HealthCapital Berlin-Brandenburg

The Healthcare Industries Cluster Berlin-Brandenburg – HealthCapital – is one of the leading life sciences and healthcare centers in the world. The unique research and clinic landscape, which is the region's major strength, is supported by a close network of key players from industry, start-ups, finance, academia, clinics and politics. Here, numerous technology parks and networks in different fields, above all biotechnology and medical technology, create an excellent infrastructure for transforming the latest scientific findings into innovative products

and services for the healthcare sector. The German Capital Region is also a leading center of the IT industry. That combination offers optimal conditions for the development of innovative digital health solutions for the regional and global market. Berlin Partner for Business and Technology is responsible for managing the cluster in cooperation with the Economic Development Agency Brandenburg (WFBB).

BDS Digital Health Solutions GmbH

With our MedKitDoc platform, we are creating a completely new way of remote medical consultations. By combining our MedKitDoc App, trained specialists and MedKit, we can provide patient-centric, high-quality, and digital health services. Our medically certified App enables quick appointment scheduling and access to qualified specialists, who are all trained on remote diagnostics with our solution.

The MedKit includes certified medical devices (e.g. digital stethoscope and ECG), which connect to the App via Bluetooth and transmit vital data during consultations in real-time, from anywhere, anytime. Thus, we can help to reduce potentially unnecessary hospitalizations, ensure efficient and sufficient medical care, and support our partners e.g., in the care sector.

Fosanis GmbH

MIKA is the first digital therapeutic to cover all oncological indications and assist cancer patients combining AI-powered monitoring and coaching. Daily check-ups allow for continuous tracking of distress levels and symptoms which can help both patients as well as medical teams to control

therapy progress and side effects. In addition, hundreds of multimedia elements such as articles, videos and courses give 24/7 access to validated, easy-to-understand information whilst specially tailored psycho-oncological courses provide emotional support and patient empowerment training.

IGES Institut GmbH

The specialists at IGES support you in all matters relating to market access and reimbursement for digital health products. Our focus is on Germany, but we also provide these services for France and the UK through our subsidiaries there. IGES helps to strategically develop the German market and other European markets. Our experts assess the market potential, analyze the competitive environment and evaluate the respective

reimbursement requirements. We also conduct the necessary clinical trials. This enables a seamless market entry.

We take an analytical approach to commercialization and help digital health providers leverage the latest tools, techniques and in-depth healthcare knowledge to enter European markets. The result: solutions focused on quantifiable resources, highly accurate evidence, and actionable ideas.

Lindera GmbH

Lindera is a deep tech startup offering AI-driven motion analysis for healthcare. Their digital health application LINDERA CARE measurably reduces fall risk as well as hospitality rates in nursing homes all over Germany. It provides effective quality control and enables targeted resource management for care facilities. LINDERA CLINIC seizes vast

opportunities in Orthopedics, Neurology and Geriatrics. LTECH, the Software Development Kit, enables real-time movement correction, repetition counting and information on exercise velocity. Founded in 2017 in Berlin, the company has over 40 employees with in-house departments for Data Science, Development and Clinical.

nursIT Institute GmbH

The nursIT Institute GmbH specializes in services and products for the largest group of stakeholders in the health care market – the nursing professionals. The company uses a proven model of structured care, with the goal of reducing costs and improving the quality of care as well as employee satisfaction. The model is based on four pillars: process management,

technology, training and care economics. nursIT is confident that the use of the structured care implemented via its product careIT is the solution for this problem. The company enhances its processes through structured care. Analysis and optimization of nursing processes is operated by the unique nursing workflow management system “careIT”.

Economic Development Agency Brandenburg (WFBB)

The Economic Development Agency Brandenburg (WFBB) is the central point of contact for investors, companies based in the state of Brandenburg and technology-oriented start-ups. WFBB offers a broad array of services for economic development and the promotion of employment: From supporting a company's establishment and its expansion to promoting innovations,

internationalization and networking as well as the acquisition and qualification of a skilled workforce. As Brandenburg's Energy Agency, WFBB is also closely linked to the implementation of the state's energy strategy. Furthermore, we support the development of sector-specific innovation clusters in the state of Brandenburg and the German Capital Region.
