. The first product INTEST.pro is an intestinal flora self-test to combat gut flora complaints. | biomes.world |
| BIONFARMING GMBH | |
| | bionfarming.com |
| BIONUKLEO GMBH | |
| At BioNukleo, we harness the power of enzymes to provide sustainable solutions for the synthesis of various fine chemicals, focusing on nucleoside and nucleotide derivatives and related compounds. By combining our extensive knowledge of biocatalysis and nucleosides, we offer custom biocatalytic processes with high selectivity and reduced environmental impact. Additionally, we provide small-scale custom synthesis of modified nucleotides for specific research and development needs. | bionukleo.com |
| BIOPRACT GmbH | |
| Service and Additives (enzymes, trace elements, microbes) for biogas and waste water sludge treatment. Enzyme analysis in agriculture industry, Contract research feed additives. | dsmbiogas.com |

| BIOSYNTAN Gesellschaft für bioorganische Synthese mbH | |
| BIOSYNTAN is focused on custom synthesis of peptides. As one of the leading specialists in the synthesis of linear and cyclic peptides with unusual residues and a multitude of modifications we can offer you an extensive range of services today. Our core area is the manufacturing of fluorescently labeled peptides for assay development and the synthesis of post-translationally modified peptides. | biosyntan.de |
| Biosynth GmbH (Celares) | |
| Specialist for drug delivery of peptides, proteins, nucleotides using various DD systems: PEGylation, PEG-b-copolymers, HPGs, and others. Covalent modification of biopharmaceuticals with PEGs or non-covalent drug delivery to improve pharmacological properties. Offers PaSmax® technology for synthesis of highly drug-loaded ADCs, and celaSTAR for multiplexing of biologics to increase affinity. Celares offers customized PEGylation solutions and synthesis of special polymers. | celares.com |
| Biotechnologie Kempe GmbH | |
| We focus on development and construction of measuring and control equipment for applications in food and fermentation industries. In our separate programming department, highly specialized computer engineers develop systems for process computer aided automation in the field of fermentation industries. | biotechnologie-kempe.de |
| biotechrabbit GmbH | |
| biotechrabbit GmbH is determined to offer the newest and best life science products and innovative solutions to scientists leading the fight against disease and fueling our lives with innovations. We supply ultra pure enzymes and high-quality antibody services for diagnostics and a life science product portfolio (including reagents for PCR and nucleic acid purification) for molecular biology and proteomics. The biotechrabbit advantage is our combination of passion for excellent research with the agility of true entrepreneurship. | biotechrabbit.com |
| BIEWORX | |
| BIEWORX offers services in the fields of contract research for customer-specific Biotransformations, the screening, isolation and production of Biocatalysts from microorganisms and plants and the bioanalytic syntheses. Further organic compounds and metabolites will be synthesized with enzymes for customer in kg scale. | bioworx.de |
| Birdotech Berlin GmbH | |
| Birdotech specializes in providing chemical building blocks, reference compounds, and custom synthesis for the purpose of pharmaceutical research and innovation. With a strong team of chemical development experts, our worldwide CRO & CDMO services of small molecules are reliable, cost-effective and on time. | birdotech.com |

| Bruker Nano GmbH – JPK BioAFM Center | |
| JPK Instruments AG is a world-leading manufacturer of nanoanalytic instruments - particularly atomic force microscope (AFM) systems and optical tweezers - for a broad range of applications reaching from soft matter physics to nano-optics, from surface chemistry to cell and molecular biology. From its earliest days applying atomic force microscope (AFM) technology, JPK has recognized the opportunities provided by nanotechnology for transforming life sciences and soft matter research. | jpk.com |
| BST Bio Sensor Technology GmbH | |
| BST develops and produces biosensors to provide high quality analysis at moderate prices. In 1982 BST brought on the market the first multi-way biosensor based blood glucose analyzer in Europe and is since then market leader in Europe. Today BST sells more than 60.000 sensors a year. Since 2008 BST is besides biosensors also manufacturer of POCT and laboratory instruments. | bst-biosensor.de |
| Cambrium GmbH | |
| Cambrium is a next-generation materials company. Using our AI enabled, highly-automated platform, we program proteins to create materials with unseen properties. From cosmetics, to fashion, to plastics; virtually everywhere where animal-, mineral-, and petroleum-derived materials are being used today, programmable proteins can do it better. | cambrium.bio |

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------|
| CanChip GmbH | |
| CanChip revolutionizes cancer research with its tumor-on-a-chip technology, which mimics the tumor micro-environment by combining 3D cell culture, microfluidics, and tissue engineering. By bridging the gap between preclinical research and clinical application, CanChip enables more precise, faster, and cost-effective development of cancer therapies, paving the way for improved patient outcomes. | canchip.org |
| CannaPhytica BioMed GmbH | |
| There are more than 40 diseases that can be treated with cannabis. Still not all cannabis plants apply to all patients. The effect of a certain cannabis strain is dependent on both the patient and the concentrations of cannabinoids and other substances of the plant (entourage effect). We do research to find the right cannabis plant for the right patient and disease. | cannaphytica.com |
| Cantourage GmbH | |
| Cantourage, founded in 2019, is a leading European company for the production and distribution of cannabis-based medicinal preparations and drugs. The company enables producers from around the world to become part of the growing European medical cannabis market and offers pharmaceutical-grade products in all relevant market segments: dried flower, extracts, dronabinol and cannabidiol. Cantourage is listed on the Frankfurt Stock Exchange (FRA: HIGH). In 2023 Cantourage launched Telecan, its own telemedicine platform for medical cannabis. | cantourage.com |
| Captain T Cell GmbH | |
| Captain T Cell develops first-in-class efficacy-enhanced T cell therapies for solid tumor patients that are not addressed by existing solutions. One of the company's most recent advances is the establishment of a novel allogeneic platform to enable off-the-shelf treatments of solid tumors. Captain T Cell is a spin-off from the Max Delbrück Center. | captaintcell.com |
| Cartemis Therapeutics GmbH | |
| | cartemis.de |
| Cell Science Systems GmbH (Alcat Europe) | |
| Cell Science Systems (CSS) offers the Alcat Test, an immune cell activation test to identify inflammation causing foods and diet related items by detecting cell changes. The diet modification has shown benefits with gastrointestinal disorders, metabolic syndrome, skin diseases, arthritis, migraine headaches, etc. It has been independently validated by Yale University and other institutions to discover links between immune induced injuries related to diet. | cellsciencesystems.com |
| Cellbricks GmbH | |
| Cellbricks developed a new Bioprinting technology which allows creating complex three-dimensional structures made of biological material. The company is specialized in Bioprinting services, creating tailor-made products to individual customer specifications - for example mini-organs for drug testing or tissues for regenerative medicine cultures as well as off the shelf products. With its profound experience Cellbricks empowers researchers to investigate functional human tissues for fundamental biological research or advanced regenerative therapies. | cellbricks.com |
| CellDEG GmbH | |
| CellDEG applies its unique membrane aeration technology to highly efficient cultivation systems for microalgae. Optimal CO2 mass transfer rates into photosynthetic cultures result in highest growth rates, cell densities and natural product concentrations. CellDEG provides modular cultivation solutions that allow for fast and reliable production of biomass and is aiming to establish a new standard in lab scale and pilot scale cultivation to exploit the full potential of these organisms. | celldeg.com |
| CellDot GmbH | |
| The company deals with the research and use of human-induced pluripotent stem cells (iPSCs) for research purposes, clinical studies, and stem cell therapy. Our services include the production and preservation of fully characterized autologous iPSC cell lines. As the parent company of the Arkcell GmbH, we are managing the operational business of the biobank for autologous human cells and tissues. The product list range from clinical-grade mesenchymal stromal cells for therapeutic purposes and autologous iPS cell lines to T cells as the starting material for CAR T cells. | celldot.tech |
| CELLphenomics GmbH | |
| CELLphenomics is a contract research organization offering state-of-the-art in vitro services. Our patient-derived 3D cell culture organoid models provide deep insights in the biology of cancer and they are an excellent tool for testing novel anti-cancer drugs, new drug combinations and immune-oncology approaches. With more than 5 years of experience in organoid culture and high throughput drug screening, CELLphenomics has become one of the most trusted CROs in the field, serving customers from small biotech to big pharma. With our excellent infrastructure and highly skilled team, we are able to specifically develop the assays to our customer's scientific needs. | cellphenomics.com |

| CellServe GmbH | |
| CellServe is a service provider for research groups in regenerative medicine and fills an important gap in the conversion of applied treatment concepts from research into marketable products. Furthermore CellServe develops own innovative cell-based products for cardiology and uses novel cardiac derived cells ("From the Heart to the Heart") for the treatment of chronic heart failure. | cellserve.de |
| Celltainer Biosolutions GmbH | |
| Celltainer Biotech developed a multi-purpose single-use bioreactor, suitable for microbial fermentation as for fragile cells. This technology, combined with a unique bag design results in high-performance bioprocesses providing a high productivity at low costs for a wide variety of applications. | celltainer.com |
| CellTrend GmbH | |
| CellTrend is certified according to ISO 9001, ISO 13485 and GMP; CE labeled ELISAs for the determination of Antibodies against G-Protein-Coupled-Receptors (GPCR), Tyrosine Kinase Receptor (TKR) and Growth Factors (X-GF); Cell culture systems (CRO); Development and production of antibody-based detection systems (ELISA) Consulting (Qualified person). | celltrend.de |
| Centogene AG | |
| Centogene is a worldwide leader in the field of genetic diagnostic testing for rare hereditary diseases, with a broad test portfolio covering over 2800 genes, biochemical tests, biomarker and clinical whole exome sequencing and whole genome sequencing. | centogene.com |
| Central BioHub GmbH | |
| Central BioHub is the online marketplace for human biospecimens. We connect life science researchers and biospecimen suppliers worldwide on one platform. Intelligent filter options (parameter, disease, donor information etc.) make biological sample sourcing efficient and accelerate medical research. Our easy, transparent and compliant processes cut down your procurement efforts from months to minutes. | centralbiohub.com |
| CheckImmune GmbH | |
| CheckImmune is an innovative service company offering the full biomarker package, from consulting and laboratory services to scientific and medical data interpretation, with a focus on immunology. Our services include: Selection, development, validation, application and evaluation of immunological biomarkers using cutting-edge technologies for lead candidate selection. Proof-of-concept studies on target patient populations (phase 0) and stratification of patient groups. Therapy monitoring in clinical trials with a wide range of already validated assays as much as newly developed customized methods. Available technology platforms are Flow Cytometry, Multiplex Ligand Assays, Anti-Drug Antibody Assays, Functional Assays and Single Cell Analysis. | checkimmune.com |
| chemicell GmbH | |
| Chemicell develops and produces magnetic, fluorescent and coloured nano- and microparticles, reactive fluorescent dyes and special chromatography-materials for the separation or detection of cells, bacteria, viruses, proteins or DNA/RNA and new gene transfer systems. | chemicell.com |
| Chiracon GmbH | |
| Chiracon is a qualified partner to develop chiral intermediates at a constant high quality for innovative drugs regarding economic, environmentally acceptable and scaleable aspects. We offer support through expert knowledge and key technology to meet your increasing needs. Our core competence is chirality. In addition we have a broad variety of chiral building blocks as an inhouse raw material source for high-level API production and development. | chiracon.de |
| CMZ-Assay GmbH | |
| Marketing of diagnostic reagents for measuring concentrations of proteins, hormones and their isoforms, exclusively for research purposes. | cmz-assay.com |
| co.don AG | |
| CO.DON AG develops, produces and distributes autologous cell therapies for the minimally invasive repair of cartilage defects. The product being marketed is a cell therapy product for the minimally invasive treatment of cartilage damage in the knee joint that uses only the patient's own cartilage cells ("autologous chondrocytes"). CO.DON's method is currently used in over 200 clinics in Germany and more than 17,000 patients have already been treated. In July 2017 CO.DON AG received central EU marketing authorisation for this product, followed by the marketing authorization for Switzerland in March 2019. At the Leipzig site, CO.DON has built one of the largest facilities for the production of human cells on an industrial scale for in-house and contract manufacturing. The shares in CO.DON AG are listed on the Frankfurt Stock Exchange (ISIN: DE000A3E5C08). | codon.de |
| Condio GmbH | |
| We develop and produce natural stabilizers and food ingredients tailor-made to your needs. We deliver solutions for your products and optimize recipes and technologies. | condio.com |

