Life Sciences Parks	
Adlershof Zentren für Biotechnologie und Umwelt	
Adlershof is a leading site for Biotechnology and Life Sciences in Berlin-Brandenburg. The Centre of Biotechnology and the Environment (Zentrum für Biotechnologie und Umwelt, ZBU I) extends over 200m with 13,000 square metres of rentable space, while 7,200 square metres are available in the ZBU II. Offering premium technological facilities, with extensive equipped lab areas, the spaces are tailored to young biotech businesses.	adlershof.de
berlinbiotechpark	
berlinbiotechpark offers successfully growing companies the ideal location and the infrastructure to develop advanced technologies. berlinbiotechpark is located in the very heart of Berlin – one of the most important biotechnology regions in Germany. The integrated concept – office, laboratory and production space with technical infrastructure and services – is unique in Germany	berlinbiotechpark.de
Biotech Campus Potsdam	
Just a few minutes away from Potsdam's central railway station in the direction of Caputh, BIOTECH CAMPUS POTSDAM is located on the Hermannswerder peninsula in the river Havel. It is owned and operated by BIOTECH CAMPUS POTSDAM GmbH, a fully owned subsidiary of the Investment Bank of the State of Brandenburg.	wis-potsdam.de/de/institute/biotech-campus-potsdam-gmbh
Biotechnologiepark Luckenwalde	
Located just 30 miles south of Berlin and 25 miles from Berlin-Brandenburg International Airport in the rural district of Teltow-Flaeming, the Biotechnology Park Luckenwalde is one of the most modern facilities of its kind in Germany. It is home to 35 companies with 500 employees from Germany, USA, UK, Korea, India, Italy and Russia.	swfg.de
Campus Berlin-Buch	
Campus Berlin-Buch in the northern part of Berlin is an innovative science, health and biotechnology park where companies and institutions conduct basic and clinical research. Among the features unique to the campus are the clear focus on biomedicine and the closeness of the institutions to each other both spatially and with regard to scientific interaction and collaboration.	campusberlinbuch.de
Innovationsforum Hennigsdorf	
The "Innovationsforum Hennigsdorf" offers affordable rental opportunities and a selected portfolio of services and advice to young start-ups as well as medium-sized companies. Therefore Hennigsdorf is a center of excellence for life sciences, especially in the field of red biotechnology and medical technology.	innovationsforum-hennigsdorf.de
Potsdam Science Park	
The Potsdam Science Park in Golm is the largest and fastest growing location for innovative solutions in Brandenburg. It is part of Potsdam's scientific landscape, with more than 40 internationally renowned research institutes forming a unique research cluster and campus in the countryside – easily accessible from Berlin and Schönefeld Airport.	potsdam-sciencepark.de
Innovationspark Wuhlheide	
So far 200 companies have decided to locate at the Wuhlheide Innovation Park, where the creative environment and service-oriented management provide important stimuli with respect to product development and innovation. Our companies have attractive office accommodation, workshops, laboratories and service areas at their disposal. Furthermore, they also have the opportunity to acquire fully developed investment sites for the evolution of their company! The location stands for successful new businesses, growth and long-term perspectives.	ipw-berlin.info

Pharmaceutical Companies	
AbbVie Deutschland GmbH & Co. KG	
AbbVie is a global, research-driven biopharmaceutical company committed to developing innovative advanced therapies for some of the world's most complex and critical conditions. The company's mission is to use its expertise, dedicated people and unique approach to innovation to markedly improve treatments across four primary therapeutic areas: immunology, oncology, virology and neuroscience.	abbvie.de
Advance Pharma GmbH (Aristo)	
Contract manufacturer of solid drugs. Galenic development and admissions, analytics and microbiology, coating and granulation (organic and aqueous), compacting, packaging.	aristo-contract-services.com
Aenova/Haupt Pharma Berlin	
With nine production sites Haupt Pharma is one of the leading contract manufacturers for pharmaceutical products in, the world today. About 2.000 employees produce for an established clientele of more than 200 important international pharmaceutical companies, amongst which 15 of the international TOP 25.	aenova-group.com
AstraZeneca	
We are a global innovation-driven biopharmaceutical company specialising in the discovery, development, manufacturing and marketing of prescription medicines that make a meaningful difference in healthcare. We operate in over 100 countries and our medicines are used by millions of patients worldwide. AstraZeneca was formed on 6 April 1999 through the merger of Astra AB of Sweden and Zeneca Group PLC of the UK – two companies with similar science-based cultures and a shared vision of the pharmaceutical industry.	astrazeneca.com
B. Braun Melsungen – Pharma	
B. Braun Melsungen ist mit drei Standorten in Berlin vertreten, darunter mit einem Kompetenzzentrum für sterile Injektionslösungen in Glasampullen, Vials und Kunststoffampullen, mit dem B. Braun in diesem Segment zu den Global Playern gehört. Mit der Herstellung leisten die Mitarbeiter hier täglich einen Beitrag, um weltweit die Gesundheit von Menschen zu schützen und zu verbessern.	bbraun.de
Bausch + Lomb Dr. Mann Pharma	
Bausch + Lomb is the eye health company dedicated to perfecting vision and enhancing life for consumers around the world. Core businesses include soft and rigid gas permeable contact lenses and lens care products, and ophthalmic surgical and pharmaceutical products.	bausch-lomb.de
Bayer AG	
Bayer Pharma is one of the ten largest specialty pharmaceutical companies in the world. With a focus on cardiology, oncology, women's health, hematology and ophthalmology, the company is researching, developing and marketing innovative medicines that provide significant clinical benefit and value. In a network of strong strategic partnerships, we are leveraging new science and innovative solutions to ultimately create superior outcomes for patients.	bayer.com
Berlin-Chemie AG	
BERLIN-CHEMIE is an innovative, internationally operating pharmaceutical company. Since 1992, BERLIN-CHEMIE has belonged to the globally operating MENARINI Group. Within the Group, BERLIN-CHEMIE is responsible for the pharmaceutical markets in Germany, Eastern Europe and the CIS region. In addition, Berlin is one of the Group's central R&D sites. Research is centred on the development of innovative drugs for inflammatory diseases and pain, cardiovascular diseases, oncology and viral diseases.	berlin-chemie.de
Chemisch-pharmazeutisches Labor, Rolf Sachse GmbH	
CPL SACHSE is a contract developer and cGMP manufacturer of organic, active pharmaceutical ingredients (APIs) for human and veterinary use. We also provide all analytical, pharmaceutical and regulatory services required to develop and submit drug substances and drug products for clinical trials and marketing approval.	cpl-sachse.de
Daiichi Sankyo Company, Limited	
Daiichi Sankyo is a global pharmaceutical company with corporate origins in Japan. We provide innovative products and services in more than 50 countries around the world. With more than 100 years of scientific expertise, our company draws upon a rich legacy of innovation and a robust pipeline of promising new medicines to help patients. Through the outstanding knowledge and commitment of our 30,000 employees worldwide, we create innovative new and generic medicines, and new methods of drug discovery and delivery. We share a passion for innovation, as well as compassion for the patients around the world who are in need of our medicines.	daiichisankyo.com

Dentinox Ges. für pharmazeutische Präparate mbH	
The Dentinox Company for pharmaceutical preparations Lenk & Schuppan KG is a German independent family-owned company, managed in its second generation. Dentinox has more than 60 years of experience with manufacturing and marketing of medicine for children and health care products. All Dentinox preparations are characterized as special problem solutions with high innovative strength. This is a result of the highly specialized research and development capacity of Dentinox. Dentinox preparations are well proven million fold around the world.	dentinox.de
Dr. Kade Pharmazeutische Fabrik GmbH	
We create quality of life: under this slogan DR. KADE develops and offers pharmaceutical and medical products in the fields of gynecology, proctology, dermatology, gastro enterology and supplements/vitamins. With their own production in Berlin the company provides health care "Made in Germany".	kade.de
GesundHeits GmbH compounding Berlin	
Customized formulations as medications: parenteral feeding, intradialytic parenteral feeding, omega-3 fatty acids, cytostatics.	compounding.gesundheitsgmbh.de
Hevert-Arzneimittel GmbH & Co. KG	
Hevert is a leading German manufacturer of natural medicines and high-dose micronutrient preparations. As a family business in close touch with nature, sustainability has been the heart of the company's philosophy since it was founded in 1956. Hevert's Berlin office, established in 2017, serves as a space for discussion with policy makers, customers, business partners, and opinion leaders.	hevert.com
Heyl chemisch pharmazeutische Fabrik GmbH & Co. KG	
HEYL is an independent, entrepreneurial family business that has its headquarters in probably the liveliest German metropolis, Berlin, since its establishment in 1926. In cooperation with our international subsidiaries, the main focuses of our work are the Regulatory Affairs and marketing of medicines as well as the sale of active pharmaceutical ingredients (API's) and special chemicals.	hey-berlin.de
Klosterfrau Berlin GmbH	
For more than 175 years Klosterfrau has been developing, manufacturing and marketing pharmaceutical products. The profile of traditional yet modern natural medicines has grown significantly in recent times. Based on the latest scientific discoveries combined with the development of new markets, the range is constantly being expanded with innovative products.	klosterfrau.de
Medios AG	
Medios AG is the leading provider of Specialty Pharma solutions in Germany. As a competence partner and expert, Medios covers all relevant aspects of the supply chain in this field: from pharmaceutical supply to the manufacture of patient-specific therapies including blistering. The focus is on optimal patient care via specialized pharmacies. Medios AG is Germany's first listed Specialty Pharma company and member of the SDAX selection index (Prime Standard) (ISIN: DE000A1MMCC8).	medios.ag
medphano Arzneimittel GmbH	
medphano Arzneimittel in Rüdersdorf stands for proven and cost-effective pharmaceutical preparations. Main products are analgesics/anti-rheumatics, antibiotics, dermatics, diuretics, drugs to stimulate blood circulation, drugs for treatment of gastro-intestinal disorders, vitamins, expectorants, lipid-lowering agents, ophthalmics, cosmetics, food supplements, diet foods and foods.	medphano.de
MiGenTra GmbH	
MiGenTra is a healthcare transforming medicinal company with a focus on providing high-quality medicine at affordable prices, headquartered in Berlin and a manufacturing site located in Cairo. MiGenTra will increase accessibility to critical medicine in Egypt, the Middle East, and Africa (MEA). It allows for product development in the fields of Biosimilars, Cell and Gene Therapies and vaccines.	migentra.com
MUCOS Pharma GmbH & Co.KG	
As a specialist in enzyme preparations Mucos supplies a steadily growing market with specific and variably dosed enzyme combinations. The company leads the world market in oral enzymes for therapeutic purposes.	mucos.de
NextPharma Berlin	
NextPharma Berlin is specialised in the development, manufacturing and packaging of beta-lactam antibiotics with a dedicated production area for penicillin containing solid oral forms, as well products containing combined amoxicillin and clavulanic acid. The Berlin site is served by its own warehouse with high-rack storage. In addition, development services are offered for beta-lactam antibiotics, from development of new products, transfer of production, commercial supply to stability studies.	nextpharma.com

Novartis Deutschland GmbH	
Novartis is one of the most innovative companies worldwide. Since 2010, we have invested more than 2 billion Euro in research and development in Germany. In Berlin and Brandenburg we maintain various clinical research cooperations, not only with university medicine, but also with non-university institutes and study centers. In 2018 we conducted more than 100 clinical trials in the region. This openness to external partners enables cooperation and networks that provide diverse innovation stimuli at a regional and national level.	novartis.com
Novo Nordisk Pharma GmbH	
Novo Nordisk is a leading global healthcare company, founded in 1923 and headquartered in Denmark. Our purpose is to drive change to defeat diabetes and other serious chronic diseases such as obesity and rare blood and endocrine disorders. We do so by pioneering scientific breakthroughs, expanding access to our medicines and working to prevent and ultimately cure disease. Novo Nordisk employs about 45,000 people in 80 countries and markets its products in around 170 countries.	novonordisk.de
Nuvisan	
The INNOVATION CAMPUS BERLIN provides first rate industry standard integrated research solutions to its clients and partners. A highly qualified team of 150 scientists and 250 lab professionals offers comprehensive drug discovery services and best-in class technology platforms. The unit is located on the Bayer campus in the heart of the city of Berlin. The ICB is part of the international NUVISAN group, which provides solutions spanning from target idea to patient.	InnovationCampusBerlin.com
Pfizer Pharma GmbH	
Pfizer is the world's largest research-based biomedical and pharmaceutical company.	pfizer.de
PharmaMar GmbH	
PharmaMar is a biopharmaceutical subsidiary of Grupo Zeltia; it is a world leader in discovering, developing and marketing marine-based drugs to treat cancer. Yondelis® is the first marine-based antitumour drug. PharmaMar has four other compounds in clinical development: Aplidin®, Zalypsis®, PM01183 and PM060184. PharmaMar also has a rich pipeline of pre-clinical candidates and a major R&D programme. PharmaMar GmbH, the German subsidiary, was officially established in November 2013 in Berlin.	pharmamar.com
RIEMSER Pharma GmbH	
RIEMSER Pharma GmbH is a European specialty pharmaceutical company established in 1992 with core competencies focused niche therapy areas with high unmet medical need.	riemser.com
Sanofi-Aventis Deutschland GmbH	
Sanofi, mit Hauptsitz in Paris, hat weltweit mehr als 100.000 Beschäftigte, davon arbeiten annähernd 9.000 in Deutschland. Sanofi erwirtschaftete in Deutschland im Jahr 2018 einen Umsatz von 4.828 Millionen Euro. Neben dem deutschen Firmensitz in Frankfurt am Main hat Sanofi weitere Standorte in Berlin, Neu-Isenburg und Köln. Sanofi in Deutschland ist in fünf Geschäftsbereiche gegliedert: Consumer Healthcare (Selbstmedikation), Diabetes und Herz-Kreislauf-Erkrankungen, General Medicines, Sanofi Genzyme (Specialty Care) und Sanofi Pasteur (Impfstoffe).	sanofi.de
Spreewälder Arzneimittel GmbH	
Spreewälder Arzneimittel is a contract manufacturer of drugs, veterinary drugs, food supplements, diet foods and cosmetics in liquid, semi-solid and solid administration forms.	spreewaelder-arzneimittel.de
Steiner & Co. Deutsche Arzneimittelgesellschaft mbH & Co. KG (Aristo)	
Production and marketing of pharmacy and prescription drugs, particularly plant-based drugs (tranquillizers, rheumatism drugs, bile duct and gastro-intestinal as well as gynecological and urological drugs), analgesics and mineral preparations.	steinerarznei-berlin.de
Steripharm Pharmazeutische Produkte GmbH & Co. KG	
Production and marketing of folic acid products.	steripharm.de
Takeda in Germany	
Takeda is a global biopharmaceutical leader headquartered in Japan, present in more than 80 countries focusing its R&D efforts on Oncology, Gastroenterology, Neuroscience, Rare Diseases, Plasma-Derived Therapies and Vaccines. Our employees are committed to improving quality of life for patients and to working with our partners in healthcare in approximately 80 countries, including more than 2,300 employees at four sites in Germany.	takeda.de
Zentiva Pharma GmbH	
ZENTIVA emerged from the companies Lichtenstein and Winthrop, which early specialized in the production of generic medicines. ZENTIVA develops high-quality and affordable generic products that meet patient's needs. The constantly growing portfolio offers all important generic medicines for the most frequently diagnosed diseases. Located in Berlin, the company manages its national sales activities and is the partner of choice for health insurance companies and health authorities.	zentiva.de

Contract Research Organisations

analyze & realize GmbH

analyze & realize is a leading CRO and consulting firm, which primarily give complete advice and guidance to companies in the natural products sector.

a-r.com

Allied Clinical Management GmbH

The CRO has broad experience in monitoring and managing phase I to phase IV clinical trials including advanced therapy medicinal product (ATMP) trials as well as in accompanying and conducting medical device trials and post-marketing surveillance.

allied-clinical.com

BLS Laboratories GmbH

BLS laboratories is an independent privately-owned contract research institute (CRO) specialized in preclinical testing of medical devices, biomaterials, human and veterinary pharmaceuticals and food using in-vivo models. Through our highly skilled scientific partners we provide a "one-stop" service and tailored solution. We take the time to understand your business needs and provide comprehensive tailored solutions either in-house or in co-operation of our network. We are backed by a highly skilled scientific team with a wealth of experience in all disciplines of preclinical development.

bls-analytik.de

CBR Biotech Strategies GmbH

CBR International Corporation is a global, full-service product, clinical, and regulatory compliance development group dedicated to providing comprehensive consulting services. We understand commercial pressures and regulatory constraints of biopharmaceutical product development and offer full support and guidance to all of our clients. Our experienced staff and consulting affiliates offer detailed and strategic services to members of the biotechnology, pharmaceutical, and device industries worldwide.

cbrbiotech.com

Charité Research Organisation GmbH

Based in Berlin, the Charité Research Organisation (CRO) was founded in collaboration with Berlin's famous Charité University Hospital. This relationship fosters a level of cooperation with centers of clinical excellence that we think is unique in the industry. The CRO offers a whole new approach to the concept of partnering with centers of clinical excellence to facilitate access to patients, clinical expertise and specialist methodologies in support of early clinical development programs.

charite-research.org

CSG Clinische Studien Gesellschaft mbH

Since its foundation in 1998, the CSG Clinische Studien Gesellschaft mbH has focussed on aligning clinical research with public health demands, with special attention to facilitating access by physicians and patients to clinical studies. CSG cooperates closely with the largest research institute for public health in Germany, the IGES Institut.

csg-germany.com

Dr. Notghi Contract Research

Dr. Notghi Contract Research GmbH is a service provider for large, medium and small-sized companies in the pharmaceutical, generics and biotechnology industries. We support and advise you in the conduct and management of national and international projects.

notghi.com

ICON Clinical Research	
ICON is a global provider of outsourced development services to the pharmaceutical, biotechnology and medical device industries. They specialise in the strategic development, management and analysis of programs that support Clinical Development – from compound selection to Phase I–IV clinical studies.	iconplc.com
Klinische Forschung Berlin GbR	
Klinische Forschung Berlin is a study centre that implements clinical studies from phases IIA to IV for the pharmaceuticals industry.	klinische-forschung-berlin.de
Klinische Forschung Gruppe Nord GmbH	
The Klinische Forschung Gruppe Nord (Clinical Research Group North) is a network of independent investigator institutes with five centres in Northern Germany, two of them in Berlin. The Klinische Forschung Gruppe Nord has carried out trials with up to 250 patients. Phase II and III studies are the core competence. The test centres have altogether 30 overnight accommodation places for phase I and IIa studies.	kfgn.de
Lampe&Company GmbH & Co. KG	
Lampe & Company is a consulting firm specialized in multidimensional analysis of biomedical literature for evidence-based decision making. Our team of experts combines industry expertise with our unique L-Matrix Method and exclusive L&C relational database to deliver critical information to leading decision makers of pharmaceutical, life sciences, and medtech companies.	lampeandcompany.com
LINK Medical GmbH	
LINK Medical is a full-service contract research organization (CRO). We provide services for clinical trials, regulatory affairs, pharmacovigilance, health economics and quality assurance for the pharmaceutical and medical device industry and aim for accelerating our customers' product development.	linkmedical.eu
LUMIS International GmbH	
Based in Berlin, LUMIS International is specialized to provide support for small to medium sized biopharmaceutical sponsors to plan, implement and perform their clinical trials. Depending on our client needs we help to define the best outsourcing strategy, to select the service providers and to implement an efficient clinical oversight management system. LUMIS acts on behalf of non European Biopharmaceutical sponsors as their legal representation for clinical trials. The team at LUMIS and our consulting affiliates cover a broad range of experience in different indications as well as international operational experience working in CROs and biopharmaceutical companies.	lumisinternational.com
MEDIACC GmbH	
MEDIACC is the private, independent institute for Medico-Academic Consulting. We provide made-to-measure services based on more than 20 years of clinical and research experience to develop products for patients' needs. The full service comprises potential assessment, development of a realisation concept to realisation of pre-clinical to clinical studies as IIT or following AMG and MPG. Our active support extends to concept and writing of publications for international specialist congresses or high-ranking peer reviewed journals. Highest quality comes from solid academic backgrounds, close link to centres of excellence and our strong network building interdisciplinary teams. We operate internationally based in Germany.	mediacc.de
Medis Research Group	
MEDIS RESEARCH GROUP is a partnership of clinical research services providers with a joint mission to combine clinical research expertise and provide complete service solutions across all stages of the clinical development process.	medis-research.com
OSMUNDA Medical Technology Service GmbH	
OSMUNDA Group is the leading clinical trial CRO and service provider of medical devices and pharmaceuticals. OSMUNDA is ready to assist with a comprehensive service chain and one-stop solutions in the technical, clinical and regulatory aspects of medical device industry, including clinical trials, global product registration and approval, biomedical data management and analysis, consultation and training.	en.osmundacn.com
PAREXEL International GmbH	
The German subsidiary of the US clinical research organization PAREXEL employs more than 1,400 people in Berlin. In two units with a 160-bed capacity (incl. 8 sleep lab beds) and an annual enrollment of approximately 2,500 volunteers in Berlin, more than 75 clinical studies are performed each year.	parexel.com
PharmaLex GmbH	
PharmaLex is one of the leading service providers in the International pharmaceutical business. The company is dedicated to the development, registration and marketing authorization, market access and product maintenance of medicinal / biotechnological products and medical devices, worldwide. The corner stones of PharmaLex' successful co-operation with companies of all sizes and specializations are very high quality of work, reliability, efficacy, flexibility and anticipatory strategic planning.	pharmalex.com

QiP GmbH	
The QiP - Quality in Progress - GmbH is a consulting enterprise, providing excellence services in a wide range of quality related themes. Our expertise is dedicated to the success oriented support of our clients, among them medical devices manufacturer, pharma and biotechnology companies, in various fields of activities: Life science, health, food and more. Our team qualifications include medical physics, clinical trials management, biotechnology and bioinformatics. We develop quality management systems, conduct audits and represent our clients in front of audits and inspections, compile clinical evaluations, and support e. g. the validation, risk management, and market authorisation processes.	qip-qm.com
Sacura GmbH	
Sacura is a full-service contract research organization granting a high level of quality (FDA approved), flexible structures and qualified staff.	sacura-cro.com
syneed medidata GmbH	
syneed medidata GmbH is an independent, privately owned, contract research organization (CRO) that has been providing end-to-end services for phase II to phase IV clinical trials and for observational studies for more than 25 years. Since 1995, we have also excelled in trials involving medical imaging (oncology, neurology, radiology) and in trials with medical devices.	medidata.com
WITEGA Laboratorien Berlin-Adlershof GmbH	
WITEGA Laboratorien Berlin-Adlershof GmbH is a medium-sized company specializing in the realization of organic customer syntheses. Our customers are companies from the chemical and pharmaceutical industries as well as from other technology fields. The main focus of our activities is the lab-scale custom synthesis of organic building blocks, intermediates and target structures and of isotope-labeled compounds (D, 13C, 15N) for chemical and pharmaceutical research and development. The company is also a supplier of analytical standards for residue analysis (especially in veterinary medicine).	auftragssynthese.com

Biotech Companies

3B Pharmaceuticals GmbH	
3B Pharmaceuticals GmbH (3BP) is a privately held pharmaceutical R&D company based in Berlin, Germany. The company is dedicated to the development of peptide-based pharmaceutical and diagnostic products. 3BP is pursuing projects in hemophilia and nuclear medicine.	3b-pharma.com
8sens.biognostic GmbH	
8sens.biognostic develops, produces and sells rapid tests (lateral-flow) and ELISAs for different markets (human and veterinary diagnostics, food control). Our products are the QuickSens®-tests for h-FABP, Tropl, CRP and hs-CRP and the Reader for quantification QuickSens®OMEGA. Development-on-demand, feasibility studies and production-on-demand are also offered.	biognostic.de
AB Diagnostic Systems GmbH	
We are a biotechnology company with the vision to evolve in-vitro-diagnostics. After more then 20 years of experience we felt a profound need for fundamental improvements towards more usability, simplicity and ecological sustainability in medical testing processes.	ab-ds.de
ABiTEP GmbH	
The ABiTEP GmbH is working in development and production of biotechnological products for sustainable agriculture. The team of ABiTEP works for development of non GMO customer specific technologies in laboratory scale and scale up with modern equipment and Know how. Capacities for fermentation up to 5.000 L, down stream equipment as well as freeze drier with capacity of 90 L are available for services. A molecular biology lab is available for basic science.	abitep.de
Acaryon GmbH	
ACARYON is your partner for identification, development and optimization of probiotic strains, prebiotic approaches and microbiome applications. We combine a unique technology platform and our two decades of experience in working with microbial carbohydrates for the development of indication of specific next generation microbiome products.	acaryon.com
Accelero Bioanalytics GmbH	
Accelero® Bioanalytics GmbH is a biotech CRO focussing on GxP compliant bioanalytical ligand binding assays. The company supports PK and PD preclinical/ clinical drug development on microRNA, miRNA, siRNA, aptamers, plasmid APIs, antisense drugs, as well as peptide hormones, biosimilars, antibody therapeutics, or cell-based therapeutics (ATMP). The Applied Biosystems Vii7 real-time qPCR system with IVD label for human Dx operates in full compliance to Good Laboratory Practice (GLP).	accelero-bioanalytics.com

Adrenomed AG	
Adrenomed AG is a privately financed, clinical stage biopharmaceutical company focused on rescuing vascular integrity in critically ill patients. Impaired vascular integrity is currently an unmet pathophysiology of a variety of life-threatening conditions like septic shock and acute heart failure. Our unique treatment approach combines targeted therapy with specific in vitro diagnostics by utilizing the expression level of the bioactive target to identify patients in need. Lead product candidate is a first-in-class Adrenomedullin-specific antibody, currently under evaluation in clinical Phase-II studies.	adrenomed.com
AFOSA GmbH	
Development, production and marketing of diagnostics (ELISA kits), primarily for use in veterinary medicine.	afosa.com
AIMS Scientific Products GmbH	
AIMS Scientific Products GmbH is a manufacturer of polymer based materials for a wide range of life science applications. AIMS acquired a deep know-how and a broad methods repertoire for the customization of plastics and biopolymers surfaces such as polyolefins, polyamides or polysaccharides. AIMS offers catalogue products as well as product developments and expert reports.	aims-scientific-products.de
AJ Innuscreen GmbH	
The AJ Innuscreen GmbH is a young life science company working in the field of biotechnology and boosts the life science unit of Analytik Jena AG. Innovative technologies and products are developed and produced for the isolation and purification of nucleic acids. Reagent systems for molecular biology, as well as technologies and products for molecular diagnostics, are also included in the product portfolio. The company is EN ISO 9001:2008 and EN ISO 13485:2003 + AC:2009 certified.	aj-innuscreen.de
Alacris Theranostics GmbH	
Alacris Theranostics is developing personalized approaches in oncology with innovative molecular diagnostics based on next generation sequencing (NGS), bioinformatic and systems biology approaches. Alacris supports individualized therapy selection through its Comprehensive Molecular Tumor Analysis (CMTA) and through its proprietary computer software ModCell™ for the prediction of drug response.	alacris.de
Alimera Sciences Ophthalmologie GmbH	
Alimera Sciences is specialized in the development of innovative therapies in the field of chronic retinal diseases. The focus is on the treatment of chronic diabetic macular edema with Iluvien®.	alimera-sciences.de
ALRISE Biosystems GmbH	
ALRISE is a drug delivery company that specializes in the nano- and micro-encapsulation of active ingredients. Using its globally patented ImSus® technology, ALRISE are developing parenteral deposit pharmaceutical forms for proteins, peptides or small molecules. Customers are mainly large pharmaceutical companies who are developing improved administration forms for active ingredients whose patents are expiring together with ALRISE as part of their "Product Lifecycle Management".	alrise.de
AmpliVak Immunotherapy GmbH	
We are a start-up biotechnology company developing an immunotherapy empowering the immune system of the patient to fight cancer. We have developed innovative technologies for primary immunization and subsequent amplification of CD8+ T-cell responses leading to unmatched levels of cancer-specific cytotoxic immunity.	
AnaKat Institut für Biotechnologie GmbH	
AnaKat Institut für Biotechnologie GmbH has specialized on analytical determination of pharmaceutical ingredients.	anakat.de
AnalytiCon Discovery GmbH	
AnalytiCon Discovery has a strong focus on natural product based drug discovery services. AnalytiCon's libraries: Isolated natural products from plants and microbes, synthetic libraries based on natural product motifs, macrocyclic and virtual libraries are building up a complete chemical ecosystem. AnalytiCon's services: Our libraries are well suited for biological and bio-structural profiling addressing challenging problems with a high need of new chemical space. In-vitro, fragment based, in-silico and fully integrated drug discovery services are available. AnalytiCon's team: Highly motivated and talented team of natural product, separation, analytical, computational, synthetic and medicinal chemists and biologists.	ac-discovery.com
AnaTox GmbH & Co. KG	
AnaTox is a most innovative HPLC, GC & MSD support organization in Germany, constantly striving to offer great value for money whilst maintaining instruments perform at peak efficiency. Installation and Operational Qualification is carried out by AnaTox AIQ-Tool® as a part of the 4Q model of regulations by USP <1058> and GxP, to confirm the instrument is installed according to the manufacturer recommendations. The procedure summarizes all relevant information for documentation of the process of placing into operation.	anatox.de

Angiobiomed GmbH	
Founded in 2015, AngioBiomed has developed several proprietary mouse monoclonal antibodies that block the interaction between the vasoactive peptide hormone adrenomedullin (ADM) and its receptor.	dbi-ag.de/beteiligungen/angiobiomed
ANIMOX GmbH	
Development of applications for the use of natural peptide / amino acid mixtures in chemistry and biotechnology, f.i. as a scavenger material in formaldehyde bounded formulations, foaming or hydrophobic Tensid compounds or as a N-source in biotechnological fermentation processes, distribution of a technology for the production of such basic materials from raw and residual materials.	animox.de
Aokin AG	
Aokin AG is a Berlin biotechnology company that is specialized in the development and commercialization of innovative analytical systems on the base of the rapid kinetic assay technology. The aokin systems are unique in their precision and operating speed. Areas of application are food and antibody analytics as well as clinical diagnostics. We also offer laboratory services in the area of food analytics, Pharmacoanalytics and chemical synthesis.	aokin.com
Applichrom GmbH	
AppliChrom produces chromatography media, columns and applications for HPLC, GPC, SEC, HILIC, Ion Exchange Chromatography, Ligand Exchange Chromatography, Ion Exclusion Chromatography. AppliChrom serves customers analysing biomolecules including biopolymers, technical polymers - from 100Da up to 40Mio Dalton. Short delivery times, high quality of chromatography columns (suitability/resolution/application, long-time-reproducibility, durability), pre- and after-sales service, liquid-chromatography seminars are available.	applichrom.de
Aptarion biotech AG	
Aptarion biotech develops biostable L-aptamers for the treatment of life-threatening diseases and for biosensors. Spearhead of our therapeutic strategy is AON-D21 that binds and inhibits complement protein C5a with a unique mechanism of action. Encouraging preclinical data in several disease models support the development of AON-D21 in acute inflammatory indications as well as in lung cancer	aptarion.com
ARGUS Umweltbiotechnologie GmbH	
ARGUS is a medium-sized company. Since 1987 ARGUS works on the field of remediation of contaminated groundwater, soil, waste water and waste air. ARGUS is able to elaborate a specific remediation program in each different pollution case considering economic aspects beside ecological aspects. All necessary treatment steps can be planned and carried out. The combination of microbiological steps with classic processes leads to a successful remediation of complex contamination.	argus-umwelt.de
ARK-Biodiversity GmbH	
In light of the undeniable dramatic global trend of a rapidly shrinking flora and fauna Ark Biodiversity was founded in 2019 with the clear focus on the development of technologies for the protection of biodiversity.	ark-biodiversity.com
Artemiflow GmbH	
Artemiflow is a spin-off from the Max Planck Institute of Colloids and Interfaces (MPIKG). By the industrial use of an international patent held by MPIKG, Artemiflow uses a new process to produce Artemisinin from dihydroartemisinic acid (DHAA). DHAA is available in abundance in the waste of the current production process for Artemisinin.	artemiflow.com
ASCA GmbH Angewandte Synthesechemie Adlershof	
ASCA is a partner for contract research in chemical synthesis. The development of new active structures on a laboratory scale is offered. In-house analytical facilities are available. ASCA also offers reference materials for analytical purposes. Our catalogue comprises more than 400 compounds and metabolites such as pesticides, API's, mycotoxines and plastic additives (native and labelled).	asca-berlin.de
Astra Biotech GmbH	
Astra Biotech GmbH offers high quality reagents, allergens, antibodies, recombinant proteins, and assays for the determination of hormones, allergies, tumour markers and infectious diseases. Quality is one of the key cornerstones on which Astra Biotech maintains its reputation and with which we strive to increase customer satisfaction and gain growing customer loyalty. We take great pride in our highest quality assays, which are all IVD compliant and therefore suitable for direct, accurate and reproducible diagnostic purposes, as well as for research.	astrabiotech.de
Athenion GmbH	
Athenion AG focuses on the development and distribution of high-quality products for the pharmaceutical and healthcare markets. We seek and identify promising developments of active pharmaceutical ingredients, new care and health products as well as exciting technologies.	athenion.com

ATLAS Biolabs GmbH	
ATLAS Biolabs is a leading European service provider of complex analyses in molecular genetics including next-generation sequencing and microarray services supplemented by high-level data analysis. In addition to the high standard and quality, a key benefit of using ATLAS Biolabs' service portfolio is the close relationship that we build to our customers during project planning and realization.	atlas-biolabs.com
Atlas Medical UG	
Development, supplier, manufacturing and international distribution of quality diagnostic and medical equipment like Diagnostic reagents and Kits for use in labs, clinics and hospitals. Specialised on Latex related kits, carbon-antigens, blood culture bootles, rapid tests and urine reagent strips, stains for microbiology and histopathology, ELISA kits, Drug-of-Abuse and Hometests (OTC) like Fertility Home Tests & General Health Screening Tests.	atlas-medical.com
Attomol GmbH Molekulare Diagnostika	
The company's aim is to develop, produce and distribute medical diagnostics for human medicine in the field of molecular genetics, infectious and autoimmune diseases.	attomol.de
AudioCure Pharma GmbH	
AudioCure is dedicated to the development of drug treatments for hearing disorders with a high unmet medical need. By protecting and restoring the cellular key players that are critical to the hearing process, our therapeutic approach goes beyond treating symptoms to tackle the root cause of the disorders.	audiocure.de
Aurora Europe GmbH	
Aurora Deutschland is a licensed pharmaceutical manufacturer, importer and wholesaler in the meaning the German Medicines Act and a licensed narcotics dealer in the meaning of the German Narcotics Act.	auroramedicine.com/de
Auto Tissue Berlin GmbH	
The company is engaged in the development, production and marketing of medical devices for cardiovascular surgeons. The products are specially made for the patients and have less side effects. The first certified product was a pulmonary heart valve (Matrix P) for the right ventricular outflow tract reconstruction (RVOT). The second product is also a heart valve which considerably shortens the operation time (Matrix P plus). Meanwhile a complete glutaraldehyde free valve is available called Matrix P plus N.	autotissue.de
AZ Biopharm GmbH	
Analytisches Zentrum (AZ)-Biopharm Berlin GmbH is an independent GLP and GMP certified contract research organization with a profound experience in the field of bioanalytics, pharmaceutical quality control for human and veterinary medications and the determination of physicochemical parameters of chemicals according to OECD guidelines. Providing customized analytical solutions from research & development to routine analytics, AZ Biopharm uses well established (USP, PhEur, JP,etc) to in house developed sophisticated analytical techniques. AZ Biopharm's bioanalytics offers for more than 20 years method development and validation according to FDA and EMA guidelines for tox, PK and BE studies with quick turnaround and unbiased quality.	az-biopharm.de
BASF Metabolome Solutions GmbH	
BASF Metabolome Solutions GmbH is a 100% affiliate of BASF SE. Formerly known as metanomics GmbH, a team of 50 scientists and technicians provides Metabolite Profiling, mass spectrometry-based compound analytics, and plant testing services to internal and external clients. Work is performed under ISO 17025-like and Good Laboratory Practice (GLP) quality standards.	basf.com
bbi-biotech GmbH	
In the focus of the activities of bbi-biotech lie systems for the sterile sampling from bioreactors for all applications in the biotechnology, pharmaceutical, food, cosmetics and chemical industry. In addition, bbi-biotech develops components - in especially disposable ones - for the preparation of a new generation of fermentors and bioreactors and offers consulting and planning services for biotech projects, its implementation and services.	bbi-biotech.com
Beacon Medical Germany GmbH	
ABcann Germany GmbH is the German affiliate of Canadian VIVO Cannabis Inc, an integrated supplier of cannabis. ABcann Germany GmbH has a pharmaceutical wholesale licence and has pending applications for GMP-import licences and narcotics licence. ABcann Germany plans to commercialize medicinal cannabis products in Germany and the EU.	abcann.de
BEB BioEnergy Berlin GmbH	
Planning, Design, Construction, Supervision and Implementation of Biogas/Hydropower plants, Preplanning, Feasibility Studies and Research activities in the field of renewable energies, Optimization of the process in existing biogas plants.	bebgmbh.de