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|
| CONGEN Biotechnologie GmbH | |
| CONGEN is specialized in food testing by molecular analytics based on DNA and RNA detection. CONGEN has been a pioneer for over a decade in the development and application of food and feed analytics by real-time PCR. The methods are available as complete analytic kit as well as a Service. Our mission is to serve the food industry with an excellent service and with standardized and reliable test kits in order to realize highest possible food safety and food quality. | congen.de |
| Corden Biochem Berlin GmbH | |
| Corden BioChem Berlin is a development and lab scale/ early-stage production partner for biotechnologically manufactured products. Corden BioChem Berlin offers contract development and optimization of microbial processes as part of a B2B business model. In addition, the company offers small scale productions of technical, feed grade or food grade products from microbial processes for prototyping and demonstration purposes. | cordenbiochem.com |
| Creative Biosciences Europe GmbH | |
| | en.creativebio.cn |
| Cultimate Foods GmbH | |
| Cultimate Foods creates a game-changing alternative fat ingredient to bring the authentic meaty experience to plant-based products. Fat is the primary determinant of a food's flavor, taste, nutrition, and even texture. Cultimate Foods is a B2B partner in supplying cell-cultivated premium fat ingredient to the alternative meat industry to tackle this problem. | cultimatefoods.com |
| Cutaneon Skin & Hair Innovations GmbH | |
| | cutaneon.com |
| Demecan GmbH | |
| DEMECAN GmbH is a company founded in 2017 and based in Berlin, whose object is the cultivation, further processing, storage, packaging and delivery of cannabis for medical purposes. | demecan.de |
| DendroPharm GmbH | |
| Dendropharm manufactures novel excipients and nanotech drugs and offers CDMO Services – contract development and manufacturing. Using Dendropharm's proprietary technology we enable drug significant enhancement of drug penetration enhancement and bioavailability for topical and iv drugs. We offer the production of small scale batches of liquid and semisolid formulations under GMP conditions for clinical trials and production ramp up. Analytical methods: in-vitro skin penetration testing, static and dynamic light scattering, zeta potential, HPCL/ GPC, viscosimetric/reometric, high resolution GPC-light scattering methods to determine mass and radius of nanomaterials and biomaterials. | dendropharm.de |
| DexLeChem GmbH | |
| We are experts in the reactivation of complex chiral catalysts. For the first time the unmodified homogeneous catalyst can be re-used repeatedly thanks to our innovative water based process. Supported by quantum chemical analysis we are able to simulate catalytic cycles. Combined with our special knowhow this enables us to find the best solvent system for our customers. By using this new resource-efficient reaction route our customers – manufacturers of active pharmaceutical ingredients (APIs) and fragrances – gain two advantages: reduction of production costs and a more sustainable process. | dexlechem.com |
| Diaglobal GmbH | |
| Development, production and distribution of in vitro-diagnostics for analytical purpose and the distribution of medical products. | diaglobal.de |
| Diagnostic HealthCare Solutions GmbH | |
| DHS – Diagnostic HealthCare Solutions GmbH, a spin-off of the Charité, focuses on clinical performance evaluation and approval studies of medical devices for IVDR conformity. These include usability and near-patient testing of rapid antigen devices (e.g., POC) and validation studies of diagnostics kits (e.g., qPCR). We cooperate with Europe's largest CRO and have applied for ISO15189. Contract measurements, research and development projects, and scientific writing/editing services are possible. | dhs-lab.de |
| DIZG – Deutsches Institut für Zell- und Gewebersatz gGmbH | |
| DIZG is a Berlin-based manufacturer of human tissue transplants. The institute manufactures allogenic bone, skin, tendon, Fascia lata and amnion transplants. It also provides an autologous skin transplant service that is primarily focused on life-saving treatment of patients with large area severe burns. DIZG also conducts transplantation-based research and actively develops new transplants. | dizg.de |

| Dr. Rölleke Labor für Genetische Analytik GmbH | |
| Dr. Roelleke is specialized on the identification of microorganisms, particularly in the area of food safety. Furthermore, Dr. Roelleke is authorized expert on paternity tests for courts and the private sector. | dr-roelleke.de |
| DuDeChem GmbH | |
| | dudechem.com |
| E.R.D.E.-AAK-Diagnostik GmbH | |
| The laboratory is specializes in the diagnostic of agonistic autoantibodies in Dementia, DCM, Hypertension, Diabetes Typ 2, Allograft Rejection, Dialysis assoc. Diseases, Glaucoma and POTS. The laboratory has 3 validated independent test methods for the analysis of agonistic autoantibodies. Patients will benefit - at a given agonistic autoantibodies indication from personalized, specific medicamentous therapy which accounts for the autoantibodies induced malfunction of receptors. Numerous publications have described the pathological potential and prevalence of agonist autoantibodies. All publications are available on our homepage. | aak-diagnostik.de |
| Eagle Genomics Germany GmbH | |
| Eagle Genomics is a global Deep Tech software business with a location in Potsdam Science Park, Germany. Its award-winning AI-augmented knowledge discovery platform, e[datascientist], integrates and streamlines access to datasets and facilitates multi-causal analysis of multiomics data. In this way, the platform allows scientists to efficiently exploit multi-dimensional data, gaining insights in minutes rather than months. The company is also building a global knowledge partner network with key microbiome research institutions. | eaglegenomics.com |
| ElementZero Biolabs UG | |
| | elementzero.bio |
| emp BIOTECH GmbH | |
| Production of fluorescent dyes and chemiluminescent reagents. Contract chemical synthesis of small molecules. Contract labeling and purification of proteins, antibodies and oligonucleotides. Production of size-exclusion gels, columns and filter plates. Production of high quality reagents for DNA synthesis. | empbiotech.com |
| engine GmbH | |
| We provide a range of protein arrays with up to 27,648 in situ expressed proteins enabling you to perform autoantibody profiling and biomarker discovery or to explore protein/DNA/RNA-protein interactions. Our arrays can be customized to meet your needs with respect to number and type of protein as well as specific modifications thereof (e.g. citrullination). We set value on a dedicated scientific support. | engine-gmbh.de |
| EpiBlok GmbH | |
| EpiBlok was founded in 2022 as spin-off from Charité in Berlin. We develop AAV-based gene therapies for treatment of drug-resistant focal epilepsy. | epiblok.com |

| FyonBio GmbH | |
| We are the contract development organization and clinical lab spin-out from Glycotope offering >20 years of experience in developing biopharmaceuticals to customers. As ISO 9001 certified company operating in part under GCLP we provide: One-stop shop from clone development to RCB for CHO and GlycoExpress® cell lines, incl. USP and DSP process development; Excellent know-how in glycobiology, bioassay development and clinical bioanalysis (immunogenicity, PK, biomarker). | fyonbio.com |
| GA Generic Assays GmbH | |
| Development, manufacturing and distributing of in vitro-tests, focussing on autoimmune diseases, hereditary and infections diseases. | medipan.de |
| GBD Gesellschaft für Biotechnologische Diagnostik mbH | |
| GBD Gesellschaft für Biotechnologische Diagnostik mbH is an internationally active company that specializes as a virological-scientific institute in the manufacturing of customized quality control samples for virus diagnostics and other areas of laboratory diagnostics. We have been successful on the market for more than 35 years – with scientific ambition, practical know-how and very high quality standards. | gbd-biotechdia.de |
| Gematria Test Lab GmbH | |
| GEMATRIA Test Lab GmbH is an expert in free radical research. By using Electron Spin Resonance (ESR) spectroscopy we offer analytical support and claim substantiation for cosmetic, pharmaceutical and nutritional products and technologies. Peroxidation processes, antioxidant performance, selection of raw materials, shelf life prolongation of sensitive products, performance of sunscreens, penetration of actives into skin and hair and anti-pollution efficacy are examples of our broad spectrum of experience. | gematria-test-lab.com |
| GENETEK BIOPHARMA GmbH | |
| Through our production of high quality genetic diagnostic kits – for hereditary genetic diseases and chromosomal anomalies detection and our efficient Human DNA profiling kits, used in forensics and/or kinship issues, we envision a better society, bringing safety and assurance to the world we live in. | genetek-biopharma.com |
| Genosynth GmbH | |
| GenoSynth GmbH is a “Chemistry-R&D” company, which was founded by team of experienced scientists and business developers. We offer our professional expertise and services in chemical research and synthesis of organic compounds. Your partner, driving for success. | genosynth.com |
| GILUPI GmbH | |
| GILUPI is a medical diagnostics company with an initial focus on the prenatal and cancer market. The company is developing an innovative new diagnostic product based on nanotechnology. Our goal is to catch specific cells, which can be found only in very low concentration in the blood. The first application for our new nanosensor device will be prenatal diagnoses of chromosomal aberration out of maternal blood. The second application will focus on the early diagnosis of cancer. | gilupi.com |
| Glyco Universe GmbH & Co. KGaA | |
| GlycoUniverse GmbH & Co KGaA is a technology spin-off of the Max Planck Institute of Colloids and Interfaces. Registered on 10th October 2013, the company deals with the automated development and synthetic production of complex sugars and is seeking customers and collaboration with leading scientific institutes in Europe and world-wide. | glycouniverse.de |
| GLYCON Biochemicals GmbH | |
| Production of carbohydrate components used for the synthesis of new pharmaceutical compounds or diagnostics. | glycon.de |
| Glycotope GmbH | |
| Glycotope GmbH is a biotechnology company utilizing a proprietary technology platform to develop uniquely tumor-specific monoclonal antibodies. The company combines expertise in glycobiology and know-how in antibody development to advance first-in-class antibody-based therapeutics for (immuno)-oncology. Our antibodies target specific tumor-associated carbohydrate structures or protein/carbohydrate combined glyco-epitopes (GlycoTargets). Based on their superior tumor-specificity, these antibodies are suitable for development in an array of different modes of action including naked antibodies, bispecifics, antibody-drug-conjugates, cellular therapies or fusion-proteins. | glycotope.com |
| Green Elephant Biotech GmbH | |
| We are addressing biopharmaceutical production bottlenecks that limit cell and gene therapy availability. Our 3D-printed CellScrew® bioreactor offers a high-surface area solution for adherent cell cultivation with a compact footprint, solving capacity and labor issues. Our products, including plant-based 96-well plates, use polylactic acid (PLA) biopolymer, reducing the biotech industry's carbon footprint. | greenelephantbiotech.com |

| | |

| GreenGate Genomics GmbH | |
| GreenGate Genomics offers customized bioinformatic data analysis solutions focussing on microbiomes with special expertise in the environmental microbiology. We also cover complete project management from sample collection, over DNA and RNA sequencing to data analysis. Also, complete custom data analysis software and pipelines can be developed for you. | greengategenomics.com |
| GrownValve GmbH | |
| GrOwnValve develops a lifelong solution for patients with congenital heart valve diseases. The GrOwnValve-technology gives interventionists the game-changing option to treat their patients with autologous heart valves, customized to the patients need: The heart valve prosthesis can be manufactured by heart teams worldwide using a “GrOwnValve Procedure Pack” in the OR during one single procedure. In this intervention, the patient’s own pericardial tissue is 3D shaped into a customized autologous heart valve and subsequently implanted minimally invasively. | grownvalve.com |
| HAEMATO PHARM GmbH | |
| | haemato.de |
| HealthTwiSt GmbH | |
| HealthTwiSt is offering services in data science. Every step of research and development from early planning phases to final reports contains elements of statistical modeling and needs to be made reproducible. Furthermore, we provide customized seminars on basic and advanced statistical analyses as well as introductory classes in the use of R, a script language becoming increasingly the standard tool in scientific data analytics. | healthtwist.de |
| HeGo Biotec GmbH | |
| | hego-biotec.de |
| Hemafund Europe | |
| Hemafund Europe is a Cord blood bank for postnatal human cells and tissues. Our service includes collecting, processing, and storing cells and tissues required for clinical studies or treatment, and the cold chain logistics. We also offer Patients advocacy and referral service for advanced medical treatment centers. | hemafund.com |
| HM HerbaMedica GmbH | |
| | herba-medica.de |
| HS Diagnostomics GmbH | |
| We are leading experts in T-cell profiling of tissues, blood, FFPE, cryo- or DNA samples. With our TCRsafe® method we offer a world-wide unique and quantitative T-cell receptor (TCR) repertoire analysis service. Our TCanceR database is a treasure of tumor-specific TCRs which we have identified and collected since 2014 from >100 cancer samples (NSCLC, pancreas, colon, breast). With TCanceR-dB as a resource we are offering high-level contract research for industrial partners. With our sister company TheryCell we are developing a novel TCR-T therapy based on our proprietary common TCR product line TCanceR/1-4. | hsdiagnostomics.de |
| hybrotec GmbH | |
| Hybrotec GmbH is specialized in the development of monoclonal antibodies and immunoassays (preferably homogenous assays) as customs service. Our main focus lies on antibodies binding low molecular weight substances (e.g. toxins, fluorophores, hormones) as well as antibodies against novel proteins. | hybrotec.com |
| Hygiena Diagnostics GmbH | |
| Hygiena Diagnostics has been well known as a qualified partner in the field of molecular and microbiology for the last 20 years. We focus on development, production and marketing of PCR-based rapid detectionsystems. Hygiena Diagnostics offers solutions for the food and beverage industry, for the veterinary sector as well as for producers of pharmaceuticals and cosmetics. | hygiena.com |
| HyPhoX | |
| HyPhoX makes photonic integrated biosensors affordable. We combine optical, electrical, and microfluidic components in a single chip. This results in a high-performing rapid test, providing digitalized quantitative real-time data for various analytes at the same time. We offer detection capability for bacteria, viruses, and proteins in water, urine, and blood. Our technology is aimed at high-volume applications like water analysis, environmental monitoring, food diagnostics, and point-of-care. | hyphox.com |