Becanex GmbH	
Becanex GmbH extracts in Berlin-Adlershof Cannabinoids from Industrial hemp. Currently we focus on the production of CBD oil. The company uses its proprietary extraction technology that operates under low pressure and low temperature. Our extracts are "Real Full Spectrum Extracts" as we work with a one-step extraction process. The result is a mild tasting CBD Oil that contains the naturally occurring cannabinoids, terpenes and flavonoids from the hemp plant. We have a track and tracing system in place that provides our customers full transparency of our raw material supply back to the field.	becanex.com
Belano Medical AG	
BELANO medical AG researches and markets novel therapeutic approaches based on positively acting microorganisms, so-called specific microbial cultures. Patent-protected active ingredients are developed for applications in the fields of cosmetics, nutrition and health.	belanomedical.com
Belyntic GmbH	
Belyntic GmbH is a chemistry-for-healthcare enterprise focusing on the purification of peptides. Based on its proprietary "Peptide Easy Clean" (PEC) technology, Belyntic offers the world's first broadly applicable peptide purification kits. PEC enables first-in-class parallel purification and modification of difficult peptides with low ecological impact using catch-and-release methodologies.	belyntic.com
Berlin Cures GmbH	
The company's goal is to bring aptamers as new drug candidates against autoantibody-induced dilated cardiomyopathy and other autoantibody-associated diseases into the clinical application.	berlincures.de
BerlinAnalytix GmbH	
BerlinAnalytix is specialized in the in vitro and in vivo testing of various biomaterials. The in vitro testings are focused on the analysis of the cytocompatibility of biomaterials in accordance to the EN ISO 10993-5 using XTT-, BrdU- and LDH-assays and LIVE/DEAD-stainings. Moreover, the in vivo and clinical analyses include the histological assessment of soft and hard tissue samples and the application of specialized histochemical and immunohistochemical stainings, qualitative and quantitative data analysis, and scientific documentation.	berlinanalytix.com
BioAnalyt GmbH	
Bioanalyt develops and distributes the worldwide first easy-to-use and portable test kits for the analysis of vitamins and micro nutrients. The iCheck-iEx test kits enable food producers, food authorities and NGOs to monitor their ongoing food programs more efficiently and at low-cost. The company was founded in 2006 by Prof. Dr. F. J. Schweigert as a spin-off of the University of Potsdam. Read more on our website www.bioanalyt.com .	bioanalyt.com
BIOCYC Gesellschaft für Biotechnologie und Recyclingverfahren mbH & Co. Entwicklungs KG	
Production of bio-chemicals, peptides, in vitro-diagnostics, test-kits. Development of consumer service for peptides and biochemicals.	biocyc.de
BioGenes GmbH	
BioGenes GmbH, founded in 1992, is a worldwide acting full-service provider of customized antibody and immunoassay development with a strong commitment to quality and service. The company provides highly customized solutions for quality control of biological products (HCP), drug discovery, drug development, manufacturing of biologicals as well as for diagnostic purposes. BioGenes is a recognized partner of biotech and pharmaceutical companies all over the world.	biogenes.de
Bioline GmbH	
Our mission is to provide customers with a range of products which are fast and easy to use, guaranteed to work and developed by scientists who understand what our customers are trying to achieve so they can focus on their scientific goals. Bioline reagents are used by molecular biologists and other research scientists to perform test-assays and research in many fields from medical, biotechnology and marine biology.	bioline.com
Biolumo	
Biolum is made of biotechnologists and business professionals and our mission is to deliver the realistic and sustainable solution to precisely prescribe antibiotics for every patient.	biolumo.eu
BioMedion GmbH	
IT-Service for all GxP-Regulatory Tasks Data- and Document Management, Long-Term-Archiving and Digital Signature, SOP-Management, CAPA, Raw Data Management, Consulting for Validation of Computerized Systems according to GAMP4/5.	arivis.com/en/quality-management/quality-management
Biomes NGS GmbH	
Biomes NGS GmbH is a biotechnology startup that analyzes the DNA of microbes living in and on the human body with the Next Generation Sequencing Method. The results are personal microbiota profiles, based on which customers receive individual recommendations for improving their quality of life. The first product INTEST.pro is an intestinal flora self-test to combat gut flora complaints.	biomes.world

BIOPRACT GmbH	
Service and Additives (enzymes, trace elements, microbes) for biogas and waste water sludge treatment Enzyme analysis in agriculture industry Contract reserach feed additives.	biopract.de
BioRefinery.de GmbH	
Based on main precursors of plants, carbohydrates in kind of sugar, starch and cellulose, and proteins, the biorefinery.de company has developed four complex product lines (Biorefinery systems) which leads to a great number of valuable products with the help of chemistry and biotechnology.	biorefinery.de
BioRepro GmbH	
BioRepro is the first pharmac. company, whose core competency is the breeding of leeches under controlled laboratory conditions for medical therapies. We concentrate on the establishment of GMP breeding procedures and will be able to provide leeches with standardized quality while equally allowing scalability to supply medical demand. Additionally, through the re-initiation of fundamental research, we will gain deeper understanding of further potential in medical and cosmetic treatment areas.	biorepro.de
BIOSYNTAN Gesellschaft für bioorganische Synthese mbH	
BIOSYNTAN is focused on custom synthesis of peptides. As one of the leading specialists in the synthesis of linear and cyclic peptides with unusual residues and a multitude of modifications we can offer you an extensive range of services today. Our core area is the manufacturing of fluorescently labeled peptides for assay development and the synthesis of post-translationally modified peptides.	biosyntan.de
Biotechnologie Kempe GmbH	
We focus on development and construction of measuring and control equipment for applications in food and fermentation industries. In our separate programming department, highly specialized computer engineers develop systems for process computer aided automation in the field of fermentation industries.	biotechnologie-kempe.de
biotechrabbit GmbH	
biotechrabbit GmbH is determined to offer the newest and best life science products and innovative solutions to scientists leading the fight against disease and fueling our lives with innovations. We supply ultra pure enzymes and high-quality antibody services for diagnostics and a life science product portfolio (including reagents for PCR and nucleic acid purification) for molecular biology and proteomics. The biotechrabbit advantage is our combination of passion for excellent research with the agility of true entrepreneurship.	biotechrabbit.com
BioteCon Diagnostics GmbH	
BIOTECON Diagnostics has been well known as a qualified partner in the field of molecular and microbiology for the last 20 years. We focus on development, production and marketing of PCR-based rapid detection systems. BIOTECON Diagnostics offers solutions for the food and beverage industry, for the veterinary sector as well as for producers of pharmaceuticals and cosmetics.	bc-diagnostics.com
BioTeZ Berlin-Buch GmbH	
Partner for Solutions in Immunochemistry and Diagnostics: Products & Services: Customized DNA / RNA Primer and Modifications; Assay Development & Support for Manufacturer, Reagents / Systems for Detection and Immobilization; Immune Affinity Chromatography for Clean-up and Enrichment; Bio Conjugate Service; TDM; Human Proteases; IVD ELISA with Autoimmune Diseases; Research Projects	biotez.de
biotx.ai GmbH	
Biomedical data are difficult to analyze by reported Machine Learning approaches due to their high-dimensionality: small sample sizes and many features. Our approach is able to identify significant patterns, which can be used for novel diagnostics and therapies.	biotx.ai
BIOWORX	
BIOWORX offers services in the fields of contract research for customer-specific Biotransformations, the screening, isolation and production of Biocatalysts from microorganisms and plants and the bioanalytic syntheses. Further organic compounds and metabolites will be synthesized with enzymes for customer in kg scale.	bioworx.de
Birdotech Berlin GmbH	
Birdotech specializes in providing chemical building blocks, reference compounds, and custom synthesis for the purpose of pharmaceutical research and innovation. With a strong team of chemical development experts, our worldwide CRO & CDMO services of small molecules are reliable, cost-effective and on time.	birdotech.com
Blue Biolabs GmbH	
Blue Biolabs is a spin-off company from the TU-Berlin, which specialises in the development of products and services in the field of environmental analysis using methods of microbiology and molecular biology.	bluebiolabs.de
Bluu GmbH	
Bio-tech company Bluu Biosciences is the first company in Europe to specialize in the development and commercial production of cell-based fish. A pioneer at the interface of biotechnology and food technology, Bluu Biosciences is stepping up to produce high-quality, sustainable fish products from cell cultures.	bluu.bio

Bruker Nano GmbH - JPK BioAFM Center	
JPK Instruments AG is a world-leading manufacturer of nanoanalytic instruments - particularly atomic force microscope (AFM) systems and optical tweezers - for a broad range of applications reaching from soft matter physics to nano-optics, from surface chemistry to cell and molecular biology. From its earliest days applying atomic force microscope (AFM) technology, JPK has recognized the opportunities provided by nanotechnology for transforming life sciences and soft matter research.	jpk.com
BST Bio Sensor Technology GmbH	
BST develops and produces biosensors to provide high quality analysis at moderate prices. In 1982 BST brought on the market the first multi-way biosensor based blood glucose analyzer in Europe and is since then market leader in Europe. Today BST sells more than 60.000 sensors a year. Since 2008 BST is besides biosensors also manufacturer of POCT and laboratory instruments.	bst-biosensor.de
canostix GmbH	
Canostix is working on the development of a revolutionary blood test to diagnose cancer based on photonics and machine learning. Our method will facilitate the implementation of population-wide cancer screening for the most common cancers, enabling patients and doctors to recognize the disease early enough for a less invasive and more effective treatment.	canostix.com
Celares GmbH	
Specialist for drug delivery of peptides, proteins, nucleotides using various DD systems: PEGylation, PEG-b-copolymers, HPGs, and others. Covalent modification of biopharmaceuticals with PEGs or non-covalent drug delivery to improve pharmacological properties. Offers PaSmax® technology for synthesis of highly drug-loaded ADCs, and celaSTAR for multiplexing of biologics to increase affinity. Celares offers customized PEGylation solutions and synthesis of special polymers.	celares.com
Cell Receptor GmbH	
Cell Receptor is a small public company based in Geneva and Berlin developing new treatments for prevention of metastases in cancer and control of autoimmune disease. Patents granted in EU, U.S.A., Japan and Australia. A 3 year type II study in 6 German universities is in preparation. 6 Boardmembers. We seek partnerships. EU market exceeds € 2Bn.	cellreceptor.ch/de
Cell Science Systems GmbH (Alcat Europe)	
Cell Science Systems (CSS) offers the Alcat Test, an immune cell activation test to identify inflammation causing foods and diet related items by detecting cell changes. The diet modification has shown benefits with gastrointestinal disorders, metabolic syndrome, skin diseases, arthritis, migraine headaches, etc. It has been independently validated by Yale University and other institutions to discover links between immune induced injuries related to diet.	cellsciencesystems.com
Cellbricks GmbH	
Cellbricks developed a new Bioprinting technology which allows creating complex three-dimensional structures made of biological material. The company is specialized in Bioprinting services, creating tailor-made products to individual customer specifications – for example mini-organs for drug testing or tissues for regenerative medicine cultures as well as off the shelf products. With its profound experience Cellbricks empowers researchers to investigate functional human tissues for fundamental biological research or advanced regenerative therapies.	cellbricks.com
CellIDEG GmbH	
CellIDEG applies its unique membrane aeration technology to highly efficient cultivation systems for microalgae. Optimal CO ₂ mass transfer rates into photosynthetic cultures result in highest growth rates, cell densities and natural product concentrations. CellIDEG provides modular cultivation solutions that allow for fast and reliable production of biomass and is aiming to establish a new standard in lab scale and pilot scale cultivation to exploit the full potential of these organisms.	celldeg.com
CELLphenomics GmbH	
CELLphenomics is a contract research organization offering state-of-the-art in vitro services. Our patient-derived 3D cell culture organoid models provide deep insights in the biology of cancer and they are an excellent tool for testing novel anti-cancer drugs, new drug combinations and immune-oncology approaches. With more than 5 years of experience in organoid culture and high throughput drug screening, CELLphenomics has become one of the most trusted CROs in the field, serving customers from small biotech to big pharma. With our excellent infrastructure and highly skilled team, we are able to specifically develop the assays to our customer's scientific needs.	cellphenomics.com
CellServe GmbH	
CellServe is a service provider for research groups in regenerative medicine and fills an important gap in the conversion of applied treatment concepts from research into marketable products. Furthermore CellServe develops own innovative cell-based products for cardiology and uses novel cardiac derived cells ("From the Heart to the Heart") for the treatment of chronic heart failure.	cellserve.de

Celltainer Biosolutions GmbH	
Celltainer Biotech developed a multi-purpose single-use bioreactor, suitable for microbial fermentation as for fragile cells. This technology, combined with a unique bag design results in high-performance bioprocesses providing a high productivity at low costs for a wide variety of applications.	celltainer.com
CellTrend GmbH	
CellTrend is certified according to ISO 9001, ISO 13485 and GMP; CE labeled ELISAs for the determination of Antibodies against G-Protein-Coupled-Receptors (GPCR), Tyrosine Kinase Receptor (TKR) and Growth Factors (X-GF); Cell culture systems (CRO); Development and production of antibody-based detection systems (ELISA) Consulting (Qualified person)	celltrend.de
Centogene AG	
Centogene is a worldwide leader in the field of genetic diagnostic testing for rare hereditary diseases, with a broad test portfolio covering over 2800 genes, biochemical tests, biomarker and clinical whole exome sequencing and whole genome sequencing.	centogene.com
Central BioHub GmbH	
Central BioHub is the online marketplace for human biospecimens. We connect life science researchers and biospecimen suppliers worldwide on one platform. Intelligent filter options (parameter, disease, donor information etc.) make biological sample sourcing efficient and accelerate medical research. Our easy, transparent and compliant processes cut down your procurement efforts from months to minutes.	centralbiohub.com
CheckImmune GmbH	
CheckImmune is providing biomarker studies with focus on novel immunotherapeutics (small molecules, biologics, Advanced Therapy Medicinal Products – ATMPs) and immunological challenges in other medical areas. CheckImmune offers consultancy and laboratory services to support clinical development from preclinical studies to clinical trials. The service includes the development, validation and application of immunological biomarkers for de-risking new drug developments and stratification of patient groups. Available technology platforms are Flow Cytometry, Multiplex Ligand Assays, Anti-Drug Antibody Assays and Functional Assays. The laboratory has an accreditation according to DIN EN ISO 15189 and DIN EN ISO/IEC 17025.	checkimmune.com
ChemBio Diagnostics GmbH	
OpTricon develops and produces mobile readers for quantitative analyzes of Immunoassays for Point-of-Care-diagnostics, especially Lateral Flow Assays (LFA). Additional business segments are components and Systems for signal transmission and sensors for Ibioanalytics. opTricon develops the devices in partnership with the customers and works as OEM-suppliers and is certified by TÜV Rheinland according to EN ISO 13485:2003+AC: 2007 and EN ISO 9001:2008.	optricon.de
chemicell GmbH	
Chemicell develops and produces magnetic, fluorescent and coloured nano- and microparticles, reactive fluorescent dyes and special chromatography-materials for the separation or detection of cells, bacteria, viruses, proteins or DNA/RNA and new gene transfer systems.	chemicell.com
CHIPRON GmbH	
Chipron GmbH specializes in production and distribution of array based detection systems for DNA/pathogens.	chipron.com
Chiracon GmbH	
chiracon is a qualified partner to develop chiral intermediates at a constant high quality for innovative drugs regarding economic, environmentally acceptable and scaleable aspects. We offer support through expert knowledge and key technology to meet your increasing needs. Our core competence is chirality. In addition we have a broad variety of chiral building blocks as an inhouse raw material source for high-level API production and development.	chiracon.de
CMZ-Assay GmbH	
Marketing of diagnostic reagents for measuring concentrations of proteins, hormones and their isoforms, exclusively for research purposes.	cmz-assay.com
co.don® AG	
CO.DON AG develops, produces and distributes autologous cell therapies for the minimally invasive repair of cartilage defects. The cell therapy product uses only the patient's own cartilage cells ("autologous chondrocytes") and has been used in over 200 clinics to treat more than 14,000 patients In July 2017 the company received EU marketing authorisation for its articular cartilage product, named Spherox. The shares in CO.DON AG are listed on the Frankfurt Stock Exchange (ISIN: DE000A1K0227).	codon.de
Condio GmbH	
We develop and produce natural stabilizers and food ingredients tailor-made to your needs. We deliver solutions for your products and optimize recipes and technologies.	condio.com

CONGEN Biotechnologie GmbH	
CONGEN is specialized in food testing by molecular analytics based on DNA and RNA detection. CONGEN has been a pioneer for over a decade in the development and application of food and feed analytics by real-time PCR. The methods are available as complete analytic kit as well as a Service. Our mission is to serve the food industry with an excellent service and with standardized and reliable test kits in order to realize highest possible food safety and food quality.	congen.de
Cyano Biotech GmbH	
Cyano Biotech develops bioactive Natural Products from cyanobacteria towards active ingredients for the pharma-, agro- and cosmetic industry. Using its proprietary platform technology the company focuses on novel, patented payloads of Next Gen Antibody-Drug Conjugates (ADC).	cyano-biotech.com
Demecan GmbH	
DEMECAN GmbH is a company founded in 2017 and based in Berlin, whose object is the cultivation, further processing, storage, packaging and delivery of cannabis for medical purposes.	demecan.de
DendroPharm GmbH	
Dendropharm GmbH develops and manufactures novel excipients to improve the solubility, bioavailability and drug-targeting of API. Our technology reduces unwanted side effects for transdermal and parenteral formulations and increases drug efficacy significantly. DendroPharm offers synthesis of speciality polymers, formulation support and the manufacturing of GMP grade clinical trial samples for semi-solid and liquid administration forms.	dendropharm.de
DexLeChem GmbH	
We are experts in the reactivation of complex chiral catalysts. For the first time the unmodified homogeneous catalyst can be re-used repeatedly thanks to our innovative water based process. Supported by quantum chemical analysis we are able to simulate catalytic cycles. Combined with our special knowhow this enables us to find the best solvent system for our customers. By using this new resource-efficient reaction route our customers – manufacturers of active pharmaceutical ingredients (APIs) and fragrances – gain two advantages: reduction of production costs and a more sustainable process.	dexlechem.com
Diaglobal GmbH	
Development, production and distribution of in vitro-diagnostics for analytical purpose and the distribution of medical products.	diaglobal.de
Diamond Inventics GmbH	
diamond inventics develops paper-based complete solutions for digitized laboratory analysis - the laboratory on paper. The focus is on mobile analysis. The standardization of laboratory processes on paper reduces risks and conserves resources.	diamondinventics.com/de
DIZG Deutsches Institut für Zell- und Gewebeersatz gGmbH	
DIZG is a Berlin-based manufacturer of human tissue transplants. The institute manufactures allogenic bone, skin, tendon, Fascia lata and amnion transplants. It also provides an autologous skin transplant service that is primarily focused on life-saving treatment of patients with large area severe burns. DIZG also conducts transplantation-based research and actively develops new transplants.	dizg.de
Dr. Götz Verfahrenstechnik Biotechnik Umwelttechnik	
Contract research and contract manufacturing using bacteria, yeasts and fungi.	drgoetz.de
Dr. Lerche KG	
Innovative company engaged in development, production and marketing of specialized microcapsules for bio- and medical technology – Development and production of novel DNA-Purification-Kits with proprietary technology – Production and marketing of microcapsules (LUMiTainer), microbeads and cell based sedimentation standards for blood analysis (Sedi-Val ESR standards) – Encapsulation of cells – Contract analysis for characterization of microcapsules, porous membranes and hollow fibres.	lerche-biotec.com
Dr. Otto GmbH	
Handling with research and development of ecological products its process of development also its production and marketing – Production and refinement of plantingredients – Operate an analytical laboratory of renewable resources and chem. Analysis.	dr-otto-gmbh.de
Dr. Rölleke Labor für Genetische Analytik GmbH	
Dr. Roelleke is specialized on the identification of microorganisms, particularly in the area of food safety. Furthermore, Dr. Roelleke is authorized expert on paternity tests for courts and the private sector.	dr-roelleke.de

E.R.D.E.-AAK-Diagnostik GmbH	
The laboratory specializes in the diagnostic of agonistic autoantibodies in Dementia, DCM, Hypertension, Diabetes Typ 2, Allograft Rejection, Dialysis assoc. Diseases, Glaucoma and POTS. The laboratory has 3 validated independent test methods for the analysis of agonistic autoantibodies. Patients will benefit - at a given agonistic autoantibodies indication from personalized, specific medicamentous therapy which accounts for the autoantibodies induced malfunction of receptors. Numerous publications have described the pathological potential and prevalence of agonist autoantibodies. All publications are available on our homepage.	aak-diagnostik.de
Eagle Genomics	
Eagle Genomics is a global Deep Tech software business with a location in Potsdam Science Park, Germany. Its award-winning AI-augmented knowledge discovery platform, e[datascientist], integrates and streamlines access to datasets and facilitates multi-causal analysis of multiomics data. In this way, the platform allows scientists to efficiently exploit multi-dimensional data, gaining insights in minutes rather than months. The company is also building a global knowledge partner network with key microbiome research institutions.	eaglegenomics.com
emp BIOTECH GmbH	
Production of fluorescent dyes and chemiluminescent reagents. Contract chemical synthesis of small molecules. Contract labeling and purification of proteins, antibodies and oligonucleotides. Production of size-exclusion gels, columns and filter plates. Production of high quality reagents for DNA synthesis.	empbiotech.com
engine GmbH	
We provide a range of protein arrays with up to 27,648 in situ expressed proteins enabling you to perform autoantibody profiling and biomarker discovery or to explore protein/DNA/RNA-protein interactions. Our arrays can be customized to meet your needs with respect to number and type of protein as well as specific modifications thereof (e.g. citrullination). We set value on a dedicated scientific support.	engine-gmbh.de
Epigenomics AG	
Development and commercialization of innovative molecular diagnostic test products based on DNA methylation for cancer screening and for cancer specialty applications.	epigenomics.com
Epimune GmbH	
Epimune is a molecular diagnostic company pioneering epigenetic immune cell quantification. Using a drop of fresh, frozen or dried blood, Epimune's tests detect primary immunodeficiencies in newborns, children, and adults, to enable early and effective treatment. The company also develops products to diagnose Non-Hodgkin Lymphoma and to predict graft versus host disease and graft rejection.	epimune-dx.com
epinamics GmbH	
Epinamics GmbH, a newly established Berlin based pharmaceutical research and development dedicated company, is owner of a proprietary film forming formulation technology platform, the Invisible Patch system. The system is offering a broad basis for the development of formulations for treatment of dermatological diseases as well as for the development of transdermal systems.	epinamics.com
Epiontis GmbH, part of Precision for Medicine	
Precision Medicine Group is an integrated team of experts in fields from advanced lab sciences to translational informatics, clinical trial delivery, and regulatory affairs, payer insights to marketing communications. Together, we help our pharmaceutical and life-sciences clients conquer product development and commercialization challenges in a rapidly evolving environment.	epiontis.com
Epo Experimentelle Pharmakologie & Onkologie GmbH	
Based on a more than 20 years experience, EPO offers comprehensive service for the preclinical development of new cancer and immune therapies with more than 500 well characterized and humanized tumor models. EPO is your partner for tumor imaging and radiooncology research. The company provides experimental pathology and histopathology services and consultation. EPO is an attractive partner for pharmaceutical companies, biotech, and research institutions.	epo-berlin.com
Eternygen GmbH	
Eternygen is a Berlin based start up founded in June 2012 focusing on research, development and marketing of innovative drugs using a network of renowned scientists and contract research organizations. The main focus of Eternygen's development and core competences of its founders are research and development of new drugs for dietary-related metabolic diseases with dramatically increasing prevalences in the last decades.	eternygen.com
Eurofins SOFIA GmbH	
For over 25 years, Eurofins SOFIA GmbH has been offering high quality analyses in the fields of pesticides and organic contaminants. Our core competence lies in the analysis of grains, oils and oil seeds, hops, dried herbs and other difficult matrices as well as water and soil. There are 1,500 substances in our portfolio and we will be happy to prepare a special package of analyses to meet your needs.	eurofins.de

EUROVIR® Hygiene-Institut	
Laboratory service for testing the efficiency of products against viruses (virucides) and of processes for inactivating or eliminating viruses (virus safety).	eurovir.de
Evestra GmbH	
EVESTRA is a newly founded biotech company focusing on developing female health products. The company's expertise resides with steroid chemistry and biology. EVESTRA's product pipeline includes products for contraception, hormone replacement therapy, gynecological disorders and hormone dependent cancers.	evestra.com
EVIG GmbH	
EVIG Group is a company builder and impact investor in the alternative protein space. Together with pioneering scientists and entrepreneurs, EVIG builds and invests in companies to transform the global food system. EVIG's focus is on approaches that have technology and science at their core, while having the potential to truly displace animal-derived products.	evig.group
evoxx technologies GmbH	
evoxx technologies is an industrial biotech company focusing on the development and production of industrial enzymes and development of oligosaccharides and polysaccharides to be primarily used in food applications. They are specifically targeting ingredients that offer consumer health benefits. evoxx has a team of about 40 scientists and technicians and two sites in Germany, Monheim am Rhein and Potsdam.	evoxx.com
Fast BT UG	
Fast BT through its unique molecular detection technology intends to empower clinicians to quickly act and initiate early intervention measures by providing accurate diagnostic quantification of infectious agents and clinically relevant biomarkers within complex physiological fluids such as blood, urine, sputum, etc.	fastbiotech.com
fermtec GmbH	
Development of non-alcoholic beverages, beers and beer mix beverages, lactic acid fermentation, innovative foods and beverages and auxiliary substances for the food industry.	fermtecgmbh.de
Formula Pharmazeutische und chemische Entwicklungsgesellschaft mbH	
Galenic development of liquids and solid formulations Lyophilization Technology also applicable for biochemical products Granulation, drying and coating using fluid bed drying-technology, tableting Development and validation of analytical methods including UPLC Stability testing (ICH / GMP related to on going) Import of medicinal products from non-EU-countries, manufacturing, quality control (re-test) and release for market in accordance with §16 AMWHV for medicinal products and clinical supplies GMP-certificat / Manufacturing license in accordance with §13 AMG.	formula-pharma.de
Frankenförder Forschungsgesellschaft mbH	
The Frankenförder Forschungsgesellschaft is a research partner for small and medium-sized enterprises and mainly deals with research and development projects in the core competencies of agriculture, veterinary medicine and nutrition.	frankenfoerder-fg.de
GA Generic Assays GmbH	
Development, manufacturing and distributing of in vitro-tests, focussing on autoimmune diseases, hereditary and infectious diseases.	genericassays.com
Gematria Test Lab GmbH	
GEMATRIA Test Lab GmbH is an expert in free radical research. By using Electron Spin Resonance (ESR) spectroscopy we offer analytical support and claim substantiation for cosmetic, pharmaceutical and nutritional products and technologies. Peroxidation processes, antioxidant performance, selection of raw materials, shelf life prolongation of sensitive products, performance of sunscreens, penetration of actives into skin and hair and anti-pollution efficacy are examples of our broad spectrum of experience.	gematria-test-lab.com
GENETEK BIOPHARMA GmbH	
Through our production of high quality genetic diagnostic kits – for hereditary genetic diseases and chromosomal anomalies detection and our efficient Human DNA profiling kits, used in forensics and/or kinship issues, we envision a better society, bringing safety and assurance to the world we live in.	genetek-biopharma.com
GenExpress Gesellschaft für Proteindesign GmbH	
GenExpress is a flexible company providing services in molecular biology. For over a decade we have successfully worked for customers in clinical laboratories, research institutions and the industry. We offer cloning of PCR targets, preparation of synthetic genes, expression of proteins, evaluation of LightCycler® assays, furthermore production of internal controls and standards for Real Time PCR systems, also cloning, expression and purification of proteins.	genexpress.de

Genosynth GmbH	
GenoSynth GmbH is a “Chemistry-R&D” company, which was founded by team of experienced scientists and business developers. We offer our professional expertise and services in chemical research and synthesis of organic compounds. Your partner, driving for success.	genosynth.com
GILUPI GmbH	
GILUPI is a medical diagnostics company with an initial focus on the prenatal and cancer market. The company is developing an innovative new diagnostic product based on nanotechnology. Our goal is to catch specific cells, which can be found only in very low concentration in the blood. The first application for our new nanosensor device will be prenatal diagnoses of chromosomal aberration out of maternal blood. The second application will focus on the early diagnosis of cancer.	gilupi.com
Glyco Universe GmbH & Co. KGaA	
GlycoUniverse GmbH & Co KGaA is a technology spin-off of the Max Planck Institute of Colloids and Interfaces. Registered on 10th October 2013, the company deals with the automated development and synthetic production of complex sugars and is seeking customers and collaboration with leading scientific institutes in Europe and world-wide.	glycon-biochem.eu
GLYCON Biochemicals GmbH	
Production of carbohydrate components used for the synthesis of new pharmaceutical compounds or diagnostics.	glycouniverse.com
Glycotope GmbH	
Glycotope is a leading company in glycomics and immunotherapeutics. It has developed novel therapeutic antibodies and unique platform technologies to optimize the glycosylation of new biological entities. Glycotope Biotechnology, with 25 years of experience in GMP-production, enables us to offer the entire process of biopharmaceutical development with a dedicated focus on our unrivalled expertise in protein glycosylation from the gene to production and fill & finish of clinical grade material.	glycotope.com
GQ Biotherapeutics	
GQ Biotherapeutics is a biotech company focused on the development of innovative gene therapies for treatment of musculoskeletal disorders. GQ uses its unique gene therapy platform to establish sustained production of therapeutic proteins locally in the tissues or organs where they are needed. Currently, GQ is developing disease-modifying gene therapies for osteoarthritis and intervertebral disc degeneration – both indications for which currently only symptomatic medical treatments are available. GQ is headquartered in Hamburg, Germany and has sites in Luckenwalde (Brandenburg), Germany and Liège, Belgium.	genequine.com
HealthTwist GmbH	
HealthTwist is a service provider for “Genetic Contract Research” in the fields of Functional Genomics, Epigenetics, Proteomics or Functional Food / Nutraceuticals. In particular, HealthTwist is offering access to extensively characterized human subjects and samples as well as prospective studies in twins, together with know-how in the analysis of complex genetic traits. Furthermore, database development, data management and statistical analyses for clinical projects are provided.	healthtwist.de
HS Diagnostics GmbH	
Based on our TCRsafe® system we offer a quantitative, contamination protected deep sequencing of the entire T-cell receptor beta (TCR) repertoire in blood, healthy tissues and cancer samples for humans and mice. Moreover, making use of our proprietary technology for tumor specific TCRs, HSDiagnostics is partnering in projects for targeted discovery of tumor antigens.	hsdiagnostics.de
hybrotec GmbH	
Hybrotec GmbH is specialized in the development of monoclonal antibodies and immunoassays (preferably homogenous assays) as customs service. Our main focus lies on antibodies binding low molecular weight substances (e.g. toxins, fluorophores, hormones) as well as antibodies against novel proteins.	hybrotec.com
IDrug GmbH	
IDrug supports business strategies with innovative methodologies in analytical and biopharmaceutical chemistry	idrug.de
Ifp Institut für Produktqualität GmbH	
Ifp Institut für Produktqualität is an accredited and GMP-certified laboratory for state-of-the-art analyses for the food, water and pharmaceutical industry. The company functions as a competence centre for comprehensive analytical services. It also develops and produces innovative, worldwide distributed products for the detection or determination of vitamins, allergens, pathogens, GMO and other substances.	produktqualitaet.com