| Ifp Institut für Produktqualität GmbH | |
| Ifp Institut für Produktqualität is an accredited and GMP-certified laboratory for state-of-the-art analyses for the food, water and pharmaceutical industry. The company functions as a competence centre for comprehensive analytical services. It also develops and produces innovative, worldwide distributed products for the detection or determination of vitamins, allergens, pathogens, GMO and other substances. | ifp-labs.com |
| IGV Institut für Getreideverarbeitung GmbH | |
| The range of services offered by the Biotechnology Division of the private research IGV GmbH institute is based on 25 years of experience in R&D for the cultivation of phototropic micro-organisms. Excellent, worldwide contacts to biomass producers, food producers, to the pharmaceutical and cosmetics and energy industry provide the fundament for innovative, market-oriented developments. In focus are development of photo bioreactor technology and active substances from algae. | igv-gmbh.de |
| IKDT – Institut Kardiologie Diagnostik und Therapie GmbH | |
| IKDT was founded in August 2002 in Berlin-Steglitz and is one of the leading laboratories on Viral Infections of Heart Muscle Tissue and Dilated Cardiomyopathy (DCM) in Germany. IKDT lab is performing a comprehensive molecular diagnostic examination of endomyocardial biopsies as one of a limited number of specialized cardiological labs worldwide. Its service enables physicians firstly to start an efficient, pathophysiologically based causal therapy. | ikdt.de |
| illumina GmbH | |
| At Illumina, our goal is to apply innovative technologies to the analysis of genetic variation and function, making studies possible that were not even imaginable just a few years ago. Illumina innovative sequencing and array technologies are fueling groundbreaking advancements in life science research, translational and consumer genomics, and molecular diagnostics. | illumina.com |
| Immutep GmbH | |
| We are global leaders in the understanding and development of therapeutics that relate to Lymphocyte Activation Gene-3 or "LAG-3" which is a cell surface molecule that plays a vital role in regulating the immune system. LAG-3 was discovered by our Chief Scientific Officer and Chief Medical Officer Dr. Frederic Triebel, putting Immutep at the forefront of immunotherapy drugs for cancer and autoimmune diseases. Our objective is to harness and strengthen the power of the body's own immune system through therapeutic intervention for the benefit of patients' health. This is how immunotherapy fights cancer and autoimmune disease. | immutep.com |
| in.vent DIAGNOSTICA GMBH | |
| in.vent DIAGNOSTICA GMBH is a biomedical company. We are focused on the project-oriented provision, processing and distribution of biological raw material for development and production of diagnostics and control material. We are your reliable partner for the customised development of assays for medical in vitro-diagnostics. | inventdiagnostica.de |
| inbion GmbH | |
| inbion GmbH provides services to support research in the interface between university, students and industry. For companies, we provide the benefit of outsourcing projects quickly and cost-efficiently to competent teams. Cooperation with research groups in the university is also facilitated, so that targeted knowledge transfer can take place here. | |
| InfectoTest GmbH | |
| | infectotest.com |
| Invicol GmbH | |
| Invicol develops a platform technology for the isolation of rare circulating cells and exosomes from the peripheral venous blood stream. The minimally invasive medical device can be coated with different antibodies to target specific antigens present on the target cells. The quantification and characterization of these cells can be used to personalize patient treatment in cardiology and oncology. | invicol.com |
| Invitek Molecular GmbH | |
| Invitek Molecular develops and commercializes tailor-made nucleic acid purification solutions that enable DNA/RNA extraction from virtually any sample material. We provide customized development and contract manufacturing services to in-vitro diagnostics companies. Our custom and industrial solutions cover all challenges from the idea up to the realization of a marketable product according to CE-IVD. We are passionate to create success for your project. | invitek.de |
| InVivo BioTech Services GmbH | |
| InVivo is a leading contract manufacturer in Europe, with 25 years of experience in mammalian cell culture and protein production. The expansive service portfolio includes monoclonal antibody production from hybridoma lines and various antibody services, plus recombinant antibody and protein production in different expression systems (HEK, CHO, E. coli). This allows maximum flexibility for every project. As ISO 9001 and ISO13485 certified company, we always aim for the highest quality standard. | invivo.de |

| IST Innuscreen GmbH | |
| Founded in 2005, IST Innuscreen GmbH specializes in the field of nucleic acid isolation and purification, molecular diagnostics including molecular biology reagents. The company offers a broad product portfolio of kits, assays and reagents - including kits and assays for PCR and qPCR/real-time PCR. Located in Berlin, the company is certified for ISO EN13485. In 2020, AJ Innuscreen GmbH was acquired by Innovative Sensor Technology IST AG and renamed IST Innuscreen GmbH. | ist-innuscreen.de |
| JPT Peptide Technologies GmbH | |
| JPT is a leading ISO 9001:2015 certified provider of custom peptides, off-the-shelf peptide products, and a trusted partner for cutting-edge research in cell therapy, immunotherapy, and diagnostics. With over 20 years of expertise, JPT has built a global reputation for innovation, offering proprietary technologies and unique peptide solutions that empower researchers and institutions worldwide. Its state-of-the-art facility in Berlin, Germany produces over 1 million peptides annually, delivering modified and specialized peptides to address the most diverse fields of application. From concept to delivery, JPT is your peptide partner. | jpt.com |
| Kairos GmbH | |
| Kairos is a renowned IT-specialist, with more than 10 years of experience in the development of IT-system solutions for the health care sector. On the basis of special knowledge in the implementation of medical middleware platforms, CentraXX was created as a multi-centric research portal combining structured research content with the modules of biobanking and study management. | kairos.de |
| kez.biosolutions GmbH | |
| kez.biosolutions GmbH is engineering biosynthesis to create new-to-nature active ingredients based on polyketides. We aim to get novel medication faster to the patients by shortening preclinical development. Contact us if you want to develop the next generation of small molecule drugs from the bioreactor together! | kez.bio |
| KNAUER Wissenschaftliche Geräte GmbH | |
| KNAUER manufactures in Berlin high-tech scientific instruments for research, routine analysis, API/protein/nucleotide purification and other applications. Supported technologies include liquid chromatography (HPLC, FPLC, SMB), precise handling and pumping of liquids up to high pressures, as well as flow-through detection of dissolved substances. Customizable products and solutions are one of KNAUER's strengths. Very important is the lipid nanoparticle (LNP) manufacturing equipment, which ranges from research scale to large scale as used in mRNA vaccine production. Since more than 60 years a passion for science is in our genes. | knauer.net |
| Kupando GmbH | |
| KUPANDO is a pioneering biopharmaceutical company developing a TLR 4/7 agonist that stimulates innate immunity. The proprietary drug candidate is ideally suited for the systemic treatment of solid tumors (tissue agnostic), the topical treatment of selected cancers (bladder and skin), the prevention of infectious diseases and as vaccine adjuvant. In oncology, our drug candidate has the potential to be used as a stand-alone treatment for solid tumors or in combination with other drugs. In vivo studies have shown so far comparable efficacy, a better safety profile and a synergistic/additive effect to checkpoint inhibitors. | kupando.com |
| Labor Berlin – Charité Vivantes GmbH | |
| Labor Berlin Services is the service subsidiary of Europe's largest hospital laboratory for clinical pathology and offers complete solutions for any kind of testing for the ivd industry, CROs, the pharmaceutical industry, life science companies and research facilities, while Labor Berlin is the exclusive laboratory partner of Charité – Universitätsmedizin Berlin and the Vivantes Network for Health. Labor Berlin and Labor Berlin Services both perform over 35 million analyses in clinical pathology per year and provide the diagnostic services for approximately 400.000 in-house patients a day and some one million out-patients per year. | laborberlin.com |
| LabTwin GmbH | |
| LabTwin is the world's first voice-activated lab assistant. With LabTwin, scientists can collect data, access information and streamline documentation simply by talking. Using voice recognition and machine learning technology, LabTwin's smart assistant simplifies data capture, structures valuable information and provides suggestions to scientists in real-time. | labtwin.com |

| Production of calibration substances for purity testing of drugs. | mikromol.de |
| LifeGlimmer GmbH | |
| LifeGlimmer is a customer-oriented contract research company providing the biotechnological, medical and environmental research communities an efficient way to outsource scientific modeling and computational needs. The SME uses its expertise in statistics, incl. machine learning and AI, to develop decision support systems and digital twins that are translated into tailored user applications. LifeGlimmer has a proven track record of managing transdisciplinary and transnational research projects | lifeglimmer.com |
| LIMAA Technologies GmbH | |
| | limaa-technologies.com |
| LIMETEC Biotechnologies GmbH | |
| The core competence lies in the development of high-speed and high-quality proof systems for the detection of pathogens, as well as in the allelic discrimination of hereditary diseases. All products are marked with the CE-Certificate. The second area of expertise is the creation of communication networks which connect outpatient and hospital patient treatments, intensify data exchange and provide information to all health institutions, thus establishing partner relationships between them. | limetec-biotechnologies.de |
| LIPIDOMIX GmbH | |
| LC/MS/MS based high trouput analytic of lipid mediators and metabolites. Analytical method development, analytical support for LC/MS/MS in life science, food safety, forensic science. | lipidomix.de |
| Lucid Genomics | |
| Lucid is mining previously undiscovered parts of human DNA to revolutionize healthcare through AI-powered solutions that translate 100% of genetic information into valuable insights for better patient care and accelerated drug discovery. | lucid-genomics.com |
| LUM GmbH | |
| LUM GmbH was founded in 1994 by Prof. Dr. Dr. Lerche as an innovative corporation with headquarters in Berlin, Germany. LUM has an office and application lab in France and 3 subsidiaries, in USA, China, Japan. Scientific and measurement technology expertise has been obtained for decades in: <ul style="list-style-type: none"> • Particle characterization • Analysis of suspensions and emulsions • Determination of adhesive and bonding strengths • Quality assurance and process optimization. | lum-gmbh.de |
| LXP Group GmbH | |
| LXP Group GmbH is active in the development, marketing and licensing of technical solutions for the recycling of plant residues under the conditions of closed carbon and mineral cycles. | lxp-group.com |
| M2-Automation GmbH | |
| We will provide you with the perfect tailored solution to your automation needs, when you choose to share in the benefits of our experience and expertise in biotechnology engineering, development and applications. | m2-automation.de |
| M2-Instruments GmbH | |
| | m2-instruments.com |
| MedInnovation GmbH | |
| MedInnovation GmbH has developed a new method and a special ESR-analyzer, which for the first time allows a simple routine laboratory test for evaluation of functional characteristics of plasma proteins. This albumin-functionality test opens a reliable possibility for cancer diagnostic as well as for disease progression monitoring of patients with liver diseases or sepsis. | medinnovation.de |
| Medipan GmbH | |
| Development, manufacturing and international distribution of radioactive (¹²⁵ J-IRMA) and non-radioactive (Elisa) in vitro-diagnostic tests, covering the field of Autoimmunity, mainly in Thyroid and Diabetes Typ 1 and automated interpretation of cell-based immunofluorescence tests by the AKLIDES system. | medipan.de |