IGV Institut für Getreideverarbeitung GmbH	
The range of services offered by the Biotechnology Division of the private research IGV GmbH institute is based on 25 years of experience in R&D for the cultivation of phototropic micro-organisms. Excellent, worldwide contacts to biomass producers, food producers, to the pharmaceutical and cosmetics and energy industry provide the fundament for innovative, market-oriented developments. In focus are development of photo bioreactor technology and active substances from algae.	igv-gmbh.de
IKDT Institut Kardiale Diagnostik und Therapie GmbH	
IKDT was founded in August 2002 in Berlin-Steglitz and is one of the leading laboratories on Viral Infections of Heart Muscle Tissue and Dilated Cardiomyopathy (DCM) in Germany. IKDT lab is performing a comprehensive molecular diagnostic examination of endomyocardial biopsies as one of a limited number of specialized cardiological labs worldwide. Its service enables physicians firstly to start an efficient, pathophysiologically based causal therapy.	ikdt.de
illumina Solution Center Berlin	
At Illumina, our goal is to apply innovative technologies to the analysis of genetic variation and function, making studies possible that were not even imaginable just a few years ago. Illumina innovative sequencing and array technologies are fueling groundbreaking advancements in life science research, translational and consumer genomics, and molecular diagnostics.	emea.illumina.com
Immutep GmbH	
We are a biotechnology company developing novel immunotherapy treatments for cancer and autoimmune disease. We are the global leader in the understanding of and in the development of therapeutics that modulate Lymphocyte Activation Gene-3 ("LAG-3"), a cell surface molecule which plays a vital role in regulating T cells.	immutep.com
In.vent DIAGNOSTICA GmbH	
in.vent DIAGNOSTICA GMBH is a biomedical company. We are focused on the project-oriented provision, processing and distribution of biological raw material for development and production of diagnostics and control material. We are your reliable partner for the customised development of assays for medical in vitro-diagnostics.	invent.bio
inbion GmbH	
inbion GmbH provides services to support research in the interface between university, students and industry. For companies, we provide the benefit of outsourcing projects quickly and cost-efficiently to competent teams. Cooperation with research groups in the university is also facilitated, so that targeted knowledge transfer can take place here.	inbion.de
Institut für Medizinische Molekulardiagnostik (IMMD) GmbH	
Gene tests for prenatal, predictive and tumor -diagnostics.	immd.de
Invicol GmbH	
Invicol develops a platform technology for the isolation of rare circulating cells and exosomes from the peripheral venous blood stream. The minimally invasive medical device can be coated with different antibodies to target specific antigens present on the target cells. The quantification and characterization of these cells can be used to personalize patient treatment in cardiology and oncology.	invicol.com
Invitek Molecular GmbH	
Invitek Molecular develops and commercializes tailor-made nucleic acid purification solutions that enable DNA/RNA extraction from virtually any sample material. We provide customized development and contract manufacturing services to in-vitro diagnostics companies. Our custom and industrial solutions cover all challenges from the idea up to the realization of a marketable product according to CE-IVD. We are passionate to create success for your project.	invitek-molecular.com
InVivo Biotech Services GmbH	
As a contract manufacturing company (CMO) InVivo offers a wide range of services: the development and production of monoclonal antibodies and recombinant proteins for diagnostic and pre-clinical use, stable cell line development (hybridoma and CHO cell lines) and transient gene expression in HEK and CHO cells. We are an ISO9001:2015 and ISO13485:2016 certified company.	invivo.de
InvivoContrast GmbH	
InvivoContrast provides globally high quality MRI (Magnetic Resonance Imaging) contrast agents and professional support for preclinical imaging in academic and commercial institutions.	invivocontrast.com
IOM Innovative Optische Meßtechnik GmbH	
Fluorescence Assay Solutions and Instrumentation (Microplate Readers).	iom-berlin.de

JPT Peptide Technologies GmbH	
JPT is an ISO 9001:2008 certified provider of innovative peptide products and services and a partner for research projects focusing on the development of novel immune therapeutics & diagnostics, profiling of various enzyme classes and proteomics. JPT has developed a portfolio of proprietary technologies and a series of unique products which support a worldwide customer base. Since 2011 all catalog products such as peptide microarrays & peptide pools are available through an online shop.	jpt.com
KNAUER Wissenschaftliche Geräte GmbH	
KNAUER HPLC, UHPLC and FPLC systems as well as columns are used for research and development, quality control and purification laboratories around the world. Customers are typically governmental and industrial organizations as well as universities. Fields of application are wide-ranging and include pharmaceutical and medical research, analysis of foodstuffs and cosmetics, as well as environmental analysis. The KNAUER biochromatography solutions for proteins focus on high purity separations. Systems range from small bench-top LC up to simulated moving bed LC systems.	knauer.net
L.U.M. Gesellschaft für Labor-, Umweltdiagnostik & Medizintechnik mbH	
LUM GmbH headquarters are located in Berlin, Germany. The company has an application laboratory in France and subsidiaries in the USA, China and Japan. Scientific and measurement-technology expertise has been obtained for decades in: • Particle characterization • Analysis of suspensions and emulsions • Determination of adhesive and bonding and strengths • Quality assurance and process optimization.	kairos.de
Labforward GmbH	
Die Labforward GmbH entwickelt und vertreibt Digitalisierungslösungen und Software für Forschungs- und Analyselabore. Unser Produkt labfolder ist eine Daten-Management Plattform für Labor-Teams und mit unserem Produkt cubuslab stellen wir eine IoT Lösung für Labore zur Verfügung, mit der herstellerübergreifend Laborgeräte überwacht und Daten erfasst werden können. Unsere Lösungen werden von mehr als 160 Kundenorganisationen weltweit genutzt (darunter namhafte Forschungsorganisationen wie Charité, Max-Planck-Gesellschaft, NIH, Bayer, BASF, WuXi AppTec und viele weitere). Um unsere Kunden in der Digitalisierung zu unterstützen, arbeiten wir mit renommierten strategischen Partnern zusammen.	labforward.io
Labor Berlin – Charité Vivantes GmbH	
Labor Berlin Services is the service subsidiary of Europe's largest hospital laboratory for clinical pathology and offers complete solutions for any kind of testing for the ivd industry, CROs, the pharmaceutical industry, life science companies and research facilities, while Labor Berlin is the exclusive laboratory partner of Charité – Universitätsmedizin Berlin and the Vivantes Network for Health. Labor Berlin and Labor Berlin Services both perform over 35 million analyses in clinical pathology per year and provide the diagnostic services for approximately 400.000 in-house patients a day and some one million out-patients per year.	laborberlin.com
Leonyte Biosystems GmbH	
Leonyte Biosystems develops cutting-edge technologies to provide you with real-time bacteria tests. The technology is currently focused primarily on Food Safety, but the potential is far beyond that.	leonyte.com
LGC Genomics GmbH	
LGC Genomics is the division of LGC with specific expertise in high quality, cutting-edge genomic and related services and products. LGC Genomics delivers:- Next generation sequencing services- DNA sequencing- Genomics services- Nucleic acid extraction services- DNA extraction products. LGC is an international science-based company and market leader in analytical, forensic and diagnostic services and reference standards (www.lgc.co.uk).	kairos.de
LGC GmbH	
Production of calibration substances for purity testing of drugs.	lgcstandards.com
LifeGlimmer GmbH	
Life Glimmer is a customer-oriented consulting and contract research company with the goal of providing the biotechnological, biomedical and environmental research communities an efficient way to outsource scientific modeling and computing needs.	lifeglimmer.com
Limetec Biotechnologies GmbH	
The core competence lies in the development of high-speed and high-quality proof systems for the detection of pathogens, as well as in the allelic discrimination of hereditary diseases. All products are marked with the CE-Certificate. The second area of expertise is the creation of communication networks which connect out-patient and hospital patient treatments, intensify data exchange and provide information to all health institutions, thus establishing partner relationships between them.	limetec-biotechnologies.de
LXP Group GmbH	
LXP Group GmbH is active in the development, marketing and licensing of technical solutions for the recycling of plant residues under the conditions of closed carbon and mineral cycles.	lxp-group.com

M2-Automation	
We will provide you with the perfect tailored solution to your automation needs, when you choose to share in the benefits of our experience and expertise in biotechnology engineering, development and applications.	m2-automation.de
MagForce AG	
MagForce AG is a leading medical technology company focusing on nanomedicine in oncology. The company's proprietary procedure, NanoTherm® therapy, enables the targeted treatment of solid tumors through the intratumoral generation of heat via activation of magnetic nanoparticles. NanoTherm®, NanoPlan®, and NanoActivator™ are components of the therapy and have received EU-wide regulatory approval as medical devices for the treatment of brain tumors.	magforce.com
MedInnovation GmbH	
MedInnovation GmbH has developed a new method and a special ESR-analyzer, which for the first time allows a simple routine laboratory test for evaluation of functional characteristics of plasma proteins. This albumin-functionality test opens a reliable possibility for cancer diagnostic as well as for disease progression monitoring of patients with liver diseases or sepsis.	medinnovation.de
Medipan GmbH	
Development, manufacturing and international distribution of radioactive (125J-IRMA) and non-radioactive (Elisa) in vitro-diagnostic tests, covering the field of Autoimmunity, mainly in Thyroid and Diabetes Typ 1 and automated interpretation of cell-based immunofluorescence tests by the AKLIDES system.	medipan.de
MerLion Pharmaceuticals GmbH	
The business purpose of the Company is the research, production, optimization and the development by way of pre-clinical as well as clinical trials of new molecules for the treatment of infectious diseases.	merlionpharma.com
Metasysx GmbH	
MetaSysX GmbH offers comprehensive system biology analytics. Our services ranging from metabolomics (metabolite and lipid), proteomics (targeted and un-targeted), protein-small chemical molecule interaction and validation (targeted and un-targeted) and genomic as well as transcriptomic analysis (NGS outsourced). In our laboratories, biotechnology meets the computer science and applied mathematics.	metasysx.com
MetrioPharm AG	
MetrioPharm AG is a pharmaceutical development company, working on the first targeted therapy against chronic inflammatory diseases, which has an outstanding safety profile. Degenerative age-related diseases are triggered by chronic inflammation. MetrioPharm's development strategy focuses on these inflammatory conditions (Inflamm-Aging). MetrioPharm AG is based in Zurich with a research facility in Berlin.	metriopharm.com
mfd Diagnostics GmbH	
The mfd Diagnostics GmbH (BT Luckenwalde) is a life science research and development company for diagnostic and therapeutic application of innovative laser technologies. The main advantages of the developed technologies are the non-/minimally-invasive measurement methods, the non-artificial approach and the possibility of real-time measurement. Therefore, those are promising tools for the diagnosis and therapy monitoring in the neurological practice and in the perinatal surveillance.	mfd-diagnostics.com
micro resist technology GmbH	
We are a leading company in the development and production of innovative photoresists, polymers and photopolymers as well as complementary process chemicals for lithographic manufacturing processes in micro- and nanostructuring. We offer materials for key technologies such as microsystems technology, photonics, micro- and nanotechnology, nanoimprinting as well as life sciences, micro fluidics and 3D-printing. As a company actively performing R&D in these fields we are interested in cooperation.	microresist.de
MicroDiscovery GmbH	
MicroDiscovery GmbH is a leading provider of high quality software for biomolecular research, innovative diagnostics and personalised medicine. The Company also develops hardware tools in the area of innovative diagnostics, biomedical research and personalized medicine. MicroDiscovery GmbH is ISO 9001 certified by TÜV Rheinland and has a strong track record in creating software systems in accordance with relevant regulatory directives for the life science and IVD industry. Customised services ranging from biostatistical data analysis to bioinformatical design and support of complex research projects complete the product line of MicroDiscovery.	microdiscovery.de
microParticles GmbH	
Development, manufacture, surface modification and characterization of mono-disperse polymer particles in the nano- and micrometer range. In addition to classic polystyrol and polyacrylate-based polymer particles, microparticles GmbH has launched new melamine resin particles on the market with exceptional chemical and physical qualities. The main areas of application are in particle measurement technology, medicine, biochemistry and microelectronics etc.	microparticles.de

Minerva Analytix GmbH	
Minerva Analytix GmbH is a leading analytical service lab for the control of microbial contamination. Our core competence lies in the control of mycoplasma, bacteria and viruses in cell cultures and biopharmaceuticals	minerva-analytix.com
Minerva Biolabs GmbH	
Minerva Biolabs develops and produces IVD kits for diagnosing pathogens and for contamination control, especially mycoplasma in cell cultures and biopharmaceutical products. Minerva Biolabs is also active in ensuring water quality with sensitive processes for detecting legionella. Our distributors ensure that our products are available worldwide, quickly and at a good price.	minerva-biolabs.com
MINT Engineering GmbH	
MINT Engineering GmbH manufactures photobioreactors for the cultivation of algae.	mint-engineering.de
MLB Mikrobiologisches Labor GmbH	
Accredited test laboratory for drinking water, clean rooms, sterility, bioburdens, D-PL-13398-01-00, EN 17025. Accreditation according to VDI 6022.	mlb-mikroberlin.de
MoKi-Analytics GmbH	
MoKi Analytics GmbH offers services and products for the molecular detection of microorganisms using FISH (Fluorescence in situ hybridization). Our expertise is the sensitive and specific visualization and quantification of microbial biofilms in tissue samples and in vitro models. This includes measurement of the effectiveness of antimicrobial substances against biofilms, for example on coated implants or medical surfaces.	moki-analytics.com
Molnar-Institut für angewandte Chromatographie	
Founded in 1981, Molnár-Institute develops DryLab®, a software for sophisticated U(H)PLC method development. Analytical scientists use it to model chromatographic interactions, retention times, robustness while conforming to QbD standards. Being registered vendor to US FDA, CDC, and other agencies, Molnár and DryLab® have pioneered Analytical Quality by Design long before regulatory agencies worldwide encouraged QbD submissions. Widely implemented among thought leaders, DryLab® contributes substantially to the paradigm shift towards a science-based perspective on HPLC quality management.	molnar-institute.com
moloX GmbH	
moloX GmbH is a company focusing on custom protein production in bacterial and insect cell expression systems and subsequent protein purification to ultra-high purity. On customer demand a team of experts can perform protein crystallization experiments and determine the 3D structure of target proteins by X-ray crystallography.	molox.de
MRI.TOOLS GmbH	
MRI.TOOLS's main focus is the development, sales and services of innovative hardware and novel technology for magnetic resonance imaging (MRI), computed tomography (CT) and positron emission tomography (PET). Our product portfolio encompasses enabling radiofrequency (RF) coils tailored for a broad range of applications, devices designed for reliable cardiac gating of imaging plus accessories that will make your daily life more comfortable. MRI.TOOLS is also very proud to offer consulting services such as validation and certification of medical devices.	mritools.de
Myelo Therapeutics GmbH	
Myelo Therapeutics GmbH develops innovative treatments in areas of high unmet medical needs.	myelotherapeutics.com
Nanolytics Gesellschaft für Kolloidanalytik mbH	
We are a contract laboratory specializing in the physico-chemical characterization of pharmaceutical proteins, biopolymers, nanoparticles and colloidal systems. Our core-competences are Analytical Ultracentrifugation, in combination with Static and Dynamic Light Scattering as well as spectroscopic (CD, fluorescence) and thermodynamic techniques (ITC, DSC).	nanolytics.de
Nanolytics Instruments GmbH	
Nanolytics Instruments has emerged from Nanolytics, a company committed to analytical services on nanoparticles and macromolecules, both synthetic and biological. Analytical Ultracentrifugation has been Nanolytics' core competence from the start in 1999.	nanolytics-instruments.com
nanoPET Pharma GmbH	
As a technology and service provider to the biopharmaceutical industry, nanoPET Pharma focuses on the R&D, production as well as marketing of innovative agents for Diagnostic Imaging. The company offers an exciting product portfolio of specialized preclinical imaging agents covering the principal diagnostic modalities (MRI, CT, Ultrasound and Optical Imaging) under the brand name Viscover™ (www.viscover.berlin). With more than 20 years experience in the field of diagnostic imaging, the company also offers consulting and contract research services. In addition, nanoPET Pharma pursues the clinical development of its patented core technology platform of inorganic nanoparticle PET tracers.	nanopet-pharma.com

new/era/mabs GmbH	
new/era/mabs GmbH provides all-round solutions for the generation and characterization of murine, camelid and human antibodies. The company offers a highly effective immunization and selection platform in order to combine antibody generation with a very early validation directly after fusion. The system allows the selection of antibody producing hybridomas 4times faster than with conventional hybridoma technology. With a world-wide patent-pending system we are now looking for reliable and competent business partners to market our platform and cell lines. The team of new/era/mabs provide an excellent background in antibody generation and characterization and is highly motivated to support your customized development.	neweramabs.com
nextplant UG	
nextplant UG is one of the world's leading companies in the clonal mass propagation of garden and outdoor orchids. The in vitro laboratory with open spaces supplies perennial nurseries with Cypripedium varieties and Dactylorhiza hybrids of all growth stages - as clone varieties or generatively propagated.	nextplant.de
NMI TT Pharmservices	
NMI TT Pharmservices is an established provider of non-clinical contract research services. For an ever-growing base of pharma, biotech and academic clients, the company has developed a comprehensive portfolio of protein profiling services (e.g. DigiWest®, RPPA, Luminex), custom cell services (e.g. custom stable cell lines, compound testing studies), and electrophysiology services.	nmi-tt.de/pharmservices
NovaBiotec® Dr. Fechter GmbH	
Microbiological and chemical investigations, in particular of soil, water and air samples, planning / inspection of sanitation, in particular analytics and sanitation support for mould and dry rot, incl. education in this field. Delivery of production auxiliaries and support for biogas plants with biological treatment processes incl. application, insulation and preservation of enzymes. Research, development and marketing of test kits for breweries and malthouses.	novabiotec.de
Novozymes Berlin GmbH	
ORGANOBALANCE is specialized in the research and development of the natural diversity of microorganisms. We explore the huge potential of microorganisms for the development of innovative and natural products.	organobalance.de
NOXXON Pharma AG	
NOXXON Pharma is a biopharmaceutical company pioneering the development of a new class of proprietary therapeutics called Spiegelmers. Spiegelmers are the chemically synthesized, non-immunogenic alternative to antibodies. NOXXON has a diversified portfolio of clinical stage Spiegelmer therapeutics: Spiegelmer® NOX-E36, Spiegelmer® NOX-A12, Spiegelmer® NOX-H94. The Spiegelmer platform provides the Company with powerful and unique discovery capabilities, which have generated a number of additional leads under preclinical investigation.	noxxon.com
OakLabs GmbH	
OakLabs provides the most flexible products and services for large scale custom SNP genotyping on the market. OakLabs offers several formats for analysing a variable number of SNPs in any sequenced organism.	oak-labs.com
OctreoPharm Sciences GmbH	
OctreoPharm Sciences GmbH is a clinical development company focusing on diagnostic radiopharmaceuticals.	ipsen.com
Omeicos Therapeutics GmbH	
OMEICOS Therapeutics develops synthetic analogues of omega-3 fatty acid-derived small molecules that have the potential to treat inflammatory, cardiovascular and other diseases. In Atrial Fibrillation, OMEICOS' lead compound OMT-28 has entered clinical phase IIa/IIb in Q1/2019. OMT-28 activates an endogenous cardio-protective signaling pathway that stabilizes the heart rhythm and shall provide curative effects to the diseased organ. A pre-clinical pipeline focus' on other cardiovascular conditions and ophthalmological indications.	omeicos.com
ovalehn GmbH	
Production and application of specific recipes -containing IgY for diagnostics and oral, passive immune therapy.	ovalehn.de
Oxacell AG	
OXACELL AG is an innovative biopharmaceutical company for advanced therapy medicinal products (AT-MPs), located in Postdam. Since its formation in 2009, a highly specialized team of scientists, physicians and technical assistants harnesses mesenchymal stem cells recovered from adipose tissue to develop new regenerative therapies. The company's close partnership with Clinic Sanssouci provides an excellent infrastructure, linking stem cell extraction and purification to clinical product application. In 2015, OXACELL has received the manufacturing authorization for its new stem cell product, Oxacells CAL, in accordance with §13 AMG.	oxacell.com

Pantherna Therapeutics GmbH	
Pantherna Therapeutics is a privately-held biopharmaceutical Company developing mRNA therapeutics for vascular and pulmonary diseases. Pantherna's innovative technology platform is based on advanced nanoparticles for the delivery and expression of therapeutic mRNA drugs in the endothelium and epithelium of the lung.	pantherna-therapeutics.com
Pentracor GmbH	
In the event of a heart attack or stroke, the acute phase component C-reactive protein (CRP) leads to an increase of the primary damage. The new adsorber (PentraSorb® CRP) for the therapeutic reduction of CRP significantly decreases damage in patients. This new form of therapy was a highlight of the 2019 conference of the German Society of Cardiology and is being reimbursed.	pentracor.com
peptides&elephants GmbH	
peptides&elephants is a world-wide provider of peptide-based services and products for immunology, virology, drug discovery as well as personalized cancer vaccines for immunotherapy.	peptides.de
PerformaNat GmbH	
PerformaNat develops novel feed additives for improved animal health with a focus on prevention of gastrointestinal diseases and metabolic disorders as well as boosting the immune system. PerformaNat's competitive advantage is based on a unique technology platform for identification and characterization of novel active ingredients.	performanat.de
PharmaSol GmbH	
Modification of ingredients or introduction of new metabolic pathways in plants with gene-technology methods.	pharmasol-berlin.de
PLANTBACTER INTERNATIONAL GmbH	
Plantbacter developed natural and ecological products to improve soil condition for better plant growth and reduced water consume.	plantbacter.com
PlasmaChem GmbH	
PlasmaChem GmbH is an innovative R&D and manufacturing company specializing in nanomaterials, plasma- and ultra-thin film technologies. The company manufactures nano-coated medical implants (stents), nanomaterials, additives for metal plating (applied e.g. by Siemens AG), new additives to engine oils on the base of nanodiamonds and other industrial nanoproducts.	plasmachem.com
PolyAn GmbH	
PolyAn is a nanotechnology company specialized in the modification of surfaces using Molecular Surface Engineering (MSE). Since 1996 PolyAn develops and manufactures consumables for multiplex diagnostics and LifeScience research. Key product families are functionalized slides & coverslips for microarrays, fluorescent multiplex microparticles (beads) and reactive microplates for immunoassays.	poly-an.de
PRAMOMOLECULAR GmbH	
PRAMOMOLECULAR, a spin-off of the Technische Universität Berlin, is developing drug candidates for gene silencing through RNAi. Our lipid-based, covalent delivery technology enables efficient silencing in lung and pancreas with self-delivering siRNAs. PRAMO's therapeutic focus is on cancers with mutated RAS proteins as oncogenic drivers.	pramomolecular.com
preclinics Gesellschaft für präklinische Forschung mbH	
preclinics is a commercial cooperation partner for preclinical research and development. As a competent, creative and experienced partner, we offer preclinical models and methods for testing pharmaceutical substances and biologicals. Additional we provide custom antibody production and services for recombinant and single-domain antibodies from llama, goat, sheep, rabbit and other species..	preclinics.com
Predemtec GmbH	
Predemtec GmbH is a company focused on the research, development and manufacture of innovative diagnostic tests for use in the detection of dementia-related risk factors. The goal has been to make the early and reliable diagnosis of various dementia-related illnesses a reality through the use of our innovative diagnostics tests.	predemtecDX.com
ProBioGen AG	
ProBioGen is a Contract Development and Manufacturing Organization (CDMO) and Technology Provider, with extensive expertise in cell line engineering, process development (upstream- and downstream process) and GMP manufacturing of biopharmaceuticals. Offering state-of-the-art contract development and manufacturing services as well as access to proprietary cell lines (AGE1.cell lines®) for the manufacturing of biopharmaceuticals and vaccines. The company possesses the manufacturing authorization from the competent authority and meets the quality standards required by the EMA and the FDA guidelines.	probiogen.de

ProteiQ Biosciences GmbH	
ProteiQ is a specialist in targeted proteomics and AI-based solutions for distributed processing of next-generation proteomics data. ProteiQ's bioinformatic solutions enable large scale LC-MS/MS proteomics. The company also provides biotech research organizations with state-of-the-art proteomics services, which include protein biomarker discovery and validation, and multiple attribute monitoring.	proteiq.com
Proteome Factory AG	
Biomarker & target discovery, validation, analysis of food and ingredients, absolute quantification of proteins and peptides, sequencing and characterization of proteins and antibodies (CDR), 2DE and LC-MS based proteomics studies, pharmacokinetics, pharmaco, immuno and membrane proteomics, protein identification, characterization of proteins and peptides (PTMs, e.g. phosphorylation, glycosilation), quality control, mass determination, N-terminal amino acid sequencing, silver staining kit etc.	proteome-factory.com
provitro GmbH	
Provitro combines more than ten years of experiences in commercialisation of cell culture technologies, Tissue Microarrays and immunohistochemical analyses with the scientific expertise of the Pathological Institute of the Charité, Berlin. Based on a quality management system according to ISO 9001:2008, we provide our customers not only with high-quality products, CE marked in vitro-diagnostics and state-of-the-art services but also with individual solutions for their specific requests.	provitro.de
QMEDIS Analytics GmbH	
QMEDIS Analytics GmbH is an independent, private contract laboratory. We offer a wide range of analytical and galenic services as well as regulatory support for the pharma, medical technology, cosmetics and food industries. Our expertise includes medicinal products with chemically defined active substances, herbal preparations (with a focus on cannabis), novel and innovative drug formulations (using 2D printing technologies) and modern analysis techniques.	qmedisanalytics.com
QoD Technologies GmbH	
Quantistry provides an intuitive and cloud-based computational chemistry platform for highly innovative chemical and material research and development. Using quantum simulations, molecular dynamics and machine learning, our platform is based on a powerful combination of cutting-edge methods that enable our customers to develop better products, such as novel materials or new pharmaceutical ingredients, in less time.	quantum-on-demand.com
RAPIDOZYM Gesellschaft für Laborhandel und DNA Diagnostika mbH	
Expertise of cell biologists cell manufacturing and clean room technology specialists. Focuses on clinical stem cell product development portfolio are stroke, myocardial infarction and plastic surgery.	rapidozym.de
RIPAC-Labor GmbH	
RIPAC-LABOR offers high-quality diagnoses of bacterial infections, particularly in poultry, pigs and cattle, but also in other farm and domestic animals. The company uses pathogen differentiation to provide quick and effective methods for fighting pathogens. It performs resistance tests and epidemiological analyses and also focuses on producing herd-specific vaccines.	ripac-labor.de
Roboklon GmbH	
Distribution, Marketing and Development of Products for Molecular Biological Research and Genetic Engineering.	roboklon.com
ROVALAB	
Our Master Mixes for QPCR, Standard-, Hot Start- and High Fidelity PCR as well as our high quality critical raw materials and reagents such as DNA Polymerases and dNTPs are designed to help you successfully and rapidly solve your scientific and manufacturing tasks.	rovalab.com
Sanity Group GmbH	
Sanity Group is a Berlin based health and life-science company, founded in 2018 by Finn Age Hänsel and Fabian Friede. The company's goal is to improve people's quality of life through the sensible use of cannabinoids and the utilization of the endocannabinoid system. One the one hand, Sanity Group is actively developing and researching innovative pharmaceuticals and medical products (Sanity Medical). In parallel, the focus is also on cannabinoid-based consumer goods (Sanity Care). The mission is to build the leading cannabinoid company for medicinal cannabis and consumer health in Europe.	sanitygroup.com
scalable minds GmbH	
Scalable Minds build tools that make AI technologies easy-to-use and effective for complex tasks. Our focus areas are Image Analysis for Neuroscience, Medical Research and Industry.	scalableminds.com

Scienion AG	
SCIENION is the leading manufacturer of high performance instruments for applications requiring precise deposition of biological content in low volumes. Our technology is ideally suited for loading of oligos, proteins, antibodies, and glycans onto diagnostics devices. Easy scale up is possible thanks to the same core technology engineered in all systems. We have recently developed a breakthrough technology allowing high throughput isolation of single cells.	scienion.com
selekt-ID BIOLABS GmbH	
The selekt ID Biolabs is a molecular biology service laboratory. The portfolio includes several PCR-based techniques detection methods: The core product is the identification of microorganisms (bacteria, yeasts, fungi) by sequence comparison of 16S respectively. Will also offer the detection of animal species in meat products and, as GMO analysis and detection of allergens.	selekt-id.de
SEPIAtec GmbH	
Sepiatec GmbH develops separation systems based on high-performance liquid chromatography (HPLC) and supercritical fluid chromatography (SFC) technology, enabling our customers to speed up their separation and method development significantly. Sepiatec systems are used around the world by major pharmaceutical and biotechnology companies as well as by numerous research institutes.	sepiatec.com
SERAMUN Diagnostica GmbH	
Seramun Diagnostica GmbH is a leading substrate- and reagent producer in Europe. Its product range covers in vitro-diagnostics (IVD) for infectious, autoimmune and rheumatic diseases (e.g. Serazym®, SeraLine®, SeraSpot®) as well as vaccines purity testing solutions by ELISA and diagnostic tools (e.g. software, automation systems). Customized solutions cover protein and antibody development and purification, but also conjugation and labelling of antibodies to different dyes.	seramun.com
SGS Institut Fresenius GmbH	
Analytical laboratory services and consulting for development, production and quality control of drugs.	institut-fresenius.de
sifin diagnostics gmbh	
We are manufacturing and distributing worldwide our bacteriological test reagents for serotyping of Salmonella, Shigella, Yersinia, E. coli as well as culture media and blood grouping reagents. We do also offer a large variety of monoclonal antibodies. MICRONAUT is the trade mark of MERLIN's product line and exclusively available at sifin diagnostics gmbh.	sifin.de
Silence Therapeutics AG	
Silence Therapeutics AG is a leading RNAi therapeutics development company and offers a novel, proprietary siRNA technology (AtuRNAi) and proprietary systemic delivery systems for siRNA (AtuPLEX, DACC and DBTC). SILENCE pipeline consists of both partnered and internal programs of which 3 clinical phase II and 1 clinical phase I programs are partnered with Pfizer/Quark (2 ophthalmic indications) and Novartis/Quark (2 kidney indications). Silence's internal lead compound Atu027 is currently in a Phase I clinical study for the treatment of solid tumours.	silence-therapeutics.com
SLM- Speziallabor für angewandte Mikrobiologie GmbH	
Microbiological quality control for medical devices, pharmaceuticals, cosmetics, drinking water, foodstuff, monitoring in clean rooms.	speziallabor.com
Solaga GmbH	
Solaga UG develops living wall elements with microalgal biofilms for improving inside and outside air in a sustainable matter. In our AlgBioga project, we are researching the usage of algal secretions for solar biogas production using phototrophic bacteria as an innovative, climate-friendly alternative to conventional energy supply. Biogas can be stored for the heating period.	solaga.de
SOPAT GmbH	
SOPAT is specialized in the analysis of particulate systems. The company develops and markets an innovative particle measurement technology consists of a tailor made SOPAT probe and innovative SOPAT software for real-time analysis of multi-phase systems. Particles, such as droplets, grains, cells or bubbles, are measured with high precision inline and in situ in running processes.	sopat.de
SphingoTec Therapeutics GmbH	
SphingoTec GmbH develops innovative biomarkers for diagnosis, prediction and monitoring of acute medical conditions, such as acute heart failure, acute kidney injury and circulatory shock, in order to support patient management and provide guidance for treatment strategies.	sphingotec.com
SunCoal Industries GmbH	
SunCoal develops and commercializes high-value carbon products like technical carbon, bio-based platform chemicals or biofuels using is hydrothermal treatment technology for biomass. In addition, SunCoal offers an innovative technical solution for the dewatering of organic sludges.	suncoal.com

Surflay Nanotec GmbH	
Surflay Nanotec GmbH, a spin-off company from Capsulation NanoScience AG, is specialized on coating colloidal and planar materials with functional films. Key technology is the patented LbL-Technology® with polymers. Applications are in the fields of separation materials, pigment encapsulation, bio-sensing and diagnostic particles. In addition to customer tailored projects Surflay offers an unique range of products of tunable multifunctional nano-or microparticles and dye-labeled polymers.	surflay.com
Tacalyx GmbH	
Tacalyx is a Start-up with the area of expertise anti-glycan therapeutics that recognize tumor cells and use the underlying biology for more efficient destruction.	tacalyx.com
Targenomix GmbH	
Targenomix GmbH is a startup company with core competences in computational and systems biology, quantitative and molecular genetics, cell biology and biochemistry. One of the main research fields is the identification of interactions between molecular targets and small molecules.	targenomix.com
Thanares GmbH	
Development, use and marketing of analytical process for diagnostic and therapeutic purposes. Future business activities: detection process for bioactive substances in bodily fluids, isolation, characterization and investigation of bioactive compounds from plants, in particular insoluble proteins or low concentrations of proteins, development of low cost genetic systems for over-expression and/or production of such proteins.	thanares.com
Thermo Fisher Scientific Clinical Diagnostics	
Thermo Scientific Biomarkers (B·R·A·H·M·S GmbH) explores, develops and produces new diagnostic test procedures to improve the diagnosis, and thereby the treatment, of life-threatening illnesses. This takes place with over 470 employees, in the disease areas infectiology, cardiology and pneumology as well as thyroid, autoimmunity and cardiology on the basis of our own patented biomarkers. Since October 2009 B·R·A·H·M·S GmbH is part of Thermo Fisher Scientific Inc. (NYSE: TMO), the world leader in serving science.	brahms.de
Therycell GmbH	
At TheryCell we are employing proprietary new technologies to learn from patients` own T-cells how to direct them against their individual cancers. Our approach paves the way for a personalized and fully autologous T cell receptor immune therapy with highly predictable safety and efficacy.	therycell.com
TIB MOLBIOL Syntheselabor GmbH	
In 1990, TIB MOLBIOL became the first German manufacturer of oligonucleotides. In addition to designing and synthesizing primers and probes for Real-Time PCR assays, we develop and produce LightMix® Kits for Roche Diagnostics LightCycler® Instruments, covering applications in Clinical Chemistry, Pharmacogenetics, Pathogen Detection, as well as Cancer Research. TIB MOLBIOL is ISO 13485 and ISO 9001 certified.	tib-molbiol.com
Tilray Deutschland GmbH	
Tilray Germany is a GMP-certified manufacturer of medical cannabis and supplies patients, doctors, pharmacies, hospitals, authorities and researchers in Canada, the European Union, Australia and Latin America.	tilray.de
TissUse GmbH	
TissUse is a Berlin, Germany-based, biotechnology company who has developed a unique "Multi-Organ-Chip" platform for advanced toxicity testing and cutting-edge disease modelling. TissUse's HUMIMIC Chips provide a completely new approach to predict, for example, toxicity, ADME profiles and efficacy in vitro, reducing and replacing laboratory animal testing and streamlining human clinical trials.	tissuse.com
TransTissue Technologies GmbH	
TransTissue has been a subsidiary of BioTissue Technologies, Freiburg since September 2001. With more than 15 years of experience in regenerative medicine, the scientists of TransTissue Technologies have developed second-generation autologous tissue replacements, e.g. cartilage and bone grafts. We are mainly concerned with inventions and the development of tissue engineering products for regenerative medicine. We offer a broad panel of services in the field of regenerative medicine.	transtissue.com
Treamid GmbH	
Treamid GmbH develops innovative treatments in areas of high unmet medical needs. Our patent protected, preclinical lead compounds are developed in endocrinology and respiratory diseases.	treamid.com
UBF – Untersuchungs-, Beratungs- und Forschungslaboratorium GmbH	
UBF – Untersuchungs-, Beratungs- und Forschungslaboratorium GmbH is a biotechnology company active in the field of analysis, consulting and research.	ubf-research.com
UGA Biopharma GmbH	
UGA Biopharma a private Research and Development company, focuses on Research, Development and Commercialization of Biopharmaceutical products under contract with other Biopharmaceutical companies. UGA Biopharma conducts power of biosciences to develop high-tech, last generation of biomedicine, diagnostic kits, molecular biology items and also offers world class services in biotechnology area.	ugabiopharma.com