| MerLion Pharmaceuticals GmbH | |
| The business purpose of the Company is the research, production, optimization and the development by way of pre-clinical as well as clinical trials of new molecules for the treatment of infectious diseases. | merlionpharma.com |
| Metasysx GmbH | |
| MetaSysX GmbH offers comprehensive system biology analytics. Our services ranging from metabolomics (metabolite and lipid), proteomics (targeted and un-targeted), protein-small chemical molecule interaction and validation (targeted and un-targeted) and genomic as well as transcriptomic analysis (NGS outsourced). In our laboratories, biotechnology meets the computer science and applied mathematics. | metasysx.com |
| MetrioPharm AG | |
| MetrioPharm AG is a clinical-stage biopharmaceutical development company focused on therapies for acute and chronic inflammatory diseases. MetrioPharm is developing a novel class of self-regulating immunomodulators targeting activated macrophages and inflamed tissues. MP1032 has demonstrated broad anti-inflammatory and anti-infective properties as well as an excellent safety profile in preclinical and clinical studies. MetrioPharm AG is headquartered in Zurich and has a subsidiary for R&D activities in Berlin. | metriopharm.com |
| mfd Diagnostics GmbH | |
| The mfd Diagnostics GmbH (BT Luckenwalde) is a life science research and development company for diagnostic and therapeutic application of innovative laser technologies. The main advantages of the developed technologies are the non-/minimally-invasive measurement methods, the non-artificial approach and the possibility of real-time measurement. Therefore, those are promising tools for the diagnosis and therapy monitoring in the neurological practice and in the perinatal surveillance. | mfd-diagnostics.com |
| MGI Tech GmbH | |
| | mgi-tech.eu |
| micro resist technology GmbH | |
| We are a leading company in the development and production of innovative photoresists, polymers and photopolymers as well as complementary process chemicals for lithographic manufacturing processes in micro- and nanostructuring. We offer materials for key technologies such as microsystems technology, photonics, micro- and nanotechnology, nanoimprinting as well as life sciences, micro fluidics and 3D-printing. As a company actively performing R&D in these fields we are interested in cooperation. | microresist.de |
| MicroDiscovery GmbH | |
| MicroDiscovery GmbH is a leading provider of high quality software for biomolecular research, innovative diagnostics and personalised medicine. The Company also develops hardware tools in the area of innovative diagnostics, biomedical research and personalized medicine. MicroDiscovery GmbH is ISO 9001 certified by TÜV Rheinland and has a strong track record in creating software systems in accordance with relevant regulatory directives for the life science and IVD industry. Customised services ranging from biostatistical data analysis to bioinformatical design and support of complex research projects complete the product line of MicroDiscovery. | microdiscovery.de |
| microParticles GmbH | |
| Development, manufacture, surface modification and characterization of mono-disperse polymer particles in the nano- and micrometer range. In addition to classic polystyrol and polyacrylate-based polymer particles, microparticles GmbH has launched new melamine resin particles on the market with exceptional chemical and physical qualities. The main areas of application are in particle measurement technology, medicine, biochemistry and microelectronics etc. | microparticles.de |
| MiGenTra GmbH | |
| MiGenTra was founded in 2021 by ProBioGen and Minapharm Pharmaceuticals for the development and commercialization of high quality affordable biologic medicines in the field of Biosimilars, Cell- and Gene Therapies (CGT) and Vaccines to serve the needs of patients across Africa and the Middle East. MiGenTra is leveraging the strong development and manufacturing capabilities of parent companies ProBioGen and Minapharm as well as on the excellent market position of Minapharm in the region. | migentra.com |
| Mimi-Q GmbH | |
| | mimi-q.com |
| Minerva Analytix GmbH | |
| Minerva Analytix GmbH is a leading analytical service lab for the control of microbial contamination. Our core competence lies in the control of mycoplasma, bacteria and viruses in cell cultures and biopharmaceuticals. | minerva-analytix.com |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|
| Minerva Biolabs GmbH | |
| Minerva Biolabs develops and manufactures detection and elimination kits for microbial contamination control, specializing in mycoplasma detection in cell cultures and biopharmaceuticals using PCR methods. Innovative products for the quality control of biopharmaceuticals/ATMPs, such as residual DNA testing, vector copy number and viral titer determination as well as pyrogen testing round off the portfolio. | minerva-biolabs.com |
| MLB Mikrobiologisches Labor GmbH | |
| Accredited test laboratory for drinking water, clean rooms, sterility, bioburdens, D-PL-13398-01-00, EN 17025. Accreditation according to VDI 6022. | mlb-mikroberlin.de |
| MoKi-Analytics GmbH | |
| MoKi Analytics GmbH offers services and products for the molecular detection of microorganisms using FISH (Fluorescence in situ hybridization). Our expertise is the sensitive and specific visualization and quantification of microbial biofilms in tissue samples and in vitro models. This includes measurement of the effectiveness of antimicrobial substances against biofilms, for example on coated implants or medical surfaces. | moki-analytics.com |
| Molnar Institut für angewandte Chromatographie | |
| Founded in 1981, Molnár-Institute develops DryLab®, a software for sophisticated U(H)PLC method development. Analytical scientists use it to model chromatographic interactions, retention times, robustness while conforming to QbD standards. Being registered vendor to US FDA, CDC, and other agencies, Molnár and DryLab® have pioneered Analytical Quality by Design long before regulatory agencies worldwide encouraged QbD submissions. Widely implemented among thought leaders, DryLab® contributes substantially to the paradigm shift towards a science-based perspective on HPLC quality management. | molnar-institute.com |
| moloX GmbH | |
| moloX GmbH is a company focusing on custom protein production in bacterial and insect cell expression systems and subsequent protein purification to ultra-high purity. On customer demand a team of experts can perform protein crystallization experiments and determine the 3D structure of target proteins by X-ray crystallography. | moloX.de |
| MolTech Molekular Technology GmbH | |
| | mt-berlin.de |
| MRI.TOOLS GmbH | |
| MRI.TOOLS's main focus is the development, sales and services of innovative hardware and novel technology for magnetic resonance imaging (MRI), computed tomography (CT) and positron emission tomography (PET). Our product portfolio encompasses enabling radiofrequency (RF) coils tailored for a broad range of applications, devices designed for reliable cardiac gating of imaging plus accessories that will make your daily life more comfortable. MRI.TOOLS is also very proud to offer consulting services such as validation and certification of medical devices. | mritools.de |
| MucosaTec GmbH | |
| | mucosatec.eu |
| Myelo Therapeutics GmbH | |
| Myelo Therapeutics GmbH is a clinical-stage pharmaceutical company focused on developing medical countermeasures (MCM) and therapies in cancer supportive care. It closely collaborates with the U.S. National Institute of Allergy and Infectious Diseases / National Institutes of Health and European Institutions to advance MCMs against radiological and nuclear threats. Its lead candidate is a clinical-stage small molecule technology in development as adjuvant cancer therapy for the treatment of radio-/ chemotherapy myelosuppression and medical countermeasure for acute radiation syndrome. | myelotherapeutics.com |
| MyoPax GmbH | |
| Leveraging proprietary muscle stem cell technology, MyoPax is transforming muscle disorders. Our portfolio includes tailored regenerative stem cell therapies (+/- gene editing) to address muscle defects, genetic muscular dystrophies, and acute muscle wasting. MyoPax is a spin-off of the Charité University and the Max-Delbrueck-Center/Helmholtz Association. | myopax.com |
| Nanalytics GmbH | |
| We are a contract laboratory specializing in the physico-chemical characterization of pharmaceutical proteins, biopolymers, nanoparticles and colloidal systems. Our core-competences are Analytical Ultracentrifugation, in combination with Static and Dynamic Light Scattering as well as spectroscopic (CD, fluorescence) and thermodynamic techniques (ITC, DSC). | nanalytics.com |
| Nanalytics Instruments GmbH | |
| Nanalytics Instruments has emerged from Nanalytics, a company committed to analytical services on nanoparticles and macromolecules, both synthetic and biological. Analytical Ultracentrifugation has been Nanalytics' core competence from the start in 1999. | nanalytics-instruments.com |

| new/era/mabs GmbH | |
| new/era/mabs GmbH provides all-round solutions for the generation and characterization of murine, camelid and human antibodies. The company offers a highly effective immunization and selection platform in order to combine antibody generation with a very early validation directly after fusion. The system allows the selection of antibody producing hybridomas 4times faster than with conventional hybridoma technology. With a world-wide patent-pending system we are now looking for reliable and competent business partners to market our platform and cell lines. The team of new/era/mabs provide an excellent background in antibody generation and characterization and is highly motivated to support your customized development. | neweramabs.com |
| Nosh.bio GmbH | |
| | nosh.bio |
| Nostos Genomics GmbH | |
| Nostos Genomics offers a platform AION, that analyzes a person's DNA in less than 2 minutes to identify clinically relevant genetic variants. This enables genetic testing labs and physicians to gain actionable insights for their patients. It solves the bottleneck of hours of manual analysis of genetic data, the biggest obstacle to using this information for routine medical care. | nostos-genomics.com |
| NovaBiotec Dr. Fechter GmbH | |
| NovaBiotec Dr. Fechter GmbH is a planning and engineering office that specializes in examining buildings for biological and physical contaminants as well as chemical indoor pollutants, such as mold, dry rot, VOC, SVOC, MVOC, asbestos, PAH etc. By analyzing material, dust and room air samples, we detect contamination sources and the interior hygienic status. NovaBiotec also offers hygienic analyses and inspections for ventilation and air-conditioning systems. | novabiotec.de |
| Novozymes Berlin GmbH | |
| ORGANOBALANCE is specialized in the research and development of the natural diversity of microorganisms. We explore the huge potential of microorganisms for the development of innovative and natural products. | organobalance.de |
| OakLabs Scientific GmbH | |
| OakLabs provides the most flexible products and services for large scale custom SNP genotyping on the market. OakLabs offers several formats for analysing a variable number of SNPs in any sequenced organism. | oaklabs.de |
| Octapharma Berlin | |
| Octapharma is the largest privately owned and independent plasma fractionator in the world. We develop and manufacture medicines for patients in the therapeutic area's haematology, immunotherapy and critical care. We focus our R&D efforts on disease areas showing significant need for better treatment options and where we believe our skills will help us achieve our vision of providing new health solutions advancing human life. | octapharma.de |
| OctreoPharm Sciences GmbH | |
| OctreoPharm Sciences GmbH is a clinical development company focusing on diagnostic radiopharmaceuticals. | ipsen.com |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|
| Omeicos Therapeutics GmbH | |
| OMEICOS as a clinical stage company has industry-leading knowledge of omega-3 fatty acid metabolism and biology. Our small molecule compounds target one of nature's most important cell-protective pathways. Our lead compound OMT-28 proved its excellent safety and tolerability profile in Phase I and II in patients with Atrial Fibrillation. In addition, the clinical Phase II data demonstrated OMT-28's significant positive and broad effect on a number of important inflammatory and mitochondrial dysfunction biomarkers. OMEICOS focus' on developing therapies that have the potential for a significant impact on cardiovascular, inflammatory and mitochondrial diseases with high unmet need. | omeicos.com |
| Omiqa Bioinformatics GmbH | |
| Omiqa offers comprehensive bioinformatics services tailored to a wide range of requirements. Our expertise enables us to provide in-depth biological insights for fundamental and translational research, enhance and facilitate various industrial applications and develop customised desktop and web-based software that streamlines and supports your projects. | omiqa.bio |
| opTricon GmbH | |
| opTricon develops the devices in partnership with the customers and works as OEM-suppliers and is certified by TÜV Rheinland according EN ISO 13485:2003+AC: 2007 and EN ISO 9001:2008. | optricon.de |
| Orbion GmbH | |
| | orbion.life |
| Pacira Germany GmbH | |
| Pacira is a biotech company focused on the development of innovative gene therapies for treatment of musculoskeletal disorders. Pacira uses its unique gene therapy platform to establish sustained production of therapeutic proteins locally in the tissues or organs where they are needed. Currently, Pacira is developing disease-modifying gene therapies for osteoarthritis and intervertebral disc degeneration – both indications for which currently only symptomatic medical treatments are available. Pacira is headquartered in Hamburg, Germany and has sites in Luckenwalde (Brandenburg), Germany and Liège, Belgium. | gq-biotx.com |
| Pantherna Therapeutics GmbH | |
| Pantherna Therapeutics GmbH develops novel first-in-class therapies based on mRNA for indications with high medical need. Pantherna's therapeutic programs are based on two innovative and proprietary platform technologies, the mRNA expression constructs (PTXmRNA®) and necessary lipid nanoparticles (PTXΔLNP®) for cell type-specific expression of therapeutic proteins. PAN004 is Pantherna's first development candidate to emerge from this platform and represents a defined mRNA-LNP formulation for the selective mRNA expression of a Tie2 agonist in the vascular endothelium of pulmonary capillaries. Pantherna is pursuing the development of a pipeline of novel mRNA-LNP candidates that will enable the therapeutic use of mRNA in various tissues and cell types. | pantherna-therapeutics.com |
| Pentixapharm AG | |
| Pentixapharm is a clinical-stage biotech company developing novel targeted radiopharmaceuticals with offices in Berlin and Würzburg, Germany. It focuses on first-in-class radiopharmaceuticals with strong differentiation and commercialization potential in high-need diagnostic and therapeutic areas. Its pipeline includes CXCR4-targeted peptides in clinical development and early-stage radionuclide-antibody conjugates for precision oncology in hematologic malignancies and solid tumors. | pantherna-therapeutics.com |
| peptides & elephants GmbH | |
| Since more than 20 years peptides&elephants is the trusted partner of immunologic researchers. Using its proprietary USPS® Technology's peptides&elephants is producing in Germany tailor made and off the shelf -peptide libraries and peptide pools for immunologic research and modern vaccine development. | pentixapharm.com |
| PerformaNat GmbH | |
| PerformaNat develops novel feed additives for improved animal health with a focus on prevention of gastrointestinal diseases and metabolic disorders as well as boosting the immune system. PerformaNat's competitive advantage is based on a unique technology platform for identification and characterization of novel active ingredients. | performanat.de |
| PharmACT AG | |
| | |
| PharmaSol GmbH | |
| Modification of ingredients or introduction of new metabolic pathways in plants with gene-technology methods. | pharmasol-berlin.de |
| Pheiron GmbH | |
| Pheiron uses AI and data at population-scale to bring drugs to patients faster and with a higher probability of success. We are building a data-driven, quantitative map of human disease to navigate early R&D with actionable evidence from real-world individuals. | pheiron.com |