Umweltbiotechnik – Berlin UG	
Feasibility studies, development, planning, construction and operation of biotechnological plants for ground-water, process water and waste water purification. Accredited microbiological laboratory for the investigation of drinking water, groundwater, bath water, soils, food, anti-microbial active ingredients and sterility according to Ph.Eur, approved in accordance with BiostoffV and the German infection protection act (Infektionsschutzgesetz).	umweltbiotechnik.de
Vaxxilon Deutschland GmbH	
Vaxxilon is a start-up established by the Max Planck Society and Actelion Ltd to discover and develop novel vaccines against major infectious diseases. The innovative technologies are based on the scientific insights and research of Professors Peter Seeberger (the Max Planck Institute of Colloids and Interfaces) and Gennaro de Libero (University Hospital of Basel). Vaxxilon is advancing several vaccine candidates using homogeneous, synthetically produced carbohydrate antigens.	vaxxilon.com
VERBIO Vereinigte BioEnergie AG	
VERBIO is one of the leading, independent manufacturers and suppliers of biofuels and the only major industrial producer of biodiesel, bioethanol and biomethane in Europe.	verbio.de
Xiralite GmbH	
Xiralite is a medical device company specialized in the development, production and marketing of devices for Diagnostic Imaging based on optical technologies. Our aim is to provide comprehensive concepts for diagnosis and therapy of severe diseases providing significantly improved benefits to our customers. Xiralite, the fluorescence imaging system, presents an innovative, fast and safe method for imaging the microcirculation of the hands allowing for diagnosis and therapy control of various rheumatic diseases. More than 20,000 patients have already been imaged and our devices are installed worldwide in clinical practices, hospitals and research institutions.	xiralite.com
Yashraj Biotechnology LTD.	
Yashraj Biotechnology GmbH is part of Yashraj group. Yashraj group is a research driven company headquartered in India. Our research encompasses diagnostic biomarkers. In quest of new biomarker collaboration, in last few years of establishment, our Berlin office received few novel scientific ideas for collaborations on biomarkers this includes few research institutes. We are further evaluating the feasibilities of biomarker ideas and collaboration opportunities in Berlin.	yashraj.com
Zellwerk GmbH	
Zellwerk holds manufacturing license for immune cell therapeutics. We are specialized on mass production of patient-individual T-cells, TIL, NK cells and mesenchymal stem cells using proprietary ZRP cell cultivation system and belonging perfusion bioreactors. The ZRP cell cultivation technology enables standardized and reproducible cultivation processing in a highly sterile environment. The ZRP bioreactors are also well suited for cell seeded implants as well as for production of recombinant glycoproteins on customized cell carriers.	zellwerk.biz
Zytomed Systems GmbH	
Zytomed Systems' focus is the development, production and distribution of antibodies and detection systems for immunohistochemical cancer diagnostics as well as reagents and kits for in-situ hybridisation.	zytomed-systems.de

Medtech and Digital Health Companies

1000shapes GmbH	
We develop software solutions for creating products that better fit humans. We convert image data into highly accurate 3D anatomical models and provide tailored solutions that improve the design and manufacturing of medical devices and facilitate individualized pre-operative planning of surgical interventions.	1000shapes.com
3M Health Information Systems GmbH	
The product portfolio of 3M Health Information Systems includes software for coding, grouping, controlling, and performance analysis in the DRG and PEPP context and solutions for medical quality management.	3mdeutschland.de
A. Berkholz & Sohn GmbH & Co. KG	
Repair and custom manufacture of surgical instruments, incl. minimal invasive surgery instruments.	berkholz-berlin.de
aap Implantate AG	
aap is a Berlin-based globally active medical device company developing, manufacturing and marketing products for trauma. The IP-protected portfolio includes besides the innovative anatomical plating system LOQTEQ®, a wide range of cannulated screws. In addition, aap has an innovation pipeline with promising development projects as the antibacterial silver coating technology and the resorbable magnesium implants technology.	aap.de

aap Joints GmbH	
aap Joints GmbH is a Berlin based medical technology manufacturer that designs, develops, manufactures and distributes orthopaedic implants and related instruments. Its product portfolio includes primary and revision hip and knee implants that help patients worldwide to relieve pain, restructure mobility and improve quality of life.	aap.de
AB Diagnostic Systems GmbH	
Founded in 2010, AB Diagnostic Systems has established itself worldwide as a market leader in the field of ELISA clinical diagnostics. Our mission is to reinvent the ideal diagnostic kit for blood banks and diagnostic laboratories. We focus on precision, quality, and usability, enabling the laboratory staff to work more intuitively and efficiently achieving accurate results.	ab-ds.de
Ada Health GmbH	
Ada Health GmbH is a global health company founded by doctors, scientists, and industry pioneers to create new possibilities for personal health. Ada's core system connects medical knowledge with intelligent technology to help all people actively manage their health and medical professionals to deliver effective care.	ada.com
Advosense GmbH	
Advosense is on a mission to transform geriatric care, starting with incontinence management. We are empowering clinicians to know when, where and how to best respond to their patient's needs by using intelligent sensors to do so. The Sensa System is a bedside sensor system and IoT platform. The system detects patients and resident's incontinence episodes providing real-time notifications to their caregivers so they can be cared for and managed effectively in hospitals and nursing homes. Sensa not only provides empathic, quality care but helps our clinicians in a resource constrained, episodic environment; reducing costs, increasing the quality of life for our patients, families and caregivers, and ultimately advocating for an age friendly, healthy society.	advosense.com
AEMtec GmbH	
AEMtec, located in the prestigious science and technology center in Berlin-Adlershof, is a global acting specialist for the development and production of a variety of precision optoelectronic products, including components, subsystems, modules and complete systems. With our wide range of technologies we are the right partner for sophisticated solutions in the area of miniaturization.	aemtec.com
ai4medicine UG	
AI4medicine has created the App HealthAdvisor to help prevent a stroke. This helps to recognize the personal risk and minimize it.	ai4medicine.com
AICURA Medical GmbH	
AICURA Medical GmbH is developing an AI platform that enables lifecycle management of datasets and machine learning models for the healthcare industry. Designed as a platform-as-a-service, the AICURA platform enables plug-and-play deployment and is privacy compliant out of the box. It is used to improve patient care, accelerate drug discovery and delivery, and enable innovation in personalized medicine.	aicura-medical.com
AKmira optronics GmbH	
AKmira optronics GmbH is a start-up company which currently develops a 3D scanner based on digital optical holography. This brand new technology was matured and transferred from academia to industry by the inventor and founder Dr. Alexander Knüttel. The scanner will predominantly be available for the 3D endoscopy market where miniaturization is an absolute premium. Currently we are also targeting large medical companies to broaden the future sales activities.	akmira-optronics.de
alco GmbH	
Since the Year 2000, we are developing, producing and distributing high-quality medical device products for interventional medicine.	alco-gmbh.de
AmbulanzPartner SozioTechnologie APST GmbH	
APST is a multi-sided platform for patients with neurological diseases such as amyotrophic lateral sclerosis (ALS), spinal muscle atrophy (SMA) and other neuromuscular disorders. It combines a digital platform with a patient-centered case management. The APST platform links professional health providers such as pharmacies and medical manufacturers to patients and their relatives. Based on the platform-approach, APST provides research services focusing on real world evidence and patient reported outcomes.	ambulanzpartner.de
Amparo GmbH	
Amparo develops, manufactures and distributes prosthetic components for lower limb amputees, in particular the Confidence Socket, which allows people to start walking again in one hour and the socket is re-usable. All tools necessary for the process fit into a sports bag, allowing amputees receive a prosthetic leg anywhere in the world, even in remote and rural areas.	amparo.world

appamedix UG	
Appamedix develops apps for patients medical laboratories and hospitals. Our team consists of UI and UX designers, Doctors and computer scientists.	ampexit.com
ArgosConsult Strategy Consultants Dr. Wille	
ArgosConsult is a competence center for business development and innovation management in healthcare industries. We help companies to structure their strategic growth, market access and innovation process. Our core competencies are market oriented new product development and service engineering. We use proven methods for B2B business modeling and a seamless innovation process ensuring sustaining market success. This includes access to dedicated networks for regulatory support, funding programs and international collaboration.	argosconsult.de
Argus medical GmbH	
During our years of work in the field of electrophysiological diagnostics, we increasingly wanted to realize our visions and ideas. With this goal in mind, we founded Argus Medical GmbH in 2018. But we also see our company as a holistic opportunity. We do not simply want to be a manufacturer of medical technology, but would also like to take responsibility for our environment. We would like to pass on part of our profits to various environmental and animal welfare projects.	argusmedical.de
Aristotech Industries GmbH	
ARISTOTECH Industries GmbH founded in 2006, specializes in contract manufacturing of orthopaedic devices and medical products, implants and instruments worldwide. Based near Berlin, Germany, the company supplies OEM companies with standard and customized medical devices that meet ISO guidelines for safety, quality and efficiency. AristoTech Industries offers expertise from design and development, engineering and product testing through finished goods manufacturing to logistical services as cost effective solutions.	aristotech.de
ASKANIA Mikroskop Technik Rathenow GmbH	
We, ASKANIA Mikroskop Technik Rathenow GmbH, offer microscopes for education, biological, medical experience and also stereomicroscopes for applications in science and technology. A variety of additional accessories and special models meet the requirements of modern microscopy equipment. The products are characterized by a precise construction and a sustainable design and are exported worldwide.	askania.de
ASML Berlin GmbH	
By developing and manufacturing optical, electronic and mechanical high-precision components, assemblies and systems ASML Berlin pushes reliable new systems in medical technology. The range of services in this field includes OEM solutions, technology modules, private label products and touchscreen modules.	berlinerglas.de
AssistMe GmbH	
AssistMe is developing an intelligent and connected incontinence pant for elderly people. It can detect the amount and type of excrement in real time sending recommendation for action to nursing staff, enabling the prioritisation of tasks on an ad hoc basis. Nursing staff are greatly relieved, as there are fewer leakages, secondary illnesses are prevented, and schedules become more efficient.	assistme.io
Athena DiaX GmbH	
AthenaDiaX GmbH is a dynamic product manufacturer with extensive clinical know-how. Our values are responsibility and integrity, with which we want to improve the perspective of people with health risks. The AthenaDiaX products serve high-risk patients and are of benefit to a large number of people. They are an integral part of the clinical diagnostics of large risk groups.	athenadiax.com
audatic GmbH	
We are building systems to intelligently modify sound using state of the art deep learning technology and unique datasets. Our personalized sound environment allows users to customize sounds to their individual taste.	audatic.ai
AUGLETICS GmbH	
The AUGLETICS Eight is exactly what ambitious rowing clubs have always dreamed of: a rowing ergometer that feels almost like rowing on water. The electronically controlled eddy current brake allows a much more realistic movement, as the draw resistance starts from the first millimeter. With a sensor technology that provides the most accurate body measurement data and a networkability that can be simulated in training competitions.	augletics.de
AVIDAL Distribution GmbH	
AVIDAL specializes in cardio-vascular, peripheral-vascular, and neuro-vascular patient care. With our business unit AVIDAL Distribution, we offer a strong platform for medical devices manufacturers wanting to enter the central European markets. Our management team combines over 35 years of global marketing and sales experience. We hold close relationships with all cardio-vascular, peripheral-vascular and neuro-vascular key opinion leaders of these markets and are present in the majority of the top 100 care units.	avidal.net

B. Braun Miethke GmbH & Co. KG	
B. Braun Miethke GmbH & Co. KG is a joint venture between Aesculap AG, a subsidiary of the medical technology and pharmaceutical company B. Braun Melsungen AG, and Christoph Miethke, founder and CEO of Christoph Miethke GmbH & Co. KG located in Potsdam. Our focus is the development of innovative targeted drug delivery products to meet unmet or poorly met user needs of patients and health care professionals.	bbraun-miethke.com
B. Braun Melsungen AG	
B. Braun Melsungen ist mit drei Standorten in Berlin vertreten, darunter mit einem Kompetenzzentrum für Produkte für die Therapie von Gefäßkrankungen, in dem Herzkatheter, Stents und Gefäßimplantate entwickelt, hergestellt und vermarktet werden. Insbesondere in der Therapie von verengten Herzkranzgefäßen hat sich B. Braun mit dem Berliner Standort seit 1990 zu einem global Player entwickelt.	bbraun.de
Baggid GmbH	
With the systems specially developed by Baggid, every food can be read out automatically and evaluated according to any specifications. In addition to 130 nutrients, Baggid automatically determines for which groups of people foods are suitable and may suggest better alternatives. In addition to universities with a nutritional focus, customers are also commercial kitchens, nursing homes and kindergartens.	baggid.com
BANDELIN electronic GmbH & Co. KG	
BANDELIN electronic, a family-owned mid-sized company, is located in Berlin. Ultrasonic baths and homogenisers, disinfectants and cleaning agents from BANDELIN are in use in nearly all branches like laboratories, medical and pharmaceutical fields as well as in industry.	bandelin.com
Bayoomed GmbH	
BAYOOMED is your partner for the engineering of medical software (embedded, desktop, web, cloud-based) and medical apps (DiGA, DiPA, MHEALTH / EHEALTH). With almost 20 years of project experience in the regulated medical and pharmaceutical environment, we are the most experienced medical software engineers in Europe. Our Quality management processes certified by TÜV Hessen according to ISO 13485 are a testament to our passion for sustainable solutions and distinct customer focus.	bayoomed.com
Baze Labs GmbH	
Baze offers the first evidence-based personalized supplement product. Our approach is deeply rooted in nutrition science: with the help of an easy and convenient blood test at home, your actual molecular micronutrient levels are measured and analyzed in our lab. Based on the molecular data and life-style information you provide, we calculate optimizing nutrient recommendations and send you truly personalized supplements with real health impact.	baze.com
Berlin Heals GmbH	
The global burden of chronic heart failure is huge. Despite the success of optimal medical treatment, it's not possible to heal heart failure. Berlin Heals has developed a device which can readjust the disturbed myocardial electrical gradient to normalize heart function after a short treatment period. The device is in clinical trials.	berlinheals.de
Berlin Heart GmbH	
Berlin Heart GmbH develops, produces and markets innovative systems for mechanical circulatory support. With our products EXCOR® Pediatric and EXCOR® Adult*, we cover the entire scope of medical indications. We are the only company in the world offering systems that can support patients of every age and size, from newborns all the way to adults.	berlinheart.de
Bermedi Medical Solutions GmbH	
Bermedi is a globally operating trading company specialized in the distribution and export of products for the medical radiology and imaging. Beside consumables and x-ray accessories we are also providing devices and equipment for the digital radiology. The scope of our program includes: Products for Digital Radiology Dry Imaging Laser Imagers & Dry Imaging Laser Films CR and accessories for the digital radiology Radiation protection, X-ray protection glass and windows X-ray accessories X-ray film, Processing chemicals, Cassettes, X-ray film processors Dental products Refurbished x-ray devices	bermedi.com
Bernaфон Hörgeräte GmbH	
Bernaфон GmbH is the German marketing company of Bernaфон AG. Its activities in Berlin include the production and sale of hearing aids to the specialist trade, audiological consulting and custom manufacture of in-the-ear hearing systems and otoplasty.	bernaфон.de
Bertrandt Services GmbH	
For more than 40 years, the Bertrandt Group has been developing individual solutions for the international automotive and aerospace industries as well as the electrical engineering, energy, mechanical engineering and medical technology industries. In total, around 13,500 employees at more than 50 locations in Europe, China and the USA stand for in-depth know-how, sustainable project solutions and a high level of customer orientation.	bertrandt.com

bess medizintechnik GmbH	
Combining top quality medical devices for ENT and Head & Neck Surgery with excellent, reliable services, it is our target to live up to our customers' requests and needs now and in future. To this end, we are in regular contact with doctors, industry, and other experts, constantly developing and adapting our portfolio.	bess.eu
bess pro GmbH	
bess pro gmbh develops, manufactures, packs, and sterilizes medical devices and pharmaceutical products mainly for ENT, Head & Neck Surgery, Pulmonology and Gastroenterology. From 3D-CAD engineering via rapid prototyping and silicone injection molding, we offer full services up to clean room production and packaging (ISO class 7 and 8) for our affiliate companies (bess medizintechnik gmbh / Leufen Medical GmbH / Novatech SA / Boston Medical Products, Inc.) as well as for non-affiliate companies. Furthermore, bess pro offers laboratory tests with own climate chambers for real time and accelerated aging, equipment for strength tests and fatigue tests as well as high-resolution microscopy for sample tests or damage analysis. For sterility or packaging validation projects, or for other regulatory questions, our experienced engineers offer consultations as desired.	besspro.eu
Betterguards Technology GmbH	
Betterguards has developed intelligent technology that protects people from ligament and joint injuries. The Betterguards System can be integrated into shoes, supports or gloves and only activates in cases of sudden movements (e.g. ankle sprain). During normal activities, however, the system is flexible and guarantees a natural freedom of motion.	betterguards.de
BioMedion GmbH	
The arivis AG develops and provides IT solutions focused on the Life Sciences. Our product portfolio ranges from solutions in science, regulatory, production to quality assurance for medical and pharmaceutical products. Arivis is a market-leading software company focused on the life sciences industry. With a broad product portfolio, our solutions address industry and academic environments. We offer software solutions as well as services provided by our experienced IT project engineers and experienced subject matter experts.	arivis.com
Biomental Gesellschaft für Mentalsysteme mbH	
BioMental GmbH develops, manufactures and sells biofeedback devices for respiration and eye movements. They are used in medical and psychotherapy against tinnitus, migraine, chronic pain, ADS, burnout for preventive treatment	biomental.de
BIOMET Deutschland GmbH	
Founded in 1927 and headquartered in Warsaw, Indiana, Biomet is a global leader in musculoskeletal health-care. The company designs, manufacture and market orthopedic reconstructive products; sports medicine, biologics, extremities and trauma products; office-based technologies; spine, craniomaxillofacial and thoracic products; dental implants; and related surgical products. Zimmer Biomet's products and solutions help treat patients suffering from disorders of, or injuries to, bones, joints or supporting soft tissues. The company has operations in more than 25 countries around the world and sells products in more than 100 countries.	zimmerbiomet.eu
Biotrics bioimplants GmbH	
biotrics is a privately hold biomedical start-up company in Berlin (35 employees) active within the field of bone & tissue regeneration. The company is mainly focused on R&D and manufacturing of biodegradable metal implants for various clinical indications.	biotrics.com
BIOTRONIK SE & Co. KG	
At BIOTRONIK, we are committed to helping people with heart and blood vessel diseases live healthy, fulfilling lives. This immense responsibility motivates thousands of employees worldwide to develop new cardiovascular and endovascular medical technologies that physicians trust to save and improve patient lives. Our unique, safe and reliable products, including pacemakers, stents, implantable defibrillators and remote monitoring services, help patients in more than 100 countries.	biotronik.com
biotx.ai GmbH	
biotx.ai has the only AI specifically designed to make wide data manageable. Using graphs of contextual knowledge about metabolic pathways, protein co-expression and protein-protein interactions, we are able to separate the meaningful features from the noise. This allows us to apply all the benefits of big data to wide genomic data.	biotx.ai
BioWink GmbH	
Clue is a digital health start-up based in Berlin, Germany. Launched in 2013, Clue is the world's fastest growing period, PMS, fertility & ovulation tracking app. Clue's mission is to help people all around the world benefit from insights into female health.	helloclue.com
Bloody Health GbR	
We are the Bloody Health Collective and develop non-commercial software for tracking menstruation and fertility with the mobile app drip. In 2018 we received a grant of € 50,000 from the BMBF/Prototypefund and are currently working on the project on an voluntary basis. We organize ourselves and make decisions collectively, therefore we do not have a classical management.	bloodyhealth.gitlab.io