| | |

| Pluri Biotech | pluri-biotech.com |
| PolyAn GmbH | poly-an.de |
| PolyAn is a nanotechnology company specialized in the modification of surfaces using Molecular Surface Engineering (MSE). Since 1996 PolyAn develops and manufactures consumables for multiplex diagnostics and LifeScience research. Key product families are functionalized slides & coverslips for microarrays, fluorescent multiplex microparticles (beads) and reactive microplates for immunoassays. | |
| PRAMOMOLECULAR GmbH | pramomolecular.com |
| PRAMOMOLECULAR, a spin-off of the Technische Universität Berlin, is developing drug candidates for gene silencing through RNAi. Our lipid-based, covalent delivery technology enables efficient silencing in lung and pancreas with self-delivering siRNAs. PRAMO's therapeutic focus is on cancers with mutated RAS proteins as oncogenic drivers. | |
| Precision for Medicine GmbH | precisionformedicine.com |
| Precision Medicine Group is an integrated team of experts in fields from advanced lab sciences to translational informatics, clinical trial delivery, and regulatory affairs, payer insights to marketing communications. Together, we help our pharmaceutical and life-sciences clients conquer product development and commercialization challenges in a rapidly evolving environment. | |
| preclinics Gesellschaft für präklinische Forschung mbH | preclinics-pcp.com |
| preclinics certified products GmbH (pcp) is a subsidiary of preclinics GmbH. We offer tailored development services through the whole process from antigen to antibody. Our focus is the production of customized virus-like particles for the use as reference material or as antigen for immunizations. We are experts in the generation of immune or naïve cDNA libraries for NGS or subcloning into display systems. In addition, pcp produces recombinant proteins and antibodies in various formats (IgG/VHH). | |
| Predemtec AG | predemtecdx.com |
| ProBioGen AG | probiogen.de |
| ProBioGen is a Contract Development and Manufacturing Organization (CDMO) and Technology Provider, with extensive expertise in cell line engineering, process development (upstream- and downstream process) and GMP manufacturing of biopharmaceuticals. Offering state-of-the-art contract development and manufacturing services as well as access to proprietary cell lines (AGE1.cell lines) for the manufacturing of biopharmaceuticals and vaccines. The company possesses the manufacturing authorization from the competent authority and meets the quality standards required by the EMA and the FDA guidelines. | |
| PROSION Therapeutics GmbH | proSION.eu |
| PROSION Therapeutics pioneered the first approach capable of disrupting the most common communication between disease relevant proteins, making many notorious undruggable targets finally druggable. They call it the ProM technology - a new modality capable of combining the advantages of small molecules and biologics to engage complex intracellular targets with high specificity. | |
| Proteome Factory AG | proteome-factory.com |
| Biomarker & target discovery, validation, analysis of food and ingredients, absolute quantification of proteins and peptides, sequencing and characterization of proteins and antibodies (CDR), 2DE and LC-MS based proteomics studies, pharmacokinetics, pharmaco, immuno and membrane proteomics, protein identification, characterization of proteins and peptides (PTMs, e.g. phosphorylation, glycosilation), quality control, mass determination, N-terminal amino acid sequencing, silver staining kit etc. | |
| provitro AG | provitro.de |
| Provitro stands for more than ten years of experience in commercialisation of cell culture technologies, tissue microarrays and immunohistochemical analyses backed up by scientific knowledge at the Pathological Institute of the Charité, Berlin. Based on our quality management system certified according to ISO 9001 and ISO 13485, we are prepared to provide our customers not only with high-quality products and state-of-the-art services but also with individual solutions for their specific needs. | |
| QMEDIS Analytics GmbH | qmedisanalytics.com |
| QMEDIS Analytics GmbH is an independent, private contract laboratory. We offer a wide range of analytical and galenic services as well as regulatory support for the pharma, medical technology, cosmetics and food industries. Our expertise includes medicinal products with chemically defined active substances, herbal preparations (with a focus on cannabis), novel and innovative drug formulations (using 2D printing technologies) and modern analysis techniques. | |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------|
| Quantistry GmbH | |
| Quantistry provides an intuitive and cloud-based computational chemistry platform for highly innovative chemical and material research and development. Using quantum simulations, molecular dynamics and machine learning, our platform is based on a powerful combination of cutting-edge methods that enable our customers to develop better products, such as novel materials or new pharmaceutical ingredients, in less time. | quantistry.com |

| Remi Health GmbH | |
| | myremi.com |
| RIPAC-Labor GmbH | |
| RIPAC-LABOR offers high-quality diagnoses of bacterial infections, particularly in poultry, pigs and cattle, but also in other farm and domestic animals. The company uses pathogen differentiation to provide quick and effective methods for fighting pathogens. It performs resistance tests and epidemiological analyses and also focuses on producing herd-specific vaccines. | ripac-labor.de |
| Roboklon GmbH | |
| Distribution, Marketing and Development of Products for Molecular Biological Research and Genetic Engineering. | roboklon.com |
| ROVALAB | |
| Our Master Mixes for QPCR, Standard-, Hot Start- and High Fidelity PCR as well as our high quality critical raw materials and reagents such as DNA Polymerases and dNTPs are designed to help you successfully and rapidly solve your scientific and manufacturing tasks. | rovalab.com |
| SAFIA Technologies GmbH | |
| SAFIA aims to revolutionize modern laboratory analytics in food safety and human diagnostics with its innovative rapid test. Conventional methods are either complicated and expensive or only detect a single parameter. The SAFIA technology uses an antibody-based and patented particle platform that enables the efficient and accurate detection of multiple parameters simultaneously, without relying on complex equipment or highly qualified personnel. | safia.tech |
| Sanity Group GmbH | |
| Sanity Group is a Berlin based health and life-science company, founded in 2018 by Finn Age Hänsel and Fabian Friede. The company's goal is to improve people's quality of life through the sensible use of cannabinoids and the utilization of the endocannabinoid system. One the one hand, Sanity Group is actively developing and researching innovative pharmaceuticals and medical products (Sanity Medical). In parallel, the focus is also on cannabinoid-based consumer goods (Sanity Care). The mission is to build the leading cannabinoid company for medicinal cannabis and consumer health in Europe. | sanitygroup.com |
| scalable minds GmbH | |
| Scalable Minds develops software to manage, visualize, and process multi-terabyte 3D image datasets for Neuroscience, Cell Biology, Geology and Material Sciences. | scalableminds.com |
| SCIENION GmbH | |
| SCIENION is the leading manufacturer of high performance instruments for applications requiring precise deposition of biological content in low volumes. Our technology is ideally suited for loading of oligos, proteins, antibodies, and glycans onto diagnostics devices. Easy scale up is possible thanks to the same core technology engineered in all systems. We have recently developed a breakthrough technology allowing high throughput isolation of single cells. | scienion.com |

| SciPharma Informatics GmbH | |
| SciPharma Informatics specializes in Laboratory Informatics and is dedicated to facilitating the digital transformation of laboratories within the Pharma, Biotech, Life Science, and Healthcare sectors. Our unique strength lies in our dual expertise: a deep understanding of the business processes specific to these industries and a mastery of Informatics solutions for digitalizing and automating processes and data generated within laboratories. We are dedicated to enabling laboratories across the globe to effortlessly incorporate state-of-the-art technologies, simplify workflows, and fully harness the power of data-driven decision-making. Our pledge is to champion excellence, elevate research results, and influence the trajectory of scientific exploration through revolutionary digital solutions. | scipharmainformatics.com |
| selekt-ID BIOLABS GmbH | |
| The selekt ID Biolabs is a molecular biology service laboratory. The portfolio includes several PCR-based techniques detection methods: The core product is the identification of microorganisms (bacteria, yeasts, fungi) by sequence comparison of 16S respectively. Will also offer the detection of animal species in meat products and, as GMO analysis and detection of allergens. | selekt-id.de |
| SEPIAtec GmbH | |
| Sepiatec GmbH develops separation systems based on high-performance liquid chromatography (HPLC) and supercritical fluid chromatography (SFC) technology, enabling our customers to speed up their separation and method development significantly. Sepiatec systems are used around the world by major pharmaceutical and biotechnology companies as well as by numerous research institutes. | sepiatec.com |
| SERAMUN Diagnostica GmbH | |
| Seramun Diagnostica GmbH is a leading substrate- and reagent producer in Europe. Its product range covers in vitro-diagnostics (IVD) for infectious, autoimmune and rheumatic diseases (e.g. Serazym®, SeraLine®, SeraSpot®) as well as vaccines purity testing solutions by ELISA and diagnostic tools (e.g. software, automation systems). Customized solutions cover protein and antibody development and purification, but also conjugation and labelling of antibodies to different dyes. | seramun.com |
| Serana Europe GmbH | |
| Serana is a leading manufacturer of cell culture supplies. Our product range includes serum, media, reagents, supplements, and buffer solutions designed for various cell culture applications. Serana's products are used in all areas where cell culture is performed. This includes supplying both the pharmaceutical industry and research organizations. Serana is ISO 13485, 9001 and EDQM certified. | serana-europe.com |

| Solaga UG | |
| Solaga UG develops living wall elements with microalgae biofilms for sustainable improvement of indoor and outdoor air. These biofilms are used in various systems. In addition to self-sufficient images, which can be used for private air purification, we also produce water walls with integrated algae and cultivate entire house facades for biological air purification on a large scale. | solaga.de |
| SOPAT GmbH | |
| SOPAT is specialized in the analysis of particulate systems. The company develops and markets an innovative particle measurement technology consists of a tailor made SOPAT probe and innovative SOPAT software for real-time analysis of multi-phase systems. Particles, such as droplets, grains, cells or bubbles, are measured with high precision inline and in situ in running processes. | sopat.de |
| SphingoTec GmbH | |
| SphingoTec GmbH develops innovative biomarkers for diagnosis, prediction and monitoring of acute medical conditions, such as acute heart failure, acute kidney injury and circulatory shock, in order to support patient management and provide guidance for treatment strategies. | sphingotec.com |
| Squilline Health GmbH | |
| | squilline.com |
| SunCoal Industries GmbH | |
| SunCoal develops and commercializes high-value carbon products like technical carbon, bio-based platform chemicals or biofuels using hydrothermal treatment technology for biomass. In addition, SunCoal offers an innovative technical solution for the dewatering of organic sludges. | suncoal.com |
| Surflay Nanotec GmbH | |
| Surflay Nanotec GmbH is specialized on coating colloidal and planar materials with functional polymer films of nanometer thickness by the LbL-Technology®. Applications are in biofunctionalization, bio-sensing, diagnostic particles and encapsulation/controlled release of active ingredients. Surflay offers an unique range of customized multifunctional nanoparticles especially for Lateral Flow Assays as well as sensor-microparticles and fluorescence-labeled polymers. | surflay.com |
| Synexa Life Sciences GmbH | |
| Synexa Life Sciences is a global provider of biomarker and bioanalytical services, specialising in the development, validation and delivery of a wide range of complex and custom-designed assays. We provide innovative solutions to support our customers to achieve their milestones. Our main areas of expertise include biomarker identification and development, clinical bioanalysis, soluble biomarker analysis, cell biology and genomic services to support clinical trials and translational studies. | synexagroup.com |
| Tacalyx GmbH | |
| Tacalyx, a spin-off from the MPICl, Potsdam, focuses on Tumor-Associated Carbohydrate Antigens (TACAs) as novel target class for cancer treatment. The highly tumor-specific expression of TACAs promotes metastasis, angiogenesis, and suppression of the immune system. Tacalyx uses sophisticated technology to synthesize highly pure TACA structures for the generation and identification of antibodies that will be developed into novel therapeutics for the treatment of cancer. | tacalyx.com |
| Targenomix GmbH | |
| Targenomix GmbH is a startup company with core competences in computational and systems biology, quantitative and molecular genetics, cell biology and biochemistry. One of the main research fields is the identification of interactions between molecular targets and small molecules. | targenomix.com |
| tcbalance Biopharmaceuticals GmbH | |
| | tcbalance-biopharma.com |
| Thanares GmbH | |
| Development, use and marketing of analytical process for diagnostic and therapeutic purposes. Future business activities: detection process for bioactive substances in bodily fluids, isolation, characterization and investigation of bioactive compounds from plants, in particular insoluble proteins or low concentrations of proteins, development of low cost genetic systems for over-expression and/or production of such proteins. | thanares.com |
| The smart period blood GmbH | |
| Theblood is leading a radical shift in the European health tech sector, pioneering innovative menstrual blood testing technology that's revolutionizing women's health. Their cutting-edge approach, offering unparalleled insights into women's well-being, is a game-changer for the industry, healthcare system and its patients. Aspiring to be the foremost worldwide data platform, aggregating a diverse range of health metrics to drive groundbreaking research and empower women globally. | theblood.io |