BOCAhealthcare GmbH	
BOCAhealthcare GmbH wants to lead the innovation in the body fluid management field by providing disruptive high-tech solutions based on Artificial Intelligence able to predict and prevent acute and chronic diseases related to hydration problems. The Company wants to revolutionize the management of body fluid disorders by enhancing not invasive diagnostic solutions for the monitoring of the hydration status of the human body. By providing a miniaturized hardware and an intelligent software able to predict accurately body water changes, the goal of BOCAhealthcare GmbH is to change completely the way body fluids are managed nowadays. BOCAhealth solution can be integrated in other devices or be a stand-alone inside and outside the hospital for patients and users at highest need such as heart failure and kidney disease patients.	boca-health.com
BOOST Thyroid by VLM Health UG	
BOOST Thyroid is a free app solving outdated health management of Hashimoto's - the most common autoimmune condition affecting over 200 million people. We're the first app to address Hashimoto's in collaboration with medical healthcare professionals and researchers. With machine learning and empathic scientific information, we offer personalized options to improve health.	boostthyroid.com
botiss biomaterials group

With digital platform Raccoon.Recovery patients can successfully do the HEP created by their physiotherapists from high-quality video lessons, and both monitor the rehab progress. Thanks to this, patients reach their rehab goals faster and increase their loyalty to therapists.	raccoon.world
Rayner Surgical GmbH	
Rayner designs and manufactures intraocular lenses for use in cataract surgery. When Sir Harold Ridley designed the world's first IOL in 1949, he chose Rayner to manufacture this ground-breaking invention. Driven by science and with more than 65 years of experience, we remain at the forefront of innovation.	rayner.com
Realtime-Imaging®	
We develop custom-tailored, highly optimized image processing software and systems for you.	realtime-imaging.de
Recare Deutschland GmbH	
Through our digital solution, we connect all parties involved in the care transfer process nationwide in order to make it more efficient, transparent and accessible. The follow-up care to the hospital stay is ensured by means of real-time coordination, which allows a seamless patient transfer.	recareolutions.com
Rehabtech Research Lab GmbH	
Research, development, further education and training in the field of medical engineering. Rehabtech Research Lab cooperates closely with other research facilities and is a recognized "Institute at TU Berlin". We focus on orthopedic and rehabilitation technologies, in particular by basic biomechanics research, the continuing development of measuring and test processes in prosthetics and orthotics and research into other application fields. Open Innovation Space was created in cooperation with FabLab Berlin at the Bötzw compound in May 2015, additional Ottobock location for sales and marketing, strategy and R&D.	rehab-lab.com
Reha-Stim Medtec GmbH & Co. KG	
Manufacturer and distributor of medical devices for neurological rehabilitation.	reha-stim.com/de
ReMoD UG	
The ReMoD team is a Berlin start-up in the rehabilitation technology industry. We focus on a new method to correct posture and movement for patients with posture problems.	hemiparese-therapie.de
Robert Helwig GmbH	
Manufacture of syringes and cannules for human and veterinary medicine and technical applications.	hero-berlin.de
Robert Riele GmbH & Co. KG	
Development, production and sale of photometers, in particular for clinical chemistry, water analyses, industrial applications and for training purposes; OEM	riele.de
Rocket Medical GmbH	
Rocket Medical GmbH developed a new generation of equipment for the field of medical technology.	deu.rocketmedical.com

Roland Consult Stasche & Finger GmbH	
The company is a globally playing producer for ophthalmological diagnostic systems with satisfied clients in about 100 countries on all continents with extraordinary service.	roland-consult.de
RoX Health GmbH	
RoX Health GmbH is a company builder and start-up studio in the field of digital health solutions. As a subsidiary of Roche, it is closely linked to the group's broad network. RoX Health focuses on the German healthcare market and provides founders and start-ups with its expertise in the healthcare sector. Current focus: digital solutions in the area of neurodegenerative and oncological diseases.	roxhealth.com
S&V Technologies GmbH	
Skin & Vision is a multispecialty medical technology-driven company that develops and manufactures devices for medical aesthetics and ophthalmology. S&V is located near Berlin and was found in 2007 as an AG by Christine F. Kreiner, an entrepreneur with a successful track record in the medical device industry. The company has a strong commitment to research and development of novel biomaterials. S&V aims to leverage team expertise with nature's intelligence to successfully design innovative medical devices to cover the unmet needs of patients and health care providers.	amalian.de
Safe4Net GmbH	
Development of innovative health care software systems. Our focus is on trans sectoral collaboration, data security and data evaluation: <ul style="list-style-type: none"> • Quality assurance systems for integrated health care processes (oncology, orthopedy, ophthalmology, etc.). • Documentation and evaluation Systems e.g. for population-based and hospital registry. • Patient-reported outcome measurement (PROMs) Systems. 	safe4net.de
samedi GmbH	
We founded samedi GmbH in 2008 and set ourselves the goal of solving the communication problems across the boundaries of the individual doctor's practice wall and hospital wall for the benefit of the patient. We started by simplifying and structuring the appointment booking in the health sector and establishing the patient service – above all the online appointment booking with the doctor. Today, the functions and areas of application of our web software go far beyond mere online appointment booking. We network medical information, make it available at all treatment-relevant locations, and ultimately improve patient care quality.	samedi.de/index.html
Schallware GmbH	
The Schallware Ultrasound Simulator allows your doctors to practice ultrasound diagnostics just as under real conditions.	schallware.de
Schiller Medizintechnik GmbH	
We are an internationally leading manufacturer and supplier of medical technology solutions, focusing on cardiopulmonary diagnostics and therapy. Our products save lives and provide physicians and nurses with professional support.	schiller.ch/de/de
Schnorrenberg Chirurgiemechnik GmbH	
Repairs of surgical, microsurgical and minimally invasive instruments, endoscopes, motor systems and containers, including accessories; customized products with documentation and conformity declarations.	schnorrenberg-gmbh.de

Senmotion GmbH	
Senmotion offers a revolutionary 360° solution for diagnostics, prevention and therapy. We provide high-quality data for motion analysis and research in a wide range of applications. Using a modern therapy and training approach, we use individual kinetic data and powerful machine learning algorithms for real-time diagnostics and interventions.	senmotion.com
sepp.med GmbH	
sepp.med GmbH has been working in the medical technology field since 1996. Before that date, the company had over 15 years of experience in developing large-scale medical devices: the ideal foundation for tapping into new fields of activity. Today, sepp.med GmbH is a service provider and general contractor supporting development projects at major medical clients.	seppmed.de
Servolab Medizin Software GmbH	
Servolab Medizin Software GmbH was founded more than 25 years ago, is based in Berlin and has a subsidiary located in Potsdam. Our strength is the development of perfected lab systems, good support goes without saying.	servolab.de
Shiva Medicare GmbH	
Shiva Medicare GmbH established 2006 in Berlin, Germany and England, offers innovative high-tech products and solution in Magnetic Resonance Imaging. Our mobile diagnostics truck is a modern high-tech medical unit with an extremity Open MRI system, ultrasound, ECG and a blood test lab onboard. An open scanner is used to avoid the problem of claustrophobia that some patients experience with a traditional enclosed MRI scanner.	shivamed.de
Siemens Healthcare GmbH	
As a leading global healthcare company, we at Siemens Healthineers continuously develop our portfolio further, from medical imaging and laboratory diagnostics to adding managed services, consulting, and healthcare IT services – as well as further technologies for therapeutic and molecular diagnostics.	siemens-healthineers.com/de
Smart Health UG	
Smart Health UG builds a virtual health assistant that provides expertise about women's health through instant messaging platforms. With our product, Izzy, we help users to get medically accurate information instantly, 24/7, in an automated and personalized way. We use conversational interfaces enabled by a chatbot software enhanced by natural language processing and we build up our database of health-related conversations. All of them are optimized for this therapeutic area. With our AI-based tool, we can recognize patterns in the users' behaviors. Izzy is already a companion for 23k women worldwide.	superizzy.ai
SOMATEX Medical Technologies GmbH	
At SOMATEX®, we design high-quality medical products with a focus on breast interventions. The company's product portfolio includes biopsy site markers and localization wires, solutions for pulmonary interventions, biopsy, fetal therapy and assisted reproduction, radiation protection as well as surgical illumination.	somatex.com
SpaceBit GmbH	
The main goal of company SpaceBit GmbH, founded in 1995, is to develop and provide software for physiological measurements and psychophysiological studies. Primarily PC- and µC-Software is applied in combination with the modular system "Healthlab".	spacebit.de
SPRINGER AKTIV AG	
Manufacturer of semi customized medical insoles for orthopedic shops in Germany and all over the world. Applications of the high-tech shoe inlays for children, sportsmen and -women and diabetics; supply of measuring shafts and devices for measuring foot pressure.	springer-berlin.de
SurgiData UG	
SurgiData is developing a digital platform that supports internal workflows in hospitals. Our platform digitizes the entire hospital journey from admission, anesthesia transfer to the ward, the entire ward process until patient discharge. By integrating all the stakeholders within one platform, medical information can flow seamlessly from one stakeholder to the next. So the entire staff is always well informed and can make the best decision possible to ensure high treatment quality.	surgi-data.com
Synaptikon GmbH	
NeuroNation is developing digital therapeutics for prevention, rehabilitation, and diagnostics of cognitive impairments and mental issues with app and web products. With over 16 million registered and reachable users, we leverage our data and reach to apply the most effective components of Cognitive Training, MBCT, and MBSR to help our user maintain and rebuild a healthy brain.	sp.neuronation.com/de
T&T medilogic Medizintechnik GmbH	
A medium-sized enterprise in medical technology, which has its emphasis in the areas of biomechanics and image processing. Quintessential points of our work are measurement and evaluation of mechanical size at humans and animals.	medilogic.com

Tech Innosphere GmbH	
Innosphere develops AI-powered brain-stimulation medical device, for personalized effective and safe treatment of cognitive disorders. The first target indication of Innosphere is ADHD. The Innosphere patented electrodes and AF-RNS™ technology, provide accurate and effective stimulation to specific brain regions. Innosphere collaborates with leading global institutes, such as the Charite, Yale university and the university of Oxford. This treatment enhances neural activity in the selected brain regions and creates new neural connections, by that alleviating ADHD symptoms effectively without side effects. As a result, the patient experiences an immediate and long-lasting reduction in ADHD symptoms. This technology is clinically validated at leading medical institutes, with a reduction of 50% of symptom severity after 10 treatment sessions, and this efficacy is maintained even two months after stopping the intervention.	inno-sphere.com/Home
TEFRA Hochfrequenz Apparate Rudolf Messerschmidt GmbH	
TEFRA radiofrequency therapy – gentle naturopathic through the use of high-frequency currents to promote or trigger the self-healing of the body.	tefra-berlin.com
TelePsy Deutschland GmbH	
Telepsy is one of the most well-developed and wide-ranging platforms for eMental health in Europe. Telepsy offers a secure and user-friendly platform used to diagnose and assess patients with mental illnesses and problems. The platform was designed to provide targeted and diverse content for psychotherapeutic interventions.	telepsy.de
ThinkSono GmbH	
ThinkSono is a company at the cutting edge of medicine and technology. The team consists of world-class engineers and clinicians to solve the problem of deep vein thrombosis (DVT) diagnosis. DVT is one of the world's deadliest conditions, associated with 800,000 deaths a year.	thinksono.com
Thryve (mHealth Pioneers GmbH)	
Thryve empowers healthcare providers to deliver data-driven, value-based care. It's SDK integrates seamlessly into digital services and provides instant access to health-related data from smartphones, wearables & connected medical products. Applying several levels of artificial intelligence, Thryve unlocks a wealth of insights from their continuous stream of lifestyle and health biomarkers. Digital therapy providers, pharmaceutical companies and hospitals all over Europe rely on Thryve to improve indication understanding, individualize treatments and create reliable, long-term outcome evidence.	thryve.health
Töchter & Söhne Gesellschaft für digitale Helfer mbH	
Approximately 3.7 million people in need of care live in Germany. This number will continue to increase in the future. Helping these people is the driving force behind Töchter & Söhne. Töchter & Söhne wants to support unpaid caregivers and people in need as much as possible in everyday care with digital solutions. We develop and operate quality-assured e-health solutions for those affected as well as volunteers and professional caregivers. Together with users and our business customers, we develop digital solutions for improved nursing care. Our competence is reflected in our digital solutions as well as in our employees.	toechtersoehne.com
TOPASS GmbH	
TOPASS offers pharmaceutical industry and medical device developers services related to planning, testing, reviewing, and manufacturing new diagnostic and therapeutic products.	topass.eu

Viomedo is the leading clinical trial platform in the German-speaking region. Together with patients, patient advocacy groups and physicians, we support leading research institutions, life sciences companies and CROs with their clinical research. We deliver end-to-end solutions based on our online platform and data to effectively boost patient recruitment and improve trial planning. Viomedo is a subsidiary of Clariness GmbH.	viomedo.de
Visage Imaging GmbH	
Visage Imaging is a global provider of enterprise imaging and advanced visualization solutions for diagnostic imaging.	visageimaging.com
Visseiro GmbH	
Living independently as an elderly person carries risks. Nowadays solutions, like wearables have no compliance. Therefore, VISSEIRO developed a new technology for measuring vital parameters by just sitting down on a seat cushion. The sensors measure daily sitting patterns, health data (heart rate, heart rate variability, respiration rate and amplitude) by tracking the movement of the heart etc., the sophisticated AI algorithms analyze the data and calculates an individual health score.	visseiro.com
VISTAC GmbH	
Development and production of the Laser Long Cane, the long cane for the blind, with an integrated obstacle detector for protection of the head and upper body.	vistac.de
Vivira Health Lab GmbH	
Vivira Health Lab GmbH strives to enhance the everyday life of patients suffering musculoskeletal dysfunctions in terms of mobility, stability and neuromuscular control as well as patients with musculoskeletal pain. The Vivira digital health app provides patients with a personalised therapeutic self-care program for restoring and preserving the whole musculoskeletal system and pain relief.	vivira.com
Vivy GmbH	
We are an experienced team in the fields of health, data security, design and usability. Together, we've committed ourselves to an idea: With the help of modern technologies, we enable people to have direct access to their personal health data in order to better understand their own health and make better-informed decisions. For this reason, we are expanding the existing healthcare system with an app that is accessible to all: Vivy. With Vivy, we create an intuitive electronic health record that turns any smartphone into a place where all relevant medical records can be collected.	vivy.com
VMscope GmbH	
VMscope is developer and distributor in the field of digital pathology. VMscope offers: <ul style="list-style-type: none"> • Image analysis software suites for Ki67 and other tumor marker quantification. • Integration into major pathology information systems. • Virtual microscopy web portals. • Slide scanning and hosting services. 	vmscope.de
voize GmbH	
voize is the digital voice assistant for medical documentation. Every day caregivers and nurses spend over 2.5 hours on medical documentation. We help them finish it in minutes. Caregivers can speak the documentation freely into a smartphone and the voize app automatically generates structured documentation records. We transfer these documentation records into their existing electronic health record system (EHR).	voize.de
W.O.M. WORLD OF MEDICINE GmbH	
WOM is a pioneer and world leader in the field of Minimally Invasive Medicine. As a medical device company with an international focus, we have been developing and producing innovative products for over 40 years, that make surgeries as easy as possible on patients.	wom.group
Well IT GmbH	
Well IT showcases the value of cutting edge services through creativity and innovation. Our thrust is to bring together key stakeholders to pool our professional experience in developing robust user-friendly ICT solutions that help our customers sustain their own well-being while, also improving their personal health literacy and empowering them with a safe and enjoyable educational experience.	well-it.de
WeWoThom GmbH	
Development and production from device against pain in the bones and the back for the patients.	wewothom.de

WISE Srl – German Branch	
WISE Srl is a Milan- and Berlin-based medical device company developing the new generation of implantable electrodes for Neuromodulation and Neuromonitoring for the treatment of Chronic Pain and for presurgical Epilepsy monitoring.	wiseneuro.com
xbird GmbH	
Behavior and environment can directly influence our health; both can act as a catalyst for various health conditions. At xbird, we keep track of both factors by using the sensors in your smartphone or wearable. Health care professionals can use our information to make better-informed decisions and personalized treatment recommendations for their patients.	xbird.io
XION GmbH	
For more than 25 years XION has been developing rigid and flexible endoscopes, light sources, 2D and 3D cameras, medical carts and IT solutions for endoscopy / MIS. Our competence in mechanics, optics, electronics and software design provides innovative system solutions, setting new standards in medical endoscopy.	xion-medical.com
YUVEDO GmbH	
YUVEDO is of people with Parkinson's for people with Parkinson's. We want less tremor and less rigor, sleep better and speak louder. We want to accompany our children to the prom, play catch with our grandchildren and travel with our families. We want to keep our freedom or win back. That's why there is YUVEDO. Together we will reduce our symptoms and live a better life longer.	yuvedo.de