|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|
| Thermo Fisher Scientific Clinical Diagnostics | |
| Thermo Scientific Biomarkers (B·R·A·H·M·S GmbH) explores, develops and produces new diagnostic test procedures to improve the diagnosis, and thereby the treatment, of life-threatening illnesses. This takes place with over 470 employees, in the disease areas infectiology, cardiology and pneumology as well as thyroid, autoimmunity and cardiology on the basis of our own patented biomarkers. Since October 2009 B·R·A·H·M·S GmbH is part of Thermo Fisher Scientific Inc. (NYSE: TMO), the world leader in serving science. | thermoscientific.com/brahms |
| Therycell GmbH | |
| Development of a novel, individual and affordable TCR-T therapy of solid tumors is the central goal at Thery-Cell. We are employing single-cell and deep sequencing of T-cells as a toolbox to establish a novel and individual TCR-T therapy. We are experts in TCR cloning by non-viral TCR transfection (Sleeping-Beauty) and are providing full TCR-cloning services to our customers. Together with our sister company HS Diagnostics we offer complex contract research projects in almost all fields of TCR-T therapy and antigen research. Our special focus is on development of fully synthetic TCR transfection technologies to bring TCR-T therapy prices down to the range of conventional tumor therapies. | therycell.com |
| TIB MOLBIOL-Syntheselabor Berlin | |
| In 1990, TIB MOLBIOL became the first German manufacturer of oligonucleotides. In addition to designing and synthesizing primers and probes for Real-Time PCR assays, we develop and produce LightMix® Kits for Roche Diagnostics LightCycler® Instruments, covering applications in Clinical Chemistry, Pharmacogenetics, Pathogen Detection, as well as Cancer Research. TIB MOLBIOL is ISO 13485 and ISO 9001 certified. | tib-molbiol.com |
| Tilray Deutschland GmbH | |
| Tilray Germany is a GMP-certified manufacturer of medical cannabis and supplies patients, doctors, pharmacies, hospitals, authorities and researchers in Canada, the European Union, Australia and Latin America. | tilray.de |
| TissUse GmbH | |
| TissUse is a Berlin, Germany-based, biotechnology company who has developed a unique "Multi-Organ-Chip" platform for advanced toxicity testing and cutting-edge disease modelling. TissUse's HUMIMIC Chips provide a completely new approach to predict, for example, toxicity, ADME profiles and efficacy in vitro, reducing and replacing laboratory animal testing and streamlining human clinical trials. | tissuse.com |
| T-Knife GmbH | |
| T-Knife GmbH is a spin-off of the MDC, which develops T-cell therapeutics for clinical application. The company has acquired extensive licensing rights from the MDC, including a technology platform for the generation of cancer-specific receptors, various receptors and the rights to the clinical phase 1 study. | t-knife.com |
| TME Pharma AG | |
| NOXXON Pharma is a biopharmaceutical company pioneering the development of a new class of proprietary therapeutics called Spiegelmers. Spiegelmers are the chemically synthesized, non-immunogenic alternative to antibodies. NOXXON has a diversified portfolio of clinical stage Spiegelmer therapeutics: Spiegelmer® NOX-E36, Spiegelmer® NOX-A12, Spiegelmer® NOX-H94. The Spiegelmer platform provides the Company with powerful and unique discovery capabilities, which have generated a number of additional leads under preclinical investigation. | noxxon.com |
| TransTissue Technologies GmbH | |
| TransTissue has been a subsidiary of BioTissue Technologies, Freiburg since September 2001. With more than 15 years of experience in regenerative medicine, the scientists of TransTissue Technologies have developed second-generation autologous tissue replacements, e.g. cartilage and bone grafts. We are mainly concerned with inventions and the development of tissue engineering products for regenerative medicine. We offer a broad panel of services in the field of regenerative medicine. | transtissue.com |
| Treamid GmbH | |
| Treamid GmbH develops innovative treatments in areas of high unmet medical needs. Our patent protected, preclinical lead compounds are developed in endocrinology and respiratory diseases. | treamid.com |
| UBF – Untersuchungs-, Beratungs- und Forschungslaboratorium GmbH | |
| UBF – Untersuchungs-, Beratungs- und Forschungslaboratorium GmbH is a biotechnology company active in the field of analysis, consulting and research. | ubf-research.com |
| UGA Biopharma GmbH | |
| UGA Biopharma, a private Research and Development company, focuses on Research, Development and Commercialization of Biopharmaceutical products under contract with other Biopharmaceutical companies. UGA Biopharma conducts power of biosciences to develop high-tech, last generation of biomedicine, diagnostic kits, molecular biology items and also offers world class services in biotechnology area. | ugabiopharma.com |

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------|
| VaRi Bioscience GmbH | |
| VaRi Bioscience is a biotech company focusing on women's health. We develop innovative products for women with a focus on menopause management, endometriosis, and contraception, based on a proprietary vaginal ring technology. VaRi Bioscience was founded in August 2021 by a team of experts with many years of experience in female health, gained in leading female health companies in the past. We are situated in Wildau, directly at the borders of Berlin. | vari-bioscience.com |
| WITEGA Laboratorien Berlin-Adlershof GmbH | |
| WITEGA Laboratorien Berlin-Adlershof GmbH is a medium-sized company specializing in the realization of organic customer syntheses. Our customers are companies from the chemical and pharmaceutical industries as well as from other technology fields. The main focus of our activities is the lab-scale custom synthesis of organic building blocks, intermediates and target structures and of isotope-labeled compounds (D, 13C, 15N) for chemical and pharmaceutical research and development. The company is also a supplier of analytical standards for residue analysis (especially in veterinary medicine). | auftragssynthese.com |
| Xitra Therapeutics GmbH | |
| Xitra Therapeutics focuses on the discovery and development of small molecules targeting Mas and MrgD, two receptors within the beneficial arm of the Renin Angiotensin System. These compounds mimic the effects of the natural peptide angiotensin-(1-7), while providing superior properties such as greater potency and oral bioavailability. Xitra's mission is to develop transformative treatments for life-threatening pediatric diseases, including congenital muscular dystrophy and epidermolysis bullosa. | xitratherapeutics.com |
| xolo GmbH | |
| Xolo enhances 3D printing with Xolography, achieving rapid production speeds, completing prints in seconds to minutes with resolutions down to 5 µm. Ideal for healthcare and bioprinting, Xolo enables the creation of customized medical devices and high-precision biological models tailored to specific clinical needs. | xolo3d.com |
| Yashraj Biotechnology GmbH | |
| Yashraj Biotechnology GmbH (YBL) is part of Yashraj group, India. YBL manufactures a wide range of bio-markers in the form of native human & recombinant antigens that are used by the diagnostic industry as controls, calibrators & immunogens. YBL has been the preferred partner of most of the top 20 diagnostic companies around the world for the past 20 years. We seek partnerships with IVD companies to support their needs of different native human, recombinant antigens, monoclonal & polyclonal antibodies. | yashraj.com |
| ZEG Berlin Center for Epidemiology and Health Research (Teil der Cerner Enviza) | |
| ZEG Berlin is at the forefront of pharmacoepidemiology research, specializing in the early detection and quantification of safety risks associated with the use of therapeutic, preventative or diagnostic drugs. In 2021, they included also a division for Real-World Evidence (RWE) and Safety Data Analytics. Areas of focus include Epidemiology, Health Economics and Outcomes Research (HEOR), and Safety, as well as a broad range of therapy areas. | zeg-berlin.de |
| Zellwerk GmbH | |
| Zellwerk holds manufacturing license for immune cell therapeutics. We are specialized on mass production of patient-individual T-cells, TIL, NK cells and mesenchymal stem cells using proprietary ZRP cell cultivation system and belonging perfusion bioreactors. The ZRP cell cultivation technology enables standardized and reproducible cultivation processing in a highly sterile environment. The ZRP bioreactors are also well suited for cell seeded implants as well as for production of recombinant glycoproteins on customized cell carriers. | zellwerk.biz |
| Zytomed Systems GmbH | |
| Zytomed Systems' focus is the development, production and distribution of antibodies and detection systems for immunohistochemical cancer diagnostics as well as reagents and kits for in-situ hybridisation. | zytomed-systems.de |

Medtech and Digital Health Companies

1000shapes GmbH

| | | |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|
| Digital Health | We develop software solutions for creating products that better fit humans. We convert image data into highly accurate 3D anatomical models and provide tailored solutions that improve the design and manufacturing of medical devices and facilitate individualized pre-operative planning of surgical interventions. | 1000shapes.com |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|

3M Health Information Systems GmbH

| | | |

aap Implantate AG

| | | |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
| Medtech | aap is a Berlin-based globally active medical device company developing, manufacturing and marketing products for trauma. The IP-protected portfolio includes besides the innovative anatomical plating system LOQTEQ®, a wide range of cannulated screws. In addition, aap has an innovation pipeline with promising development projects as the antibacterial silver coating technology and the resorbable magnesium implants technology. | aap.de |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|

aap Joints GmbH

| | | |
|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|
| Medtech | aap Joints GmbH is a Berlin based medical technology manufacturer that designs, develops, manufactures and distributes orthopaedic implants and related instruments. Its product portfolio includes primary and revision hip and knee implants that help patients worldwide to relieve pain, restructure mobility and improve quality of life. | aap-joints.com |
|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|

Ada Health GmbH

| | | |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| Digital Health | Ada Health GmbH is a global health company founded by doctors, scientists, and industry pioneers to create new possibilities for personal health. Ada's core system connects medical knowledge with intelligent technology to help all people actively manage their health and medical professionals to deliver effective care. | ada.com/de |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|

Advosense GmbH

| | | |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------|
| Medtech | Advosense is on a mission to transform geriatric care, starting with incontinence management. We are empowering clinicians to know when, where and how to best respond to their patient's needs by using intelligent sensors to do so. The Sensa System is a bedside sensor system and IoT platform. The system detects patients and resident's incontinence episodes providing real-time notifications to their caregivers so they can be cared for and managed effectively in hospitals and nursing homes. Sensa not only provides empathic, quality care but helps our clinicians in a resource constrained, episodic environment; reducing costs, increasing the quality of life for our patients, families and caregivers, and ultimately advocating for an age friendly, healthy society. | advosense.com |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------|

AEMtec GmbH

| | | |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| Medtech | AEMtec, located in the prestigious science and technology center in Berlin-Adlershof, is a global acting specialist for the development and production of a variety of precision optoelectronic products, including components, subsystems, modules and complete systems. With our wide range of technologies we are the right partner for sophisticated solutions in the area of miniaturization. | aemtec.com |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|

aicura medical GmbH

| | | |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|
| Digital Health | AICURA is a building block to transform our healthcare systems to provide personalized medicine for everybody, everywhere. The AICURA Platform accelerates the development and usage of Artificial Intelligence in healthcare and allows its users to understand data that is generated along the whole patient journey faster, cost-efficiently, and securely. For Pharma clients, AICURA improves the clinical research process and reduces costs by leveraging real-world data to accelerate new product launches. For Healthcare providers, the integration of the AICURA platform can increase their revenue from third-party-funded clinical research while reducing costs and effort. Additionally, once integrated, the applications running on the platform can support clinical workflows such as resource management and planning. Applications are multi-fold and allow unlimited use cases scenarios in the clinical routine. | aicura-medical.com |

| Aignostics GmbH | | |
| Digital Health | | aignostics.com |
| AKmira optronics GmbH | | |
| Medtech | AKmira optronics GmbH is a start-up company which currently develops a 3D scanner based on digital optical holography. This brand new technology was matured and transferred from academia to industry by the inventor and founder Dr. Alexander Knüttel. The scanner will predominantly be available for the 3D endoscopy market where miniaturization is an absolute premium. Currently we are also targeting large medical companies to broaden the future sales activities. | AKmira-optronics.de |
| alco GmbH | | |
| Medtech | Since the Year 2000, we are developing, producing and distributing high-quality medical device products for interventional medicine. | alco-gmbh.de |
| AmbulanzPartner SozioTechnologie APST GmbH | | |
| Digital Health | APST is a multi-sided platform for patients with neurological diseases such as amyotrophic lateral sclerosis (ALS), spinal muscle atrophy (SMA) and other neuromuscular disorders. It combines a digital platform with a patient-centered case management. The APST platform links professional health providers such as pharmacies and medical manufacturers to patients and their relatives. Based on the platform-approach, APST provides research services focusing on real world evidence and patient reported outcomes. | ambulanzpartner.de |
| Aniva Health (Livy Health GmbH) | | |
| Digital Health | We help to reduce the biological age by testing 140+ biomarkers and creating a personalized action plan that includes daily supplements, consultations with doctors, retesting, and ongoing support. | aniva.health |
| appamedix UG | | |
| Digital Health | Appamedix develops apps for patients medical laboratories and hospitals. Our team consists of UI and UX designers, Doctors and computer scientists. | appamedix.com |
| ArgosConsult | | |
| Digital Health | ArgosConsult is a competence center for business development and innovation management in healthcare industries. We help companies to structure their strategic growth, market access and innovation process. Our core competencies are market oriented new product development and service engineering. We use proven methods for B2B business modeling and a seamless innovation process ensuring sustaining market success. This includes access to dedicated networks for regulatory support, funding programs and international collaboration. | argosconsult.de |
| Aristotech Industries GmbH | | |
| Medtech | Orthopaedic Forgings from Germany located in Luckenwalde/Brandenburg on over 30.000ft production plant. | aristotech.de |
| ASKANIA Mikroskop Technik Rathenow GmbH | | |
| Medtech | We, ASKANIA Mikroskop Technik Rathenow GmbH, offer microscopes for education, biological, medical experience and also stereomicroscopes for applications in science and technology. A variety of additional accessories and special models meet the requirements of modern microscopy equipment. The products are characterized by a precise construction and a sustainable design and are exported worldwide. | askania.de |
| AssistMe GmbH | | |
| Digital Health | AssistMe is developing an intelligent and connected incontinence pant for elderly people. It can detect the amount and type of excrement in real time sending recommendation for action to nursing staff, enabling the prioritisation of tasks on an ad hoc basis. Nursing staff are greatly relieved, as there are fewer leakages, secondary illnesses are prevented, and schedules become more efficient. | assistme.io |
| Athena DiaX GmbH | | |
| Medtech | AthenaDiaX GmbH is a dynamic product manufacturer with extensive clinical know-how. Our values are responsibility and integrity, with which we want to improve the perspective of people with health risks. The AthenaDiaX products serve high-risk patients and are of benefit to a large number of people. They are an integral part of the clinical diagnostics of large risk groups. | athenadiax.com |
| Audatic GmbH | | |
| Digital Health | We are building systems to intelligently modify sound using state of the art deep learning technology and unique datasets. Our personalized sound environment allows users to customize sounds to their individual taste. | audatic.ai |

| AUGLETICS GmbH | | |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|
| Digital Health | The AUGLETICS Eight is exactly what ambitious rowing clubs have always dreamed of: a rowing ergometer that feels almost like rowing on water. The electronically controlled eddy current brake allows a much more realistic movement, as the draw resistance starts from the first millimeter. With a sensor technology that provides the most accurate body measurement data and a networkability that can be simulated in training competitions. | augletics.de |

| Medtech | | aurahealth.tech |
| AvailabilityPlus GmbH | | |
| Medtech | | availabilityplus.de |
| AVIDAL Distribution GmbH | | |
| Medtech | AVIDAL specializes in cardio-vascular, peripheral-vascular, and neuro-vascular patient care. With our business unit AVIDAL Distribution, we offer a strong platform for medical devices manufacturers wanting to enter the central European markets. Our management team combines over 35 years of global marketing and sales experience. We hold close relationships with all cardio-vascular, peripheral-vascular and neuro-vascular key opinion leaders of these markets and are present in the majority of the top 100 care units. | avidal.net |
| Aware Health GmbH | | |
| Digital Health | | aware.app |
| B. Braun Miethke GmbH & Co. KG | | |
| Medtech | B. Braun Miethke GmbH & Co. KG is a joint venture between Aesculap AG, a subsidiary of the medical technology and pharmaceutical company B. Braun Melsungen AG, and Christoph Miethke, founder and CEO of Christoph Miethke GmbH & Co. KG located in Potsdam. Our focus is the development of innovative targeted drug delivery products to meet unmet or poorly met user needs of patients and health care professionals. | bbraun-miethke.com |
| B.Braun Melsungen AG – Medizintechnik | | |
| Medtech | B. Braun Melsungen ist mit drei Standorten in Berlin vertreten, darunter mit einem Kompetenzzentrum für Produkte für die Therapie von Gefäßerkrankungen, in dem Herzkatheter, Stents und Gefäßimplantate entwickelt, hergestellt und vermarktet werden. Insbesondere in der Therapie von verengten Herzkranzgefäßen hat sich B. Braun mit dem Berliner Standort seit 1990 zu einem global Player entwickelt. | bbraun.de |
| BANDELIN electronic GmbH & Co. KG | | |
| Medtech | BANDELIN electronic, a family-owned mid-sized company, is located in Berlin. Ultrasonic baths and homogenisers, disinfectants and cleaning agents from BANDELIN are in use in nearly all branches like laboratories, medical and pharmaceutical fields as well as in industry. | bandelin.com |
| Baze Labs GmbH | | |
| Digital Health | Baze offers the first evidence-based personalized supplement product. Our approach is deeply rooted in nutrition science: with the help of an easy and convenient blood test at home, your actual molecular micronutrient levels are measured and analyzed in our lab. Based on the molecular data and life-style information you provide, we calculate optimizing nutrient recommendations and send you truly personalized supplements with real health impact. | baze.com |
| BDS Digital Health Solutions GmbH | | |
| Digital Health | | medkitdoc.de |
| Bearcover GmbH | | |
| Medtech | Bearcover supports nursing home staff at night with checks of residents — without installing in-room devices. Our robots use radar to scan through doors and send alerts to caregivers when residents need assistance. We help nursing home management improve care quality, reduce the burden on night staff and reallocate staff resources to the most effective areas of work. | bearcover.de |
| BEBIG Medical GmbH | | |
| Supplier | BEBIG Medical GmbH (“BEBIG Medical”) is a global provider of high quality radiation therapy products for cancer treatment headquartered in Berlin, Germany. Preceded by the high dose brachytherapy business unit of Eckert & Ziegler AG, BEBIG Medical has a heritage of more than 40 years’ experience in brachytherapy field and continues to provide affordable healthcare with proven clinical outcomes via strong and viable technology. It has established factories in Germany, US and China and runs global business across more than 70 countries with operating offices in Germany, US, China, Singapore and India. | bebigmedical.com |

| Berlin Heals GmbH | | |
|-----------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------|
| Medtech | The global burden of chronic heart failure is huge. Despite the success of optimal medical treatment, it's not possible to heal heart failure. Berlin Heals has developed a device which can readjust the disturbed myocardial electrical gradient to normalize heart function after a short treatment period. The device is in clinical trials. | berlinheals.de |
| Berlin Heart GmbH | | |
| Medtech | Berlin Heart GmbH develops, produces and markets innovative systems for mechanical circulatory support. With our products EXCOR® Pediatric and EXCOR® Adult*, we cover the entire scope of medical indications. We are the only company in the world offering systems that can support patients of every age and size, from newborns all the way to adults. | berlinheart.de |
| BerLinux Solutions GmbH | | |
| Digital Health | | berlinux-solutions.de |
| Bermedi Medical Solutions GmbH | | |
| Medtech | Bermedi is a globally operating trading company specialized in the distribution and export of products for the medical radiology and imaging. Beside consumables and x-ray accessories we are also providing devices and equipment for the digital radiology. The scope of our program includes: Products for Digital Radiology Dry Imaging Laser Imagers & Dry Imaging Laser Films CR and accessories for the digital radiology Radiation protection, X-ray protection glass and windows X-ray accessories X-ray film, Processing chemicals, Cassettes, X-ray film processors Dental products Refurbished x-ray devices | bermedi.com |
| Bernaфон Hörgeräte GmbH | | |
| Medtech | Bernaфон GmbH is the German marketing company of Bernaфон AG. Its activities in Berlin include the production and sale of hearing aids to the specialist trade, audiological consulting and custom manufacture of in-the-ear hearing systems and otoplasty. | bernaфон.de |
| Bertrandt Services GmbH | | |
| Supplier | For more than 40 years, the Bertrandt Group has been developing individual solutions for the international automotive and aerospace industries as well as the electrical engineering, energy, mechanical engineering and medical technology industries. In total, around 13,500 employees at more than 50 locations in Europe, China and the USA stand for in-depth know-how, sustainable project solutions and a high level of customer orientation. | bertrandt.com |
| bess medizintechnik GmbH | | |
| Medtech | Combining top quality medical devices for ENT and Head & Neck Surgery with excellent, reliable services, it is our target to live up to our customers' requests and needs now and in future. To this end, we are in regular contact with doctors, industry, and other experts, constantly developing and adapting our portfolio. | bess.eu |
| bess pro GmbH | | |
| Medtech | bess pro gmbh develops, manufactures, packs, and sterilizes medical devices and pharmaceutical products mainly for ENT, Head & Neck Surgery, Pulmonology and Gastroenterology. From 3D-CAD engineering via rapid prototyping and silicone injection molding, we offer full services up to clean room production and packaging (ISO class 7 and 8) for our affiliate companies (bess medizintechnik gmbh / Leufen Medical GmbH / Novatech SA / Boston Medical Products, Inc.) as well as for non-affiliate companies. Furthermore, bess pro offers laboratory tests with own climate chambers for real time and accelerated aging, equipment for strength tests and fatigue tests as well as high-resolution microscopy for sample tests or damage analysis. For sterility or packaging validation projects, or for other regulatory questions, our experienced engineers offer consultations as desired. | besspro.eu |
| Betterguards Technology GmbH | | |
| Medtech | Betterguards has developed intelligent technology that protects people from ligament and joint injuries. The Betterguards System can be integrated into shoes, supports or gloves and only activates in cases of sudden movements (e.g. ankle sprain). During normal activities, however, the system is flexible and guarantees a natural freedom of motion. | betterguards.de |
| beyoni health GmbH | | |
| Digital Health | | beyoni.health |
| Biomental Gesellschaft für Mentalsysteme mbH | | |
| Medtech | BioMental GmbH develops, manufactures and sells biofeedback devices for respiration and eye movements. They are used in medical and psychotherapy against tinnitus, migraine, chronic pain, ADS, burnout for preventive treatment | biomental.de |

| BIOMET Deutschland GmbH | | |
|------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|
| Medtech | Founded in 1927 and headquartered in Warsaw, Indiana, Biomet is a global leader in musculoskeletal healthcare. The company designs, manufacture and market orthopedic reconstructive products; sports medicine, biologics, extremities and trauma products; office-based technologies; spine, craniomaxillofacial and thoracic products; dental implants; and related surgical products. Zimmer Biomet's products and solutions help treat patients suffering from disorders of, or injuries to, bones, joints or supporting soft tissues. The company has operations in more than 25 countries around the world and sells products in more than 100 countries. | zimmerbiomet.eu |

| Klara GmbH | | |
| Digital Health | Klara was founded in 2013 with a mission to transform healthcare communication, so every patient can receive great care. Klara makes it easy for healthcare providers to securely communicate with their patients and with each other, without worrying about HIPAA compliance or losing track of patient information. Healthcare providers across more than 40 specialties use Klara to provide a delightful patient experience, while streamlining their own administrative workflows and saving hours per day. Klara has been proven to increase patient satisfaction, and reduce time spent on administrative work. And patients love it, too – the average practice sees a patient adoption rate of more than 80%, which is approximately 3x the adoption rates of patient portals and emails. Klara, which was founded by Simon Bolz and Simon Lorenz, is backed by investors such as Firstmark Capital, Lerer Hippeau, Flatiron Health founders Zac Weinberg and Nat Turner, Clover Health founder Vivek Garipalli, InVision founder Clark Valberg, former Hubspot CRO Mark Roberge, and former Marketo Chief Growth Officer Jill Rowley, among others. It was named the winner of Silicon Valley's Health 2.0 Award, as well as one of the Best Entrepreneurial Companies in America by Entrepreneur Magazine. It has offices in New York (HQ) and Berlin. | klara.com |

| Neofonie GmbH | | |
| Digital Health | As Berlin-based digital agency Neofonie develops individual and user-centric solutions in the areas of mobile, commerce, content and artificial intelligence. Especially for the healthcare sector, Neofonie fulfils the requirements of the Medical Device Regulation (MDR) in Europe with ISO 13485 certification and is authorised to design and implement medical apps and software as medical devices. Customers include, among others, Wort & Bild Verlag, HUK-COBURG, curacado and the AO Foundation. | neofonie.de |
| Neomento | | |
| Digital Health | As a spin-off from a Helmholtz research center, neomento develops high-end Virtual Reality-based therapy solutions for the treatment of mental disorders, such as anxiety disorders and addictions. The international and interdisciplinary team is based in the heart of Berlin, at the Charité Campus Berlin-Mitte. | neomento.de |
| Neuromodtronic GmbH | | |
| Medtech | EBS develops a unique non-invasive brain stimulation device to treat patients with individual functional disorders of the brain. The mission is to improve neurological functions after stroke, head injury, glaucoma, amblyopia, and pain. | eyetronic-therapie.de |
| NeuroNation (Synaptikon GmbH) | | |
| Digital Health | CE-certified NeuroNation is developing medical devices used for the prevention in healthy aging and as a treatment for patients with Post-Covid, MCI, Parkinson's, MS, and other indications, improving access to care. With over 20 million users, we leverage our data to develop personalized treatments to achieve the highest effects and adherence of our Multi-Domain Cognitive Training products. | neuronation.com |
| Neurosphere UG (haftungsbeschränkt) | | |
| Digital Health | As a neurotech company, we believe that the human brain has immense capabilities. We want to unlock this cognitive potential by making the advances of neurotech simple to use, understandable and more accessible for everyone. Our first products in this market are lightweight EEG brain-computer interfaces. We are currently building data models and improving algorithms for automatic Neurofeedback training, and the predictive analyses of quantifiable cognitive processes. | neurosphere.io |
| Nevita Systems UG (haftungsbeschränkt) | | |
| Digital Health | Nevita is an low-cost, mobile and modular telemedicine system designed to support the medical care of patients in developing and emerging countries or environments with limited resources and competencies. Health providers are constantly faced with complex situations that they cannot assess without help. Nevita offers automated decision support. Emergency situations are recognized accordingly and further procedures are proposed. | nevita-systems.com |
| NEXUS / MARABU GmbH | | |
| Digital Health | NEXUS / MARABU is one of the leading software manufacturers in the healthcare sector in the areas of digital archiving, document and process management – ECM for short. Customers benefit from a comprehensive range of consulting and services. The company has been part of the NEXUS Group since 2014. | nexus-marabu.de |
| NEXUS SWISSLAB GmbH | | |
| Digital Health Software Provider | NEXUS SWISSLAB GmbH as part of NEXUS / LAB provides software solutions for the entire cosmos of laboratory diagnostics, pathology and cytology. From information system for core or special lab over a large portfolio in the area of digital pathology and cytology to communication and portal solutions - NEXUS is the answer for digital transformation into the new age. Special hardware solutions, for example cassette- and slide-printers, complete the portfolio. | nexus-swisslab.de |
| Nia Health GmbH | | |
| Digital Health | Based on its innovative MedTech Platform for personalized patient support, Nia Health develops medical software. Our end-to-end solutions are indication-specific and tailored to the individual needs of each patient. We cover a wide variety of use cases. Nia Health's Digital Therapeutics (DTx) combine strong clinical validation with empowerment, gamification and machine learning. | niahealth.ai |

| Medtech | | nuuron.com |
| OD-OS GmbH | | |
| Medtech | OD-OS is pioneering retina navigation with its all-digital Navilas® Laser System. The only navigated retina laser features a unique integration of imaging, planning, treatment, and documentation which allows for effective and comfortable treatment of vision-threatening retinal diseases. The image-guided treatment process supports precise photocoagulation as well as tissue-friendly microsecond pulsing protocols. | od-os.com |
| OHST Medizintechnik AG | | |
| Medtech | We, as OHST Medical Technology, are one of the leading manufacturers in the field of endoprosthetics. OHST stands for family owned business with 85 years of experience. Our medical products Made in Germany are long-time trusted by surgeons around the globe. We have applied our comprehensive knowledge in the endoprosthetics field to develop our own product range: customer-oriented implant systems for hip & knee joints. Over many decades of use, the implants have proven to be safe. Our surgical instruments give the surgeon the precision which turns an implant into a successful solution for the patient. All components are supplied in sterile packaging and are ready for immediate use in the operating room. Our target-customers are distributors around the world that sell implants and instruments to hospitals and/or doctors. | ohst.de |

| Olympus Soft Imaging Solutions GmbH | | |
|---------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------|
| Medtech | Olympus Soft Imaging Solutions (OSIS) is the Center of Excellence for worldwide microscopic imaging by Olympus. The areas of activity are diverse and include development, manufacturing and production as well as service and support for customized software and hardware solutions for the capturing, archiving, processing and analysis of scientific and industrial images. | olympus-sis.com |
| Olympus Surgical Technologies Europe | | |
| Medtech | Within the Olympus Corporation, Olympus Surgical Technologies Europe in Teltow is a worldwide competence center for medical radio-frequency technologies especially high-frequency generators. With more than 110 employees, Olympus develops and manufactures cutting-edge medical technology in Teltow. The success is based on many years of in-depth experience in the field of minimally invasive surgery (former Celon AG). | olympus-oste.eu |
| OPTIMAL Systems GmbH | | |
| Digital Health | Find company information quickly and reliably, manage it transparently, distribute it to the right persons, and archive it on an audit-proof basis: for more than two decades, OPTIMAL SYSTEMS has been developing and selling software solutions for Enterprise Content Management (ECM) helping more than 2000 companies make better decisions and to plan and implement their processes more effectively and rapidly. | optimal-systems.de |
| OraMetrix GmbH | | |
| Digital Health | OraMetrix is the leading industry provider of innovative 3-D technology solutions improving the quality and efficiency of orthodontic care. The proprietary technology, the suresmile system, represents a significant leap forward in orthodontics. | suresmile.com |
| Orpedo Germany GmbH | | |
| Medtech | We develop, produce and market supports, orthoses and various orthopedic aids for the prevention and rehabilitation of various diseases and injuries. Through our product range, all the regions of the body are covered. Our production sites are located exclusively in Europe and using only tested, certified and skin-friendly materials. | orpedo.com |
| Osyпка Medical GmbH | | |
| Medtech | Osyпка Medical is a forward-thinking Adlershof-based tech company supplying a wide range of temporary pacemakers and noninvasive hemodynamic monitors to hospitals world-wide. Our cutting-edge technology provides crucial solutions for cardiovascular care in the emergency room, ICU, and during cardiac surgery. Learn more about our life-saving devices and our continued effort towards innovation in software development, computer science, and A.I. | osypkamed.com |
| Ottobock SE & Co. KGaA | | |
| Medtech | For more than 100 years, Ottobock has been developing innovative treatment solutions in the fields of Prosthetics, Orthotics, NeuroMobility and Patient Care. More than 9,000 employees empower people in more than 135 countries and about 400 patient care centers to live their lives as they want to live them. For freedom of movement, quality for life and independence. Since 2018, Ottobock has been transferring its expertise in biomechanics to exoskeletons for ergonomic workplaces. | corporate.ottobock.com |
| Oviva AG | | |
| Digital Health | Oviva offers personalised one-to-one care from healthcare professionals, utilising the latest evidence in behaviour change. We ensure accessible and effective care for weight-related conditions through our app and technology, making health improvements easy from home. Oviva's approach is designed and tested by NHS doctors, dietitians, psychologists, nurses, and leading behaviour change academics. | oviva.com |

We combine digital & hybrid prevention and care solutions for health insurers, pharmaceutical companies, and occupational health for companies with our recommendation engine and Vilua+ app. Vilua promotes health through personal and sustainable health recommendations. | significo.com |
| simplinic GmbH | | |
| Supplier | simplinic offers Software-as-a-Service for Service & Logistics in hospitals. The software consists of the elementary simplinic software (simplinic.Cloud) and modular extensions (patienttransport, bed-management, transport of goods, recurring orders, ultrasound utilisation, temperature monitoring, asset management, shift plan optimisation) The elementary software (simplinic.Cloud) serves as the framework of the software, upon which additional simplinic products (modules) can be added. We believe that digitalization is a key to addressing existential challenges in healthcare: skyrocketing costs, uncertain conditions due to reforms, and above all, a demographic-driven increase in labor shortages. Hospitals will only be successful in the long term if they utilize the valuable resources available to them as effectively as possible, meaning they need to become more productive! | simplinic.de |

| Medtech | Sphaira Medical fundamentally improves medical isolation. We bring people together no matter how dangerous the circumstances. Our product MOBY is the world's first Mobile Protective Pod. MOBY allows safe treatment, provides mobility to patients, and enables anyone to conduct visits safely. We facilitate face-to-face, in person, natural interaction – without risking exposure to pathogens. | meet-moby.com |
| SPRINGER AKTIV AG | | |
| Medtech | Manufacturer of semi customized medical insoles for orthopedic shops in germany and all over the world. Applications of the high-tech shoe inlays for children, sportsmen and -women and diabetics; supply of measuring shafts and devices for measuring foot pressure. | springer-berlin.de |
| T&T medilogic Medizintechnik GmbH | | |
| Medtech | A medium-sized enterprise in medical technology, which has its emphasis in the areas of biomechanics and image processing. Quintessential points of our work are measurement and evaluation of mechanical size at humans and animals. | medilogic.com |
| Taube Med GmbH | | |
| Medtech | Taube_Med, a platform designed to help MedTech startups and software companies navigate complex regulatory requirements like QMS and Technical Documentation in a structured, efficient, and more independent way. The platform offers modular templates and step-by-step guidance, built-in learning resources and AI-powered assistance to simplify documentation and compliance. | taube-med.de |
| Tech Innosphere GmbH | | |
| Medtech | Innosphere develops AI-powered brain-stimulation medical device, for personalized effective and safe treatment of cognitive disorders. The first target indication of Innosphere is ADHD. The Innosphere patented electrodes and AF-RNS™ technology, provide accurate and effective stimulation to specific brain regions. Innosphere collaborates with leading global institutes, such as the Charite, Yale university and the university of Oxford. This treatment enhances neural activity in the selected brain regions and creates new neural connections, by that alleviating ADHD symptoms effectively without side effects. As a result, the patient experiences an immediate and long-lasting reduction in ADHD symptoms. This technology is clinically validated at leading medical institutes, with a reduction of 50% of symptom severity after 10 treatment sessions, and this efficacy is maintained even two months after stopping the intervention. | inno-sphere.com |
| TEFRA Hochfrequenz Apparate Rudolf Messerschmidt GmbH | | |
| Medtech | TEFRA radiofrequency therapy – gentle naturopathic through the use of high-frequency currents to promote or trigger the self-healing of the body. | tefra-berlin.com |
| Teoresi GmbH | | |
| Medtech | Teoresi MedTech, part of Teoresi Group, brings 20+ years of expertise in the design, development, and validation of hardware, software, connectivity services, and cybersecurity for medical devices. We offer turnkey solutions, high-value consulting, and certified production, ensuring compliance with medical regulations while driving innovation in healthcare technology. | teoresigroup.com |
| ThinkSono GmbH | | |
| Digital Health | ThinkSono is a company at the cutting edge of medicine and technology.
